Repositioning Feminism And Education:

Repositioning Feminism & Education Janice Jipson, 1995-08-22 This book presents testimony of feminisms in process The accounts are filled with tensions not least an uneasiness with feminism itself and the question of what exactly it means to be a feminist in education in the contemporary world It is their respect for their own differences and the honesty with which they write that makes this such a rich text From the Foreword by Kathleen Weiler Educators committed to social change face the common dilemma of how to take up the work of transformation without reinscribing systems of domination The struggle with the concept of imposition is central to the emergence of many educators identities and provides a site for exploring the complex relationship between power knowledge and teacher identity This book chronicles the collaborative efforts of five diverse women educators Native American European Jewish American rural midwestern working class to grapple with the tensions of taking up a political position while honoring the cultural social and historical context of others Their dialogue across feminist critical and postmodern theories and practices explores the process of fusing theory with political work in the world What emerges is the continual repositioning and disruption of taken for granted meanings as central to enhancing emancipatory education

Feminisms and Educational Research Wendy R. Kohli, Nicholas C. Burbules, 2011-12-29 Feminist theory has come a long way from its nascent beginnings no longer can it be classified as liberal socialist or radical It has shaped and evolved to take on multiple meanings and forms each distinct in its own perspective and theory In *Feminisms and Educational Research* the authors explore the various forms of feminisms tracing their history and their relation to gendered knowledge and identity Unlike other books on feminism the authors do not attempt to push that a particular theory is more correct than another but rather they give a complete overview of each of the forms of feminism The authors then couple the philosophical and theoretical ideas of western feminisms with the aims and conduct of educational research exploring how they interact and influence each other Focusing on more recent feminists both in education and related disciplines the book highlights illustrative examples from research to form a basis of understanding how the different feminisms have changed education

Wendy R. Kohli, Nicholas C. Burbules, 2012-07-01 The latest book in the Philosophy Theory and Educational Research series introduces the main philosophical and theoretical ideas of recent western feminisms as it applies to educational research Unlike other books that focus on these topics the authors present a balanced overview of the issues instead of pushing a particular perspective

Resources in Education, 1997 Women's Studies Quarterly (28: 3-4) Nancy Hoffman, Nitza Hidalgo, Ellen Silber, 2000 Groundbreaking volume provides positive strategies for eliminating gender bias in middle school and high school classrooms **Feminist Critical Policy Analysis: A perspective from primary and secondary schooling** Catherine Marshall, 1997 *Under the Sign of Hope* Leslie Rebecca Bloom, 1998-01-01 Under the Sign of Hope examines the practices of life history ethnographic fieldwork and interpretation of women's narratives ultimately asserting the importance of self reflexivity for feminist methodology Bloom takes the stance that what is critical to

research is an ability to analyze the complexities of researcher participant relationships and the limitations of narrative interpretation *Postmodern Philosophical Critique and the Pursuit of Knowledge in Higher Education* Roger Mourad, 1997-08-30 This work explores the philosophical positions of five postmodern thinkers Lyotard Rorty Schrag Foucault and Derrida to show how their critiques imply that scholars are unduly limited by the belief that inquiry is fundamentally about gaining knowledge of phenomena that are assumed to exist prior to and independent of inquiry and to persist essentially unchanged by inquiry The author argues that there are good reasons why this constraint is both unnecessary and undesirable and he resituates the disciplines within a more flexible foundation that would expand what counts as legitimate inquiry This foundation would emphasize the inquirer as a cause of reality not just an observer who aims to accurately describe and explain phenomena Mourad proposes an intellectual and organizational form which he calls post disciplinary research programs These dynamic programs would be composed of scholars from diverse disciplines who collaborate to juxtapose disparate disciplinary concepts in order to create contexts for post disciplinary inquiries
