The Oxford Handbook of the History of Eugenics Alison Bashford, Philippa Levine, 2010-08-03 Eugenic thought and practice swept the world from the late nineteenth to the mid twentieth century in a remarkable transnational phenomenon Eugenics informed social and scientific policy across the political spectrum from liberal welfare measures in emerging social democratic states to feminist ambitions for birth control from public health campaigns to totalitarian dreams of the perfectibility of man This book dispels for uninitiated readers the automatic and apparently exclusive link between eugenics and the Holocaust It is the first world history of eugenics and an indispensable core text for both teaching and research Eugenics has accumulated generations of interest as experts attempted to connect biology human capacity and policy In the past and the present eugenics speaks to questions of race class gender and sex evolution governance nationalism disability and the social implications of science In the current climate in which the human genome project stem cell research and new reproductive technologies have proven so controversial the history of eugenics has much to teach us about the relationship between scientific research technology and human ethical decision making

The Oxford Encyclopedia of Women in World History Bonnie G. Smith, 2008 The Encyclopedia of Women in World History captures the experiences of women throughout world history in a comprehensive 4 volume work Although there has been extensive research on women in history by region no text or reference work has comprehensively covered the role women have played throughout world history The past thirty years have seen an explosion of research and effort to present the experiences and contributions of women not only in the Western world but across the globe Historians have investigated women's daily lives in virtually every region and have researched the leadership roles women have filled across time and region They have found and demonstrated that there is virtually no historical social or demographic change in which women have not been involved and by which their lives have not been affected The Oxford Encyclopedia of Women in World History benefits greatly from these efforts and experiences and illuminates how women worldwide have influenced and been influenced by these historical social and demographic changes The Encyclopedia contains over 1 250 signed articles arranged in an A Z format for ease of use The entries cover six main areas biographies geography and history comparative culture and society including adoption abortion performing arts organizations and movements such as the Egyptian Uprising and the Paris Commune women's and gender studies and topics in world history that include slave trade globalization and disease With its rich and insightful entries by leading scholars and experts this reference work is sure to be a valued go to resource for scholars college and high

school students and general readers alike Globalizing Family Values Doris Buss,2003 With little fanfare and profound effect family values have gone global and the influence of the Christian Right is increasingly felt internationally This is the first comprehensive study of the Christian Right s global reach and its impact on international law and politics Doris Buss and Didi Herman explore tensions contradictions victories and defeats for the Christian Right s global project particularly in the United Nations The authors consult Christian Right materials from pamphlets to novels conduct interviews with people in the movement and provide a firsthand account of the World Congress of Families II in 1999 a key event in formulating Christian Right global policy and strategy The result is a detailed look at a new global player its campaigns against women s rights population policy and gay and lesbian rights its efforts to build an alliance of orthodox faiths with non Christians and the tensions and strains as it seeks to negotiate a role for conservative Christianity in a changing global order **Killing for Life** Carol Mason,2018-08-06 How can those who seek to protect the right to life defend assassination in the name of saving lives Carol Mason investigates this seeming paradox by examining pro life literature both archival material and writings from the front lines of the conflict Her analysis reveals the apocalyptic thread that is the ideological link between established anti abortion organizations and the more shadowy pro life terrorists who subject clinic workers to anthrax scares bombs and bullets The portrayal of abortion as America s Armageddon began in the 1960s In the 1970s Mason says Christian politics and the post Vietnam paramilitary culture popularized the idea that legal abortion is a harbinger of apocalypse By the 1990s Mason asserts even the movement s mainstream had taken up the call narrating abortion as an apocalyptic battle between so called Christian and anti Christian forces Pro life violence of the 1990s signaled a move away from protest and toward retribution she writes Pro life retribution is seen as a way to restore the order of God In this light the phenomenon of killing for life is revealed not as an oxymoron but as a logical consistency and a political manifestation of religious retribution Mason s scrutiny of primary sources direct mail internal memoranda personal letters underground manuals and pro life films magazines and novels draws attention to elements of pro life millennialism Killing for Life is a powerful indictment of pro life ideology as a coherent mass produced narrative that does not merely condone violence but anticipates it as part of God s plan A History of Family Planning in Twentieth-century Peru Raúl Necochea López,2014 History of Family Planning in Twentieth Century Peru Feminism and the Legacy of Revolution Karen Kampwirth,2004 Drawing on more than 200 interviews with women in Nicaragua El Salvador and the Mexican state of Chiapas Karen Kampwirth tells the story of how the guerilla wars led to the rise of feminism why certain women became feminists and what sorts of feminist movements they built **The Environmental Impact of Overpopulation** Trevor Hedberg,2020-04-14 This book examines the link between population growth and environmental impact and explores the implications of this connection for the ethics of procreation In light of climate change species extinctions and other looming environmental crises Trevor Hedberg argues that we have a collective moral duty to halt population growth to prevent environmental harms from escalating This book assesses a variety

of policies that could help us meet this moral duty confronts the conflict between protecting the welfare of future people and upholding procreative freedom evaluates the ethical dimensions of individual procreative decisions and sketches the implications of population growth for issues like abortion and immigration It is not a book of tidy solutions Hedberg highlights some scenarios where nothing we can do will enable us to avoid treating some people unjustly In such scenarios the overall objective is to determine which of our available options will minimize the injustice that occurs This book will be of great interest to those studying environmental ethics environmental policy climate change sustainability and population policy Chapter 5 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license

Divided Planet Tom Athanasiou, 1998 Global warming Soil loss Freshwater scarcity Extinction Overconsumption Toxic waste production Habitat and biodiversity erosion These are only a few of our most urgent ecological crises There are others as well and despite the popularity of good news environmentalism few of them are going away In this wide ranging grimly entertaining commentary on the environmental debate Tom Athanasiou finds that these problems are exacerbated if not caused by the

planet's division into warring camps of rich and poor Writing with passionate intelligence Athanasiou proposes a simple yet radical solution stop indulging easy calming fantasies in which everything seems to change but nothing important changes at all Instead do what needs to be done now while there is still time and goodwill The bottom line he concludes is that there will be no sustainability without a large measure of justice Without profound political and economic change he argues there can be no effective global environmental action no real effort to save the planet Religion and Economic Justice Michael Zweig, 2009 Original essays by distinguished contributors from economics religious ethics and biblical studies *Southern Exposure* Barbara P. Thomas-Slayter, 2003 Calling increasing poverty and inequality in the Global South sometimes known as the third world as among our most urgent problems today Thomas Slayter seeks to explore the problems of globalization from the perspective of ordinary non elite people of the South After offering a brief history of imperialism and colonialism she presents chapters looking at issues of globalization and the nation state human rights and international refugees the role of international economic organizations in creating inequality the links between population the environment and development food security and global politics and the rise of anti globalization movements Feminism, Multiculturalism, and the Media Angharad N. launched a one child campaign This campaign which cut against the grain of rural reforms and childbearing preferences was the culmination of a decade long effort to subject reproduction to state planning Tyrene White here analyzes this great social engineering experiment drawing on more than twenty years of research including fieldwork and interviews with a wide range of family planning officials and rural cadres White explores the origins of China s birth planning approach to population control the implementation of the campaign in rural China strategies of resistance employed by villagers and policy consequences among them infanticide infant abandonment and sex ratio imbalances She also provides the first extensive political analysis of China s massive 1983 sterilization drive The birth planning project was the last and longest of the great mobilization campaigns surviving long after the Deng regime had officially abandoned mass campaigns as instruments of political control Arguing that the campaign had become an indispensable institution of rural governance White shows how the one child campaign mimicked the organizational style and rhythms both of political campaigns and economic production campaigns Against the backdrop of unfolding rural reforms only the campaign method could override obstacles to rural enforcement As reform gradually eroded and transformed patterns of power and authority however even campaigns grew increasingly ineffective paving the way for long overdue reform of the birth planning program Women, Medicine, Ethics and the Law Susan Sherwin, Barbara Parish, 2020-09-10 This title was first published in 2002 A collection of articles focused on women within a general study of medicine ethics and the law Topics covered include areas where the institutions of medicine ethics and the law intersect in women s reproductive and sexual lives the impact of legal policies and dominant ethical beliefs on many aspects of women s health and the health practices and policies of bioethics and health law The editors recognise that it is important not to lose sight of social differences other than gender such as race ethnicity class age sexuality religion level of physical and mental ability and family relationships In their approach they seek to consider the lives and experiences of women as primary Hence they focus on the question of how women s encounters with the health care system are structured by gender and other socially significant dimensions of their lives rather than the question of how women differ from the male norm *Feminism and International Relations* Sandra Whitworth, 2016-01-18 This book provides a critique of the discipline of international relations from a feminist perspective The critique is developed first theoretically Then the author examines both feminist theories and theories of international relations with a view to developing an approach to world politics which incorporates an analysis of gender and gender relations The critique is secondly developed through the application of the notion of gender to the activities of two international institutions the International Parenthood Federation and the International Labour Organisation **"Nagging" Questions** Dana E. Bushnell, 1995 In this anthology of new and classic articles fifteen noted feminist philosophers explore contemporary ethical issues that uniquely affect the lives of women These issues in applied ethics include autonomy responsibility sexual harassment women in the military new technologies for reproduction surrogate motherhood pornography abortion

nonfeminist women and others Whether generated by old social standards or intensified by recent technology these dilemmas all pose persistent nagging questions that cry out for answers Unlike other anthologies in feminist ethics this book encourages critical thinking about concrete contemporary social and moral issues Each engaging clearly written article is followed by discussion questions making the book useful for students of women s studies philosophy sociology and political science
