Reporting on Climate Change Bud Ward, Environmental Law Institute, 2003 Reporting on Climate Change Understanding the Science is a guide for reporters educators and other communicators on the current understanding about the science of global climate change This guide is the third in a series initially intended to help journalists both reporters and editors understand and report on the most authoritative scientific findings involving the far ranging issues related to global climate change Initially conceived to be exclusively for journalists and editors it has evolved over time as a resource also for formal and informal climate science educators and for other communicators needing a plain English grasp of climate science

Reporting on Climate Change ,2002 Features a guidebook for journalists entitled Reporting on Climate Change Understanding the Science published by the Environmental Health Center National Safety Council Cautions reporters to resist the temptation to cast current intriguing possibilities as the future s inescapable facts concerning global warming and climate change Offers scientific data and diagrams as an aid to writing accurate news articles Reporting on Climate Change Environmental Health Center (National Safety Council), 1994

Rethinking Climate Change Research Pernille Almlund, 2016-04-08 The problems and debates surrounding climate change possess closely intertwined social and scientific aspects This book highlights the importance of researching climate change through a multi disciplinary approach namely through cultural studies communication studies and clean technology studies These three dimensions taken together have the ability to constitute a positive agenda for climate change science in its broader

understanding To cope with the climate change challenge not only do we need new energy efficient technologies other ways of living and new ways to communicate but we especially need new ways to start thinking about climate change across disciplines and backgrounds We need to begin thinking across engineering cultural science and communication in order to create innovative solutions as well as to generate optimistic and progressive narratives about the future Accentuating these softer scientific disciplines their overlaps and the positive discourses they can create this book provides some more profoundly researched themes pertaining to climate change and by that strengthening the analytical as well as the integrative approaches toward the fundamental questions at stake *Climate Action Report*, 1997 *U.S. Climate Action Report*, 2002 *U.S. Climate Action Report - 2002, Third National Communication of the United States of America, Etc.*, May 2002, 2002

Environmental Risks and the Media Barbara Adam, Stuart Allan, Cynthia Carter, 2013-01-11 *Environmental Risks and the Media* explores the ways in which environmental risks threats and hazards are represented transformed and contested by the media At a time when popular conceptions of the environment as a stable natural world with which humanity interferes are being increasingly contested the medias methods of encouraging audiences to think about environmental risks from the BSE or mad cow crisis to global climate change are becoming more and more controversial Examining large scale disasters as well as everyday hazards the contributors consider the tensions between entertainment and information in media coverage of the environment How do the media frame expert counter expert and lay public definitions of environmental risk What role do environmental pressure groups like Greenpeace or eco warriors and green guerrillas play in shaping what gets covered and how Does the media emphasis on spectacular events at the expense of issue sensitive reporting exacerbate the public tendency to overestimate sudden and violent risks and underestimate chronic long term ones **U.S. Climate Action Report, 2002**, 2002 *How Climate Change Comes to Matter* Candis

Callison, 2014-02-15 A rich ethnographic account describing the processes by which climate change comes to matter collectively and individually and how vernacular explanations of climate change reflect diverse ways of knowing and caring about the world *Climate Change in the Media* James Painter, 2013-08-19 Scientists and politicians are increasingly using the language of risk to describe the climate change challenge Some researchers have argued that stressing the risks posed by climate change rather than the uncertainties can create a more helpful context for policy makers and a stronger response from the public However understanding the concepts of risk and uncertainty and how to communicate them is a hotly debated issue In this book James Painter analyses how the international media present these and other narratives surrounding climate change He focuses on the coverage of reports by the Intergovernmental Panel on Climate Change IPCC and of the melting ice of the Arctic Sea and includes six countries Australia France India Norway the UK and the USA

The Science and Politics of Global Climate Change Andrew E. Dessler, Edward A. Parson, 2006 In this accessible primer Dessler and Parson combine their expertise in atmospheric science and public policy to help scientists policy makers and the

public sort through the conflicting claims in the climate change debate The authors explain how scientific and policy debates work summarize present scientific knowledge and uncertainty about climate change and discuss the available policy options Along the way they explain WHY the debate is so confusing Anyone with an interest in how science is used in policy debates will find this discussion illuminating The book requires no specialized knowledge but is accessible to any college educated general reader who wants to make more sense of the climate change debate It can also be used as a textbook to explain the details of the climate change debate or as a resource for science students or working scientists to explain how science is used in policy debates

Advancing the Science of Climate Change National Research Council, Division on Earth and Life Studies, Board on Atmospheric Sciences and Climate, America's Climate Choices: Panel on Advancing the Science of Climate Change, 2011-01-10 Climate change is occurring is caused largely by human activities and poses significant risks for and in many cases is already affecting a broad range of human and natural systems The compelling case for these conclusions is provided in *Advancing the Science of Climate Change* part of a congressionally requested suite of studies known as America's Climate Choices While noting that there is always more to learn and that the scientific process is never closed the book shows that hypotheses about climate change are supported by multiple lines of evidence and have stood firm in the face of serious debate and careful evaluation of alternative explanations As decision makers respond to these risks the nation's scientific enterprise can contribute through research that improves understanding of the causes and consequences of climate change and also is useful to decision makers at the local regional national and international levels The book identifies decisions being made in 12 sectors ranging from agriculture to transportation to identify decisions being made in response to climate change *Advancing the Science of Climate Change* calls for a single federal entity or program to coordinate a national multidisciplinary research effort aimed at improving both understanding and responses to climate change Seven cross cutting research themes are identified to support this scientific enterprise In addition leaders of federal climate research should redouble efforts to deploy a comprehensive climate observing system improve climate models and other analytical tools invest in human capital and improve linkages between research and decisions by forming partnerships with action oriented programs

Review of the Draft Climate Science Special Report National Academies of Sciences, Engineering, and Medicine, Division on Earth and Life Studies, Board on Atmospheric Sciences and Climate, Committee to Review the Draft Climate Science Special Report, 2017-06-30 The United States Global Change Research Program USGCRP is moving towards a sustained assessment process that allows for more fluid and consistent integration of scientific knowledge into the mandated quadrennial National Climate Assessment As part of this process the USGCRP is developing the Climate Science Special Report CSSR a technical report that details the current state of science relating to climate change and its physical impacts The CSSR is intended to focus on climate change in the United States and to inform future USGCRP products *Review of the Draft Climate Science Special Report* assesses whether the draft CSSR accurately presents the scientific literature in

an understandable transparent and traceable way whether the CSSR authors handled the data analyses and statistical approaches in an appropriate manner and the effectiveness of the report in conveying the information clearly for the intended audience This report provides recommendations for how the draft CSSR could be strengthened

China's Transition on Climate Change Communication and Governance Binbin Wang, 2020-12-13 This book provides a two level analytical framework and empirical study to analyze the reason and process of China's transition that is from a follower to driver in the field of global climate governance and is especially valuable the dialogues and cooperation between the government media and civil society Nowadays China shows strong leadership to push the process of global climate governance It's the first and fastest time in the past 40 year history of China's Opening up that China wins the international respect and trust in one of the issues of global governance What experiences can be summarized What dynamic situations and new possibilities emerged after Trump the U S president announced to withdraw from the Paris Agreement How to move forward based on the existing success This timely book offers new lens for international readers to understand China's effort domestically and internationally in the field of climate change and illustrate the outlook of the climate governance in the frame of win win co governance model

World Social Science Report 2013 UNESCO, ISSC, 2013-11-15 Produced by the International Social Science Council ISSC and UNESCO and published by the OECD the 2013 World Social Science Report represents a comprehensive overview of the field gathering the thoughts and expertise of hundreds of social scientists from around the world This edition focuses on the transformative role of the social sciences in confronting climate and broader processes of environmental change and in addressing priority problems from energy and water biodiversity and land use to urbanisation migration and education The report includes 100 articles written by 150 authors from 41 countries all over the world Authors represent some 24 disciplines mainly in the social sciences The contributions highlight the central importance of social science knowledge for environmental change research as a means of understanding changing environments in terms of social processes and as framework for finding concrete solutions towards

sustainability *A Pragmatist Orientation for the Social Sciences in Climate Policy* Martin Kowarsch, 2016-09-01 While economic and other social science expertise is indispensable for successful public policy making regarding global climate change social scientists face trade offs between the scientific credibility policy relevance and legitimacy of their policy advice From a philosophical perspective this book systematically addresses these trade offs and other crucial challenges facing the integrated economic assessments of the Intergovernmental Panel on Climate Change IPCC Based on John Dewey s pragmatist philosophy and an analysis of the value laden nature and reliability of climate change economics the book develops a refined science policy model and specific guidelines for these assessments of climate policy options The core idea is to scientifically explore the various practical implications of alternative climate policy pathways in an interdisciplinary manner together with diverse stakeholders This could facilitate an iterative deliberative public learning process concerning disputed policy issues This volume makes novel contributions to three strands of the literature 1 the philosophy of social science in policy 2 the philosophy of economics and 3 debates about the design of scientific assessments including the continuous IPCC reform debate This work is thus interesting for philosophers and other scholars reflecting on the science policy interface but also for assessment practitioners climate policy makers and economists The science policy approach developed in this volume has already influenced the recent socio economic IPCC assessment *YSEC Yearbook of Socio-Economic Constitutions 2022* Eva Storskrubb, 2023-10-12 Funding of justice has significant consequences for the enforcement of rights and impacts directly on access to justice and the right to a fair trial as constitutional rights Access to justice in turn essentially impacts on the effective enjoyment of any other constitutional right since having the actual means to access a court in case of a potential breach strengthens that right Public funding such as legal aid has come under pressure due to the reality of financial austerity measures and the tightening public budgets in many countries This has contributed to privatization and marketisation of funding in ever more jurisdictions Private forms of funding include inter alia litigation insurance third party litigation finance and crowdfunding as well as different forms of assigning or selling claims As public funding is in decline and as market liberalization in the field of justice increases crucial questions related to the rule of law access to justice and social and economic development in the intersection between states citizens and business are raised For example potential questions of conflict of interest and how to ensure a basic level of equality of access to funding whilst at the same time protecting market freedom Some of the contributions in the volume deal with the consequences of privatization of funding of justice on access to justice from a general principled and theoretical perspective Other contributions deal with specific regulatory developments or issues at the EU level alternatively at the local level in specific jurisdictions Further contributions deal with crucial issues of funding of justice in environmental matters that are increasingly relevant and topical in practice
