## **Reorienting Economics:**

*Reorienting Economics* Tony Lawson, 2012-08-21 Contemporary economics is characterized by a mismatch between its methods of analysis and the nature of the world it seeks to interpret. Despite regular economic crises and ongoing critique of the discipline, the drift from political economy into applied mathematics appears to continue unabated. In this book, Tony Lawson advocates a realignment of economics with social reality. In analyzing mainstream economists' misplaced universality, the author places ontology at the heart of a reoriented future in which economics is integrated within the wider human and social sciences.

**Handbook of Research Methods and Applications in Heterodox Economics** The Late Frederic S. Lee, Bruce Cronin, 2016-04-29 Despite the important methodological critiques of the mainstream offered by heterodox economics, the dominant research method taught in heterodox programmes remains econometrics. This compelling Handbook provides a comprehensive introduction to a range of alternative research methods invaluable for analysing the data prominent in heterodox studies. Providing a solid basis for a mixed methods approach to economic investigations, the expertly crafted contributions are split into three distinct sections: philosophical foundation and research strategy; research methods and data collection and applications. Introductions to a host of invaluable methods such as survey, historical, ethnographic, experimental and mixed approaches, together with factor, cluster, complex and social network analytics, are complemented by descriptions of applications in practice. Practical and expansive, this Handbook is highly pertinent for students and scholars of economics, particularly those dedicated to heterodox approaches, as it provides a solid reference for mixed methods not available in mainstream economics research methods courses.

**Ontology and Economics** Edward Fullbrook, 2008-10-27 This original book brings together some of the world's leading critics of economics orthodoxy to debate Lawson's contribution to the economics literature. In this collection, scholars such as Bruce Caldwell, John Davis and Geoffrey Hodgson present their thoughtful criticisms of Lawson's work, while Lawson himself presents his reactions.

**The 'Uncertain' Foundations of Post Keynesian Economics** Stephen Dunn, 2010-04-05 Pt 1 The uncertain foundations of post Keynesian economics; pt 2 The nature of uncertainty; pt 3 The future of post Keynesianism.

Economic Pluralism Robert F. Garnett Jr, Erik Olsen, Martha Starr, 2009-09-10 Economists in the post Cold War era are increasingly circumspect about universal one-size-fits-all conceptions of human behaviour and economic institutions. Contemporary economics is thus marked by a nascent pluralism. *Economic Pluralism* brings these pluralist sensibilities to the fore. Its twenty original essays explore the positive potential and critical limits of pluralism in economic theory, philosophy, institutions and policies and education. These twenty original essays reflect the maturity and breadth of pluralist scholarship in economics today. The first eight chapters, including critical essays by Tony Lawson, Diana Strassmann et al, Frederic Lee and David Colander, stake out contentious positions on the value of pluralism in economic theory and philosophy. The remaining chapters explore the meaning and consequences of pluralism in economic education, institutions and policies. This volume provides a unique second generation discussion of

pluralism in economics Its twenty original essays stake out contentious positions on pluralism in economic theory philosophy institutions and policies and education reflecting multiple generations and traditions of thought It is a volume certain to spur wider conversation about the scope and value of economic pluralism for the 21st century This volume would be of most interest as a supplementary text for graduate or undergraduate courses that include units on heterodox economics or economic philosophy

*Interrupting Capitalism* Matthew A. Shadle, 2018-06-08 In the decade since the financial crisis of 2008 governments around the world have struggled to develop strategies to stabilize precarious markets encourage growth and combat mounting wealth inequality In the United States the recovery from that crisis has exacerbated the fears of the working and middle classes and pitted those classes against the wealthy Although we participate every day in economic life as workers consumers employers or activists we often experience the economy as a mysterious force that we cannot control or fully understand Matthew Shadle argues that Catholics ought to be able to draw on their faith to help navigate and make sense of economic life but too often the effort to get ahead or just stay afloat drowns out faith's appeal *Interrupting Capitalism* proposes a new strategy for Christian economic discipleship Rather than engage the two theological poles of continuity and rupture Christians should interrupt capitalism neither wholeheartedly endorsing global capitalism nor seeking to dismantle it This means breaking into the economy embracing those aspects that enhance human well being while transforming the market in a spirit of solidarity Shadle argues that all three of the dominant theological approaches dealing with economic life the progressive neoconservative and liberationist are theologies of continuity A fourth approach a communitarian one he believes can best embody the strategy of interrupting capitalism The Catholic tradition including its tradition of social teaching provides a cultural structure that along with their own social context conditions how Catholics think about and engage in economic activity Drawing on the resources of the tradition theologians reflect on this activity giving it a theoretical justification and offering correctives Both the experience of ordinary Catholics and the work of theologians feed into new articulations of Catholic social teaching Offering an overview of Catholic thought since the Second World War Shadle begins with the experience of Catholics in Western Europe at mid century moving to Latin America and the United States in the 1970s and 80s and then concluding with the phenomenon of globalization

International Law and Agroecological Husbandry John W. Head, 2016-11-25 I What might be preferable about agroecological husbandry

*Pluralist Economics* Edward Fullbrook, 2013-07-18 This book is an authoritative and accessible guide to the pluralist movement threatening to revolutionise mainstream economics Leading figures in the field explain why pluralism is a required virtue in economics how it came to be blocked and what it means for the way we think about research and teach economics The first part of the book looks at how neoclassical economics gained its stranglehold particularly in the United States and how the social and intellectual underpinnings of economics have enabled it to maintain this in the face of inconsistent evidence from the real world This is then contrasted with different approaches to pluralism *Pluralist Economics* then goes on

to address the array of arguments for establishing pluralism showing how economics came to function as a concealed ideology and not as a science and how value free economics is an illusion Finally it addresses the practical problems presented by this different way of doing economics *The New Palgrave Dictionary of Economics*, 2016-05-18 The award winning *The New Palgrave Dictionary of Economics* 2nd edition is now available as a dynamic online resource Consisting of over 1 900 articles written by leading figures in the field including Nobel prize winners this is the definitive scholarly reference work for a new generation of economists Regularly updated This product is a subscription based product *Issues In Heterodox Economics* Donald A. R. George, 2008-02-11 Through contributions from leading authors *Issues in Heterodox Economics* provides a critical analysis of the methodology of mainstream economics Challenges economists to abandon sterile formalism and develop new intellectual rigors to contribute to pressing contemporary issues A series of cutting edge articles provides a critical analysis of the dependence of mainstream economics on mathematical modelling and other methodologies Topics discussed include sustainable development worker control of firms evolutionary growth theory and more Challenges economists to abandon sterile formalism and develop new intellectual rigors to contribute to pressing contemporary issues *Economics for Real* Aki Lehtinen, Jaakko Kuorikoski, Petri Ylikoski, 2013-06-17 This book provides the first comprehensive and critical examination of Maki's realist philosophy of economics [What is Neoclassical Economics?](#) Jamie Morgan, 2015-11-19 Despite some diversification modern economics still attracts a great deal of criticism This is largely due to highly unrealistic assumptions underpinning economic theory explanatory failure poor policy framing and a dubious focus on prediction Many argue that flaws continue to owe much of their shortcomings to neoclassical economics As a result what we mean by neoclassical economics remains a significant issue This collection addresses the issue from a new perspective taking as its point of departure Tony Lawson's essay *What is this school called neoclassical economics* Few terms are as controversial for pluralist and heterodox economists as neoclassical economics This controversy has many aspects because the term itself has different specifications and connotations Within this multiplicity what we mean by neoclassical matters to pluralist and heterodox economists for two primary reasons First because it informs how we view and critique the mainstream second because the relationship between heterodox and mainstream economics influences how heterodox economists model apply methods and construct theory The chapters in this collection each have different things to say about these matters with contributions ranging across the work of key thinkers such as Thorstein Veblen and Kenneth Arrow applied issues of non linear modelling of dynamic systems and key events in the history of economics This book will be of use to those interested in methodology political economy heterodoxy and the history of economic thought **What is Heterodox Economics?** Andrew Mearman, Sebastian Berger, Danielle Guizzo, 2019-04-17 Since the Global Financial Crisis economics has been under greater public scrutiny revealing a crisis in the discipline This represented a potential turning point on how economics should be thought and taught Heterodox economics has played a prominent role in these discussions

revolving around new economics thinking and pluralism in economics Yet its identity aspirations and pedagogy remain underexplored contested and somewhat opaque This volume brings together sixteen interviews with leading economists to understand what heterodox economics is How and why does an economist become heterodox In which way do heterodox economists see themselves as different from mainstream economics The interviews shed light on what problems heterodox economists perceive in the mainstream elucidate the different contexts under which they operate in higher education and provide insights on their ontology and methodology The reader will also find answers to the following questions about the nature and state of heterodox economics Do heterodox economists have particular intellectual journeys motives and aspirations Is this reflected in their teaching practices and strategies to achieve social change What is the relation between heterodox economics and the humanities and arts Appealing to a diverse audience including philosophers sociologists and historians of economic thought the book will be of great interest to anyone keen to find out more about the internal discussions in the economics discipline

**The SAGE Handbook of Case-Based Methods** David Byrne, Charles C Ragin, 2009-06-18 Case based methods have a long history in the social sciences They are extensively used and raise many practical and theoretical questions This book provides a comprehensive critical examination of case oriented research It offers concrete proposals about the best research methods and provides an unparalleled guide to the emergence and complexity of the field The Handbook Situates the reader in the essential theoretical and practical issues Demonstrates the unity and diversity of case oriented research through an examination of case based methods Distinguishes between case based and case study research Elucidates the philosophical issues around case based methods Examines case based work in the context of both social theory and theories of research methods

*Intellectual Path Dependence in Economics* Altug Yalcintas, 2016-03-10 Is economics always self corrective Do erroneous theorems permanently disappear from the market of economic ideas Intellectual Path Dependence in Economics argues that errors in economics are not always corrected Although economists are often critical and open minded unfit explanations are nonetheless able to reproduce themselves The problem is that theorems sometimes survive the intellectual challenges in the market of economic ideas even when they are falsified or invalidated by criticism and an abundance of counter evidence A key question which often gets little or no attention is why do economists not reject theories when they have been refuted by evidence and falsified by philosophical reasoning This book explores the answer to this question by examining the phenomenon of intellectual path dependence in the history of economic thought It argues that the key reason why economists do not reject refuted theories is the epistemic costs of starting to use new theories Epistemic costs are primarily the costs of scarcity of the most valued element in academic production time Epistemic scarcity overwhelmingly dominates the evolution of scientific research in such a way that when researchers start off a new research project they allocate time between replicable and unreplicable research This book is essential reading for anyone interested in the methodology philosophy and history of economics

**Human Nature**

**in Modern Economics** Anna Horodecka, 2022-06-15 Human Nature in Modern Economics offers a precise definition of the concept of human nature in economics something that is so far lacking in the theoretical and methodological literature This book develops tools for the analysis of human nature through the construction of the author's meta model based on anthropological and psychological foundations allowing for comparisons of anthropological assumptions made in economic theories The model demonstrates that the normative functions of human nature may affect the economic reality The chapters argue that the concept of human nature determines our thinking about the economy and economics including fundamental methodologies methods and theories Thus the differences between various economic schools may result from the different assumptions of these schools about human nature Those evolving views of human nature proceed to explain the development of both orthodox mainstream and heterodox economics The book marks a significant addition to the literature on the history of economic thought heterodox economics economic theory and economic methodology For students it is a supplement to standard textbooks as it explains the current state of economics especially in its heterodox branches It will allow scholars to discover the importance of what they assume about human nature and how it may influence their research process *The Oxford Handbook of Post-Keynesian Economics, Volume 2* Geoffrey Colin Harcourt, Peter Kriesler, 2013-07 These two volumes cover the principal areas to which Post Keynesian economists have made distinctive contributions The contents include the significant criticism by Post Keynesians of mainstream economics but the emphasis is on positive Post Keynesian analysis of the economic problems of the modern world and of policies with which to tackle them Economic Objects and the Objects of Economics Peter Róna, László Zsolnai, 2018-08-21 This book examines the nature of economic objects that form the subject matter of economics and studies how they resemble or differ from the objects studied by the natural sciences It explores the question of whether economic objects created by modern economics sufficiently represent economic reality and confronts the question whether tools techniques and the methodology borrowed from the natural sciences are appropriate for the analysis of economic reality It demonstrates the unsustainability of rational choice theory It looks at economic agents such as individuals groups legally constituted entities algorithms or robots how they function and how they are represented in economics The volume further examines the extent if any that mathematics can represent the objects of the economy such as supply and demand equilibrium marginal utility or the money supply as they actually occur in the economy and as they are represented in economics Finally the volume explores whether the subject matter of economics however defined is the proper subject of theoretical knowledge whether economics is an analytic or a descriptive discipline or if it is more properly seen in the domain of practical reason Specifically the book looks at the importance and the ambiguity of the ontology of modern economics temporality reflexivity the question of incommensurability and their implications for economic policy
