Science Rick Szostak, 2007-11-03 Classification is the essential first step in science The study of science as well as the practice of science will thus benefit from a detailed classification of different types of science In this book science defined broadly to include the social sciences and humanities is first unpacked into its constituent elements the phenomena studied the data used the theories employed the methods applied and the practices of scientists These five elements are then classified in turn Notably the classifications of both theory types and methods allow the key strengths and weaknesses of different theories and methods to be readily discerned and compared Connections across classifications are explored should certain theories or phenomena be investigated only with certain methods What is the proper function and form of scientific paradigms Are certain common errors and biases in scientific practice associated with particular phenomena data theories or methods The classifications point to several ways of improving both specialized and interdisciplinary research and teaching and especially of enhancing communication across communities of scholars The classifications also support a superior system of document classification that would allow searches by theory and method used as well as causal links investigated

Globalizing Knowledge Michael D. Kennedy, 2014-12-10 Heralding a push for higher education to adopt a more global perspective the term globalizing knowledge is today a popular catchphrase among academics and their circles The

complications and consequences of this desire for greater worldliness however are rarely considered critically In this groundbreaking cultural political sociology of knowledge and change Michael D Kennedy rearticulates questions approaches and case studies to clarify intellectuals and institutions responsibilities in a world defined by transformation and crisis Globalizing Knowledge introduces the stakes of globalizing knowledge before examining how intellectuals and their institutions and networks shape and are shaped by globalization and world historical events from 2001 through the uprisings of 2011 13 But Kennedy is not only concerned with elaborating how wisdom is maintained and transmitted he also asks how we can recognize both interconnectedness and inequalities and possibilities for more knowledgeable change within and beyond academic circles Subsequent chapters are devoted to issues of public engagement the importance of recognizing difference and the local s implication in the global and the specific ways in which knowledge images and symbols are shared globally Kennedy considers numerous case studies from historical happenings in Poland Kosova Ukraine and Afghanistan to today s energy crisis Pussy Riot the Occupy Movement and beyond to illuminate how knowledge functions and might be used to affect good in the world

Family Investments in Children's Potential Ariel Kalil, Thomas DeLeire, 2004-07-22 The papers in this volume bring together a cross disciplinary mix of researchers developmental psychologists evolutionary biologists economists anthropologists and sociologists working on the common theme of investments in children The interdisciplinary conceptual framework adopted by this collection of papers is loosely built around the idea that there are two broad dimensions of parental investments These include resources e g income wealth on the one hand and behaviors e g parental instrumental support and parental activities that promote warmth socialization and cognitive stimulation on the other Believing that parental investments yield a return in improved child and young adult outcomes the papers discuss how parents differ in terms of the resources they have available to invest the choices parents make the behaviors they engage in and relevant policy and program interventions More specifically core questions addressed by the authors include Why do some families invest while others do not and are differential investment patterns related to

biology economics or social factors What constitutes a successful investment portfolio How are investments measured and or characterized Are different investments interchangeable compensating or off setting Given a set of resources why are some families able to make more effective investments in child outcomes How well do these investments affect outcomes for children and for these children as young adults Can interventions or public policies help families build assets or become better investors in their children s potential Developing a better understanding of what investments matter when they matter and how resources can be successfully invested in children s potential is key to shaping efficient interventions and social policies Knowledge of how parents invest and what strategies are effective may help policies which seek to further empower and enable parental involvement and choice for their children

The Next Upsurge Dan Clawson,2003 The U S labor movement may be on the verge of massive growth according to Dan Clawson He argues that unions don t grow slowly and incrementally but rather in bursts Even if the AFL CIO could organize twice as many members per year as it now does it would take thirty years to return to the levels of union membership that existed when Ronald Reagan was elected president In contrast labor membership more than quadrupled in the years from 1934 to 1945 For there to be a new upsurge Clawson asserts labor must fuse with social movements concerned with race gender and global justice The new forms may create a labor movement that breaks down the boundaries between union and community or between work and family issues Clawson finds that this is already happening in some parts of the labor movement labor has endorsed global justice and opposed war in Iraq student activists combat sweatshops unions struggle for immigrant rights Innovative campaigns of this sort Clawson shows create new strategies determined by workers rather than union organizers that redefine the very meaning of the labor movement The Next Upsurge presents a range of examples from attempts to replace macho unions with more feminist models to campaigns linking labor and community issues and attempts to establish cross border solidarity and a living wage
