Replaceable You Engineering The Body In Postwar America:

Replaceable You David Serlin, 2004-06-15 After World War II the United States underwent a massive cultural transformation that was vividly realized in the development and widespread use of new medical technologies Plastic surgery wonder drugs artificial organs and prosthetics inspired Americans to believe in a new age of modern medical miracles The nationalistic pride that flourished in postwar society meanwhile encouraged many Americans to put tremendous faith in the power of medicine to rehabilitate and otherwise transform the lives and bodies of the disabled and those considered abnormal Replaceable You revisits this heady era in American history to consider how these medical technologies and procedures were used to advance the politics of conformity during the 1950s **Contours of Ableism** F.

Campbell, 2009-09-16 Challenging notions of what constitutes normal and pathological bodies this ambitious agenda setting study theoretically reinvigorates disability studies by reconceptualising it as studies of ableism focusing on the practices and formations of able bodiedness to uncover what it means to be able rather than disabled **Chronic Youth** Julie Passanante Elman, 2014-10-20 The teenager has often appeared in culture as an anxious figure the repository for American dreams and worst nightmares at once on the brink of success and imminent failure Spotighting the troubled teen as a site of pop cultural medical and governmental intervention Chronic Youth traces the teenager as a figure through which broad threats to the normative order have been negotiated and contained Examining television popular novels science journalism new media and public policy Julie Passanante Elman shows how the teenager became a cultural touchstone for shifting notions of able bodiedness heteronormativity and neoliberalism in the late twentieth century By the late 1970s media industries as well as policymakers began developing new problem driven edutainment prominently featuring narratives of disability from the immunocompromised The Boy in the Plastic Bubble to ABC's After School Specials and teen sick lit Although this conjoining of disability and adolescence began as a storytelling convention disability became much more than a metaphor as the process of medicalizing adolescence intensified by the 1990s with parenting books containing neuro scientific warnings about the incomplete and volatile teen brain Undertaking a cultural history of youth that combines disability queer feminist and comparative media studies Elman offers a provocative new account of how American cultural producers policymakers and medical professionals have mobilized discourses of disability to cast adolescence as a treatable condition By tracing the teen's uneven passage from postwar rebel to 21st century patient Chronic Youth shows how teenagers became a lynchpin for a culture of perpetual rehabilitation and neoliberal governmentality [The Look of a Woman](#) Eric Plemons, 2017-07-27

Developed in the United States in the 1980s facial feminization surgery FFS is a set of bone and soft tissue reconstructive surgical procedures intended to feminize the faces of trans women While facial surgery was once considered auxiliary to genital surgery many people now find that these procedures confer distinct benefits according to the different models of sex and gender in which they intervene Surgeons advertise that FFS not only improves a trans woman's appearance it allows her

to be recognized as a woman by those who see her In *The Look of a Woman* Eric Plemons foregrounds the narratives of FFS patients and their surgeons as they move from consultation and the operating room to postsurgery recovery He shows how the increasing popularity of FFS represents a shift away from genital based conceptions of trans selfhood in ways that mirror the evolving views of what is considered to be good trans medicine Outlining how conflicting models of trans therapeutics play out in practice Plemons demonstrates how FFS is changing the project of surgical sex reassignment by reconfiguring the kind of sex that surgery aims to change

Invalid Modernism Michael Davidson, 2019-01-04 Invalid Modernism contributes to an intersectional moment in disability studies by looking at modernist aesthetics through a defamiliar body It also offers an intersectional understanding of modernism by studying the representation of physical and cognitive difference during a period marked by progressive reforms in health labor and welfare Readings of texts by Henry James Samuel Beckett Virginia Woolf William Carlos Williams James Joyce Djuna Barnes Oscar Wilde F T Marinetti Jean Toomer an opera by Alexander Zemlinsky and paintings and constructions by dadaists and surrealists are set against the historical developments in sexology medical discourse and the pseudo sciences of eugenics and anthropometry Modernist works are well known for challenging formal features of narration and representation but it is seldom observed that this challenge has often been enabled by figures of shell shocked veterans tubercular heroines blind soothsayers invalid aesthetes and neurasthenic women Such figures complicate an aesthetics of autonomy by which modernism is often understood Since its evolution in the eighteenth century aesthetics has been seen in terms of judgments based on detached appreciation What begins as a highly privative sensate response to an object or natural formation results in a disinterested judgment about the value of that response By looking at modernist aesthetics through a disability optic Invalid Modernism attempts to restore the missing body to aesthetics by disclosing a structure of feeling around dramatic changes in modernity These changes are registered on and through the bodies and minds of figures considered in medical discourse of the period as invalid citizens and subjects
