## **Reporting Science The Case Of Aggression:**

Reporting Science Jeffrey H. Goldstein, 2024-08-08 Originally published in 1986 this is a nonscientific book about science It is concerned with the relationships among social science journalism public information and public policy Reporting Science The Case of Aggression explores some of the obstacles and suggestions for overcoming them to the mutual exchange of information when that information concerns research and theory on a sensitive issue in this instance violence Among the issues explored are What is the social scientist's responsibility if any for the public dissemination of his or her work How accurate are mass media reports of scientific research on such socially sensitive issues as violence and the effects of mass media portrayals of sex and aggression How do science journalists select particular pieces of research for study How can interested scientists more effectively present their work to the public What are the ethical issues involved in greater scientist-journalist cooperation

**Communicating Science** Eileen Scanlon, 1999 Communicating Science is an ideal introduction for anyone who wants to learn about the relationship between science the media and the public Television Violence and Public Policy James Hamilton, 2000-08-16 Discusses why and how we should rate the content of television programs for violence

**Violence and Terror in the Mass Media** George Gerbner, Nancy Signorielli, 1988-01-13 Originally a Unesco project this annotated bibliography results from more than 4 600 requests to media scholars and researchers for research reports publications and other information relating to violence and terrorism Although there is an international cast to the materials most are from the U S Even though violence and terrorism permeate our myths and legends there is increasing concern with their effect on viewers This bibliography is particularly timely with entries through spring 1987 The sections of the work mass media content mass media effects pornography and the media terrorism and the media give a better idea of the work's scope than does the title Choice The annotations are clearly written succinctly descriptive of the original work's research with test groups and evaluative of research results Reference Books Bulletin This bibliography focuses on research and scholarly works relating to violence and terror Consisting primarily of articles published in scholarly journals and books this comprehensive work examines major topics such as violence and mass media content violence and mass media effects terrorism and the mass media and pornography Also included are articles from popular journals reports published by the United States and other governments conference papers and dissertations Each entry consists of the bibliographic citation and a short abstract many of the sources include studies from other countries where relevant research has been conducted The compilers' introduction provides a clear definition of violence and terrorism as they are dealt with in this volume and offers an interesting overview of various aspects of the subject

**Communicating Uncertainty** Sharon M. Friedman, Sharon Dunwoody, Carol L. Rogers, 2012-10-12 Exploring the interactions that swirl around scientific uncertainty and its coverage by the mass media this volume breaks new ground by looking at these issues from three different perspectives that of communication scholars who have studied uncertainty in a number of ways that of science journalists

who have covered these issues and that of scientists who have been actively involved in researching uncertain science and talking to reporters about it In particular *Communicating Uncertainty* examines how well the mass media convey to the public the complexities ambiguities and controversies that are part of scientific uncertainty In addition to its new approach to scientific uncertainty and mass media interactions this book distinguishes itself in the quality of work it assembles by some of the best known science communication scholars in the world This volume continues the exploration of interactions between scientists and journalists that the three coeditors first documented in their highly successful volume *Scientists and Journalists Reporting Science as News* which was used for many years as a text in science journalism courses around the world
