Repairing and Extending Finishes: Plaster, gypsum board, ceramic tile H. Leslie Simmons, 1990 **Repairing and Extending Finishes** H.L. Simmons, 1990 *Repairing and Extending Nonstructural Metals* H.L. Simmons, 1990-07-31

To spite a national trend toward renovation restoration and remodeling construction products producers and their associations are not universally eager to publish recommendations for repairing or extending existing materials There are two major reasons First there are several possible applications of most building materials and there is an even larger number of different problems that can occur after products are installed in a building Thus it is difficult to produce recommendations that cover every eventuality Second it is not always in a building construction product producer's best interest to publish data that will help building owners repair their product Producers whose income derives from selling new products do not necessarily applaud when their associations spend their money telling architects and building owners how to avoid buying their products Finally in the Building Renovation and Restoration Series we have a reference that recognizes that problems frequently occur with materials used in building projects In this book and in the other books in this series xiii xlv Series Foreword Simmons goes beyond the promotional hyperbole found in most product literature and explains how to identify common problems He then offers informed inside recommendations on how to deal with each of the problems Each chapter covers certain materials or family of materials in a way that can be understood by building owners and managers as well as construction and design professionals Ramsey/Sleeper architectural graphic standards Charles George Ramsey, Harold Reeve Sleeper, John Ray Hoke, American Institute of Architects, 1994-03-21 The architect's standard reference for over 60 years is now available as a book CD ROM set Use the book for ideas and inspiration Then use one of five powerful search methods on the CD ROM to quickly find all the information you need for a design project Twentieth-Century Building Materials Thomas C. Jester, 2014-08-01 Over the concluding decades of the twentieth century the historic preservation community increasingly turned its attention to modern buildings including bungalows from the 1930s gas stations and diners from the 1940s and office buildings and architectural homes from the 1950s Conservation efforts however were often hampered by a lack of technical information about the products used in these structures and to fill this gap Twentieth Century Building Materials was developed by the U S Department of the Interior's National Park Service and first published in 1995 Now this invaluable guide is being reissued with a new preface by the book's original editor With more than 250 illustrations including a full color photographic essay the volume remains an indispensable reference on the history and conservation of modern building materials Thirty seven essays written by leading experts offer insights into the history manufacturing processes and uses of a wide range of materials including glass block aluminum plywood linoleum and gypsum board Readers will also learn about how these materials perform over time and discover valuable conservation and repair techniques Bibliographies and sources for further research complete the volume The book is intended for a wide range
