Geopolitics at the End of the Twentieth Century Nurit Kliot, David

Newman, 2013-11-05 An excellent examination of how the collapse of the Soviet Union and the impact of globalization have brought about changes not only to the territorial configuration sovereignty of states and their boundaries but also to traditional notions of state boundaries sovereignty and social order These essays focus on the key regional and geopolitical characteristics of this global reordering with an emphasis on Eastern Europe and South Asia They discuss the territorial reordering which is taking place at the level of the state as boundaries are redemarcated in line with ethno territorial demands as borders are transversed by the movement of peoples information and finance and as the lines of territorial demarcation are perceived not only in terms of their fixed characteristics but as part of a process through which regional and ethnic identities continue to be formed and reformed Each section ends with articles which focus on literature on geopolitics and boundaries This is an invaluable addition to our understanding of contemporary world affairs

Geography in

America at the Dawn of the 21st Century Gary L. Gaile, Cort J. Willmott, 2005 *Geography in America at the Dawn of the 21st Century* surveys American geographers current research in their specialty areas and tracks trends and innovations in the many subfields of geography As such it is both a state of the discipline assessment and a topical reference It includes an introduction by the editors and 47 chapters each on a specific specialty The authors of each chapter were chosen by their specialty group of the American Association of Geographers AAG Based on a process of review and revision the chapters in

this volume have become truly representative of the recent scholarship of American geographers While it focuses on work since 1990 it additionally includes related prior work and work by non American geographers The initial Geography in America was published in 1989 and has become a benchmark reference of American geographical research during the 1980s This latest volume is completely new and features a preface written by the eminent geographer Gilbert White

Regions and Powers Barry Buzan,Ole Wæver,2003-12-04 This book develops the idea that since decolonisation regional patterns of security have become more prominent in international politics The authors combine an operational theory of regional security with an empirical application across the whole of the international system Individual chapters cover Africa the Balkans CIS Europe East Asia EU Europe the Middle East North America South America and South Asia The main focus is on the post Cold War period but the history of each regional security complex is traced back to its beginnings By relating the regional dynamics of security to current debates about the global power structure the authors unfold a distinctive interpretation of post Cold War international security avoiding both the extreme oversimplifications of the unipolar view and the extreme deterritorialisations of many globalist visions of a new world disorder Their framework brings out the radical diversity of security dynamics in different parts of the world

The Palgrave Encyclopedia of Imperialism and Anti-Imperialism Immanuel Ness,Zak Cope,2016-04-29 The Palgrave Encyclopedia Imperialism and Anti Imperialism objectively presents the prominent themes epochal events theoretical explanations and historical accounts of imperialism from 1776 to the present It is the most historically and academically comprehensive examination of the subject to date

A History of Spaces John Pickles,2012-11-12 This book provides an essential insight into the practices and ideas of maps and map making It draws on a wide range of social theorists and theorists of maps and cartography to show how maps and map making have shaped the spaces in which we live Going beyond the focus of traditional cartography the book draws on examples of the use of maps from the sixteenth century to the present including their role in projects of the national and colonial state emergent capitalism and the planetary consciousness of the natural sciences It also considers the use of maps for military purposes maps that have coded modern conceptions of health disease and social character and maps of the transparent human body and the transparent earth

Rethinking Globalization(S) NA NA,2016-04-30 Contributors from diverse disciplinary ideological and theoretical perspectives examine the multiple aspects and dimensions of globalization By employing a variety of methodological approaches the authors provide insights into the role of numerous agents in furthering the process and project of present and future globalization s as manifested in economic political and cultural domains Furthermore they address the impacts of globalization in nation states emancipatory feminist and environmental movements and migrant communities as well as identify their participation in and opposition to the phenomena of globalization

Politics Virginie Mamadouh,2017-05-15 Depending on the breadth or narrowness of the understanding of politics and the political politics in human geography is defined as either the operation of power in all social relations or the workings of

power directed to or by the state This volume avoids the two extremes by acknowledging the transformation of approaches to the political in human geography over the past few decades but also by highlighting the continued importance of the more traditional state based conception of politics The selected articles are clustered around six themes new agendas in political geography state territoriality international relations and globalization internal territorial organisation and geographical scale social movements and electoral participation and identities and citizenship *Environmental Security* Simon Dalby, 2002 Since the end of the Cold War environmental matters especially the international implications of environmental degradation have figured prominently in debates about rethinking security But do the assumptions underlying such discussions hold up under close scrutiny In this first treatment of environmental security from a truly critical perspective Simon Dalby shows how attempts to explain contemporary insecurity falter over unexamined notions of both environment and security Adding environmental history aboriginal perspectives and geopolitics to the analysis explicitly suggests that the growing disruptions caused by a carbon fueled and expanding modernity are at the root of contemporary difficulties *Environmental Security* argues that rethinking security means revisiting the question of how we conceive identities as endangered and how we perceive threats to these identities The book clearly demonstrates that the conceptual basis for critical security studies requires an extended engagement with political theory and with the assumptions of the modern subject as progressive political agent Viewed thus on a global scale the environmental security discourse raises profoundly troubling political questions as to who we are and what kind of world we are collectively making in our efforts to be secure **Global Legal Pluralism** Paul Schiff Berman, 2012-02-27 We live in a world of legal pluralism where a single act or actor is potentially regulated by multiple legal or quasi legal regimes imposed by state substate transnational supranational and nonstate communities Navigating these spheres of complex overlapping legal authority is confusing and we cannot expect territorial borders to solve all these problems At the same time those hoping to create one universal set of legal rules are also likely to be disappointed by the sheer variety of human communities and interests Instead we need an alternative jurisprudence one that seeks to create or preserve spaces for productive interaction among multiple overlapping legal systems by developing procedural mechanisms institutions and practices that aim to manage without eliminating the legal pluralism we see around us *Global Legal Pluralism* provides a broad synthesis across a variety of legal doctrines and academic disciplines and offers a novel conceptualization of law and globalization *Against Culture* Kirk Dombrowski, 2001-01-01 In a small Tlingit village in 1992 newly converted members of an all native church started a bonfire of non Christian items including reportedly native dancing regalia The burnings recalled an earlier century in which church converts in the same village burned totem poles and stirred long simmering tensions between native dance groups and fundamentalist Christian churches throughout the region This book traces the years leading up to the most recent burnings and reveals the multiple strands of social tension defining Tlingit and Haida life in Southeast Alaska today Author Kirk Dombrowski roots these tensions in a history of

misunderstanding and exploitation of native life including most recently the consequences of the Alaska Native Claims Settlement Act of 1971 He traces the results of economic upheaval changes in dependence on timber and commercial fishing and differences over the meaning of contemporary native culture that lie beneath current struggles His cogent highly readable analysis shows how these local disputes reflect broader problems of negotiating culture and Native American identity today Revealing in its ethnographic details arresting in its interpretive insights Against Culture raises important practical and theoretical implications for the understanding of indigenous cultural and political processes

Indigenous Peoples, National Parks, and Protected Areas Stan Stevens, 2014-09-18 A vast number of national parks and protected areas throughout the world have been established in the customary territories of Indigenous peoples In many cases these conservation areas have displaced Indigenous peoples undermining their cultures livelihoods and self governance while squandering opportunities to benefit from their knowledge values and practices This book makes the case for a paradigm shift in conservation from exclusionary uninhabited national parks and wilderness areas to new kinds of protected areas that recognize Indigenous peoples conservation contributions and rights It documents the beginnings of such a paradigm shift and issues a clarion call for transforming conservation in ways that could enhance the effectiveness of protected areas and benefit Indigenous peoples in and near tens of thousands of protected areas worldwide Indigenous Peoples National Parks and Protected Areas integrates wide ranging multidisciplinary intellectual perspectives with detailed analyses of new kinds of protected areas in diverse parts of the world Eleven geographers and anthropologists contribute nine substantive fieldwork based case studies Their contributions offer insights into experience with new conservation approaches in an array of countries including Australia Canada Guatemala Honduras Nepal Nicaragua Peru South Africa and the United States This book breaks new ground with its in depth exploration of changes in conservation policies and practices and their profound ramifications for Indigenous peoples protected areas and social reconciliation

Tourism and Borders Helmut Wachowiak, 2016-02-24 Although globalization has led to increased cross border traffic there has been little examination of how crossing political boundaries affects tourism and vice versa Bringing together case studies from Europe the USA and Southern Africa this volume discusses current issues and policies destination management and communication and planning in cross border areas Topics studied include borders as tourist attractions and destinations in their own right as barriers to travel and the growth of tourism boundaries as links of transit and the growth of supranationalism The book concludes that the role of borders has changed dramatically in recent years Many more borders that have traditionally hosted large scale tourism are becoming more difficult to cross primarily because of safety and immigration concerns On the other hand places that were once forbidden to foreigners are now opening up and new destinations are becoming more commonplace

Eaters Of The Dry Season David Rain, 2018-02-13 A remarkable blend of geography demography sociology development economics history cultural anthropology ecology politics sharia Muslim religious law and government policies

This book dispels many misconceptions and is an education in itself Choice **Boundaries, Territory and Postmodernity** David Newman,2013-11-05 Contributions to this collection seek to determine the extent to which states and boundaries have in fact disappeared or are simply changing their functions as we move from an era of fixed territories into a post Westphalian territorial system A group of international political geographers and political scientists examine the changing nature of the state pointing to significant changes on the one hand but equally noting the continued importance of territory and boundaries in determining the political ordering of the post modern world *Contesting Global Governance* Robert O'Brien,2000-04-20 A rich analysis of the increasingly important engagement between international institutions and global social movements

Making Political Geography John Agnew, Luca Muscarà,2012-02-16 Dating from its inception in the late nineteenth century political geography as a field has been heavily influenced by global events of the time Thus rather than trying to impose a single fashionable theory leading geographers John Agnew and Luca Muscar consider the underlying role of changing geopolitical context as their framework for understanding the evolution of the discipline The authors trace the development of key thinkers and theories during three distinct periods 1875 1945 the Cold War and the post Cold War emphasizing the ongoing struggle between theoretical monism and pluralism or one path to knowledge versus many The world has undergone dramatic shifts since the book s first publication in 2002 and this thoroughly revised and updated second edition focuses especially on reinterpretations of the post Cold War period Agnew and Muscar explore the renewed questioning of international borders the emergence of the Middle East and displacement of Europe as the center of global geopolitics the rise of China and other new powers the reappearance of environmental issues and the development of critical geopolitics With its deeply knowledgeable and balanced history and overview of the field this concise work will be a valuable and flexible text for all courses in political geography Islam and the Securitisation of Population Policies Katrina Riddell,2016-05-06 There has been much scholarly debate on the politically disruptive capabilities of Islam and the threats to global security posed by or to Muslim states and societies but within this dialogue there has been little recognition of the role of population policies in security issues Katrina Riddell s study focuses specifically on Islam and the securitization of population policies and sustainability Opening with a discussion of contemporary population discourses and their historical foundations the book examines how population growth has become an international security issue The author takes the examples of Pakistan and Iran to provide a nuanced understanding of Muslim states interaction with global debates on sustainability She also explores how Muslim and non Muslim states societies and agents perceive issues of population growth and control Providing an innovative approach to the pursuit of global sustainability and security this book presents useful material to scholars whose research focuses on Islam and the future
