The BBC's management of digital media initiative Great Britain: Parliament: House of Commons: Committee of Public Accounts, 2011-04-07 This report examines the management of the contract with Siemens and the BBC s in house development of the Digital Media Initiative Programme The Programme is designed to transform the way in which BBC staff create use and share video and audio material It involves the development of new technology to allow staff to manage content efficiently on their desktops in order to give greater accessibility of digital content for audiences on TV online and radio The BBC has made good progress in delivering the programme in house since it terminated its contract with Siemens It is now on course to deliver the complete technology by summer 2011 With hindsight the BBC should not have let the contract for its Digital Media Initiative to Siemens without testing the contractor against other suppliers especially as there was a high degree of innovation involved The Programme is no longer expected to deliver the overall net financial benefit of 17.9 million originally anticipated The BBC approved the Programme on the basis that it would cost 81.7 million and deliver benefits of 99.6 million but now forecasts costs of 133.6 million and benefits of 95.4 million a net cost of 38.2 million The Committee welcomes the Trust s assurance that it would now take a more challenging approach when considering procurements but are concerned with the ease with which the BBC found over 50 million in savings to make up for the losses it suffered through late delivery of the project and its own increased delivery costs This suggests the need for a more vigilant approach to value for money
