*Feminist Posthumanism in Contemporary Science Fiction Film and Media* Julia A. Empey, Russell J.A. Kilbourn, 2023-08-24 Feminist Posthumanism in Contemporary Science Fiction Film and Media From Annihilation to High Life and Beyond places posthumanism and feminist

theory into dialogue with contemporary science fiction film and media This essay collection is intimately invested in the debates around the posthuman and the critical posthumanities within a feminist critical theoretical framework In this posthumanist light science fiction as a genre allows for new imaginings of human technological relations while it can also be the site of a critique of human exceptionalism and essentialism In this way science fiction affords unique opportunities for the scholarly investigation of the relevance and relative applicability of specific posthumanist themes and questions in a particularly rich and wide ranging popular cultural field of production One of the reasons for this suitability is the genre's historically longstanding relationship with the critical investigation of gender specifically the position and relative empowerment of women The original analyses presented here pay close attention to audiovisual style including game mechanics facilitating the critical interrogation of the issues and questions around posthumanism Where typically the mention of SF in the posthumanist context calls to mind a whole set of often clichéd tropes the cyborg technologically augmented bodies AI subjectivities etc this volume's thirteen chapters analyze specific examples of contemporary SF cinema that engage in meaningful ways with the burgeoning field of critical posthumanism and that utilize such films to interrogate posthumanist and feminist as well as humanistic ideas

*Cyborg Selves* Jeanine Thweatt-Bates, 2016-05-13 What is the posthuman Is becoming posthuman inevitable something which will happen to us or something we will do to ourselves Why do some long for it while others fearfully reject it These questions underscore the fact that the posthuman is a name for the unknown future and therefore not a single idea but a jumble of competing visions some of which may be exciting some of which may be frightening and which is which depends on who you are and what you desire to be This book aims to clarify current theological and philosophical dialogue on the posthuman by arguing that theologians must pay attention to which form of the posthuman they are engaging and to demonstrate that a posthuman theology is not only possible but desirable when the vision of the posthuman is one which coincides with a theological vision of the human

**Representations of Technology in Science Fiction for Young People** Noga Applebaum, 2009-09-10 In this new book Noga Applebaum surveys science fiction novels published for children and young adults from 1980 to the present exposing the anti technological bias existing within a genre often associated with the celebration of technology Applebaum argues that perceptions of technology as a corrupting force particularly in relation to its use by young people are a manifestation of the enduring allure of the myth of childhood innocence and result in young adult fiction that endorses a technophobic agenda This agenda is a form of resistance to the changing face of childhood and technology's contribution to this change Further Applebaum contends that technophobic literature disempowers its young readers by implying that the technologies of the future are inherently dangerous while it neglects to acknowledge children's complex yet pleasurable interactions with technology today The study looks at works by well known authors including M T Anderson Monica Hughes Lois Lowry Garth Nix and Philip Reeve and explores topics such as ecology cloning the impact of technology on narrative structure and the adult child hierarchy While focusing on the popular genre of science fiction as a useful case study Applebaum demonstrates that negative attitudes toward technology exist within children's literature in general making the book of considerable interest to scholars of both science fiction and children's literature
