Watanabe,2021-01-11 Telling stories that sounds innocuous enough But for the first chronicle in the Japanese vernacular A Tale of Flowering Fortunes Eiga monogatari there was more to worry about than a good yarn The health of the community was at stake Flowering Tales is the first extensive literary study of this historical tale which covers about 150 years of births deaths and happenings in late Heian society a golden age of court literature in women s hands Takeshi Watanabe contends that the blossoming of tales marked by The Tale of Genji inspired Eiga s new affective history an exorcism of embittered spirits whose stories needed to be retold to ensure peace Tracing the narrative arcs of politically marginalized figures Watanabe shows how Eiga s female authors adapted the discourse and strategies of The Tale of Genji to rechannel wayward ghosts into the community through genealogies that relied not on blood but on literary resonances These reverberations highlighted through comparisons to contemporaneous accounts in courtiers journals echo through shared details of funerary practices political life and characterization Flowering Tales reanimates these eleventh century voices to trouble conceptions of history how it ought to be recounted who got to record it and why remembering mattered Seeing Color in Classical Art

Jennifer M. S. Stager,2022-12-15 The remains of ancient Mediterranean art and architecture that have survived over the centuries present the modern viewer with images of white the color of the stone often used for sculpture Antiquarian debates and recent scholarship however have challenged this aspect of ancient sculpture There is now a consensus that sculpture produced in the ancient Mediterranean world as well as art objects in other media were in fact polychromatic Color has consequently become one of the most important issues in the study of classical art Jennifer Stager s landmark book makes a

vital contribution to this discussion Analyzing the dyes pigments stones earth and metals found in ancient art works along with the language that writers in antiquity used to describe color she examines the traces of color in a variety of media Stager also discusses the significance of a reception history that has emphasized whiteness revealing how ancient artistic practice and ancient philosophies of color significantly influenced one another Plumbing Nadir Lahiji, Daniel S. Friedman, 1997 One of the fundamental tenets of modernism was its image of hygiene its ideal of bringing cleanliness and order to the great unwashed as evident in Adolf Loos's 1898 article Plumbers Using Loos as a point of departure the essays in this collection examine architecture through the multiple meanings inherent in plumbing from the pipes of modern hygiene to the plumb line of the right angle to Marcel Duchamp's Ready made urinal *Nanomedicine, Volume IIA* Robert A. **Protein Targeting Protocols** Roger A. Clegg,2008-02-04 It is by no means a revelation that proteins are not uniformly distributed throughout the cell As a result the idea that protein molecules because of the specificity with which they can engage in interactions with other proteins may be aimed via these interactions at a restricted target is a fundamental one in contemporary molecular life sciences The target may be variously conceived as a specific molecule a group of molecules a structure or a more generic type of intracellular environment Because the concept of protein targeting is intuitive rather than explicitly defined it has been variously used by different groups of researchers in cell biology biochemistry and molecular biology For those working in the field of intracellular signaling an influential introduction to the topic was the seminal article by Hubbard Cohen TIBS 1993 18 172 177 which was based on the work of Cohen's laboratory on protein phosphatases Subsequently the ideas that they discussed have been further developed and extended by many workers to other key intermediaries in intracellular signaling including protein kinases and a great variety of modulator and adaptor proteins
