Reproductive Effects of Chemical, Physical, and Biologic Agents Anthony R. Scialli, Armand Lione, G. K. Boyle Padgett, 1995 Developmental and Reproductive Toxicology Ronald D. Hood, Ronald D Hood, 2005-08-30 Completely revised and updated Developmental and Reproductive Toxicology A Practical Approach Second Edition draws together valuable information typically scattered throughout the literature plus some not previously published into one complete resource In addition to the traditional aspects of developmental toxicity testing the book covers e *Evaluating Chemical and Other Agent Exposures for Reproductive and Developmental Toxicity* National Research Council, Commission on Life Sciences, Board on Environmental Studies and Toxicology, Committee on Toxicology, Subcommittee on Reproductive and Developmental Toxicology, 2001-04-13 The United States Navy has been concerned for some time with protecting its military and civilian personnel from reproductive and developmental hazards in the workplace As part of its efforts to reduce or eliminate exposure of Naval personnel and their families to reproductive and developmental toxicants the Navy requested that the National Research Council NRC recommend an approach that can be used to evaluate chemicals and physical agents for their potential to cause reproductive and developmental toxicity The NRC assigned this project to the Committee on Toxicology which convened the Subcommittee on Reproductive and Developmental Toxicology to prepare this report In this report the subcommittee recommends an approach for evaluating agents for potential reproductive and developmental toxicity and demonstrates how that approach can be used by the Navy This report has been reviewed in draft form by individuals chosen for their diverse perspectives and technical expertise in accordance with procedures approved by the NRC s Report Review Committee The purpose of this independent review is to provide candid and critical comments that will assist the institution in making its published report as sound as possible and to ensure that the report meets institutional standards for objectivity evidence and responsiveness to the study charge The review comments and draft manuscript remain confidential to protect the integrity of the deliberative process We wish to thank the following individuals for their review of this report James Chen National Center for Toxicological Research George Daston Procter and Gamble Company Jerry Heindel National Institute of Environmental Health Sciences Grace Lemasters University of Cincinnati and John Young National Center for Toxicological Research **Chemically Induced Birth Defects** James Schardein, 2000-04-11 This thoroughly revised and updated reference addresses the drugs and chemicals causing malformations and congenital anomalies in the human fetus comprehensively reviewing experimental studies in animals and clinical data on human development primarily in the organogenesis period Addressing current public health concerns over teratogens Chemical

Haschek and Rousseaux's Handbook of Toxicologic

Pathology Wanda M. Haschek, Colin G. Rousseaux, Matthew A. Wallig, Brad Bolon, Ricardo Ochoa, 2001-10-16 A comprehensive understanding of toxicologic pathology is essential for those in industry academia and government who make decisions concerning the safety and efficacy of drugs and chemicals Toxicologic pathology relies heavily on the fields of both toxicology and pathology which are well covered individually in various texts and references however there are few texts that address the field of toxicologic pathology The Handbook of Toxicologic Pathology fills this void and is thus essential for all health professionals within or interacting with the field of toxicologic pathology This two volume set provides the reader with a single reference for toxicologic pathology In volume I the book covers toxicologic pathology in its basic aspects including its definition the basic biochemical and morphologic mechanisms underlying the discipline the basic practice of toxicologic pathology including special techniques and issues essential to the understanding of toxicologic pathology such as risk assessment experimental design and statistical analysis Next the book moves to specific issues affecting the practice toxicologic pathology including issues such as knowledge management regulatory affairs and writing pathology reports Finally Volume I closes with several chapters that deal with specific classes of environmental toxicants such as endocrine disruptors and heavy metals Volume II addresses the toxicologic pathology in a thoroughly standardized systems manner addressing the basic structure and function of a particular organ system its response to toxic injury mechanisms of injury and methods of evaluation of such injury Key Features Easy to find up to date reference information Graphic and photographic plates Current hot topics and anticipated changes in toxicologic pathology Standardized chapter format Topics that are addressed in both a broad and deep manner resulting in a stand alone text Added coverage of important environmental
