Wild Adventures of the New Aviators Brian

Milton, 2024-07-30. A collection of thrilling excursions from aviation including paragliding, hang gliding, paramotoring, and micro-lighting. Soaring over forest fires, a moonlight New Year's Eve flight over the Pennines, bungee jumping from a paraglider as a birthday celebration, jumping off Mount Everest, or numerous several hundred mile flights over open country and on different continents. This book covering many exhilarating and enthralling stories from New Aviation including paragliding, hang gliding, paramotoring, and micro-lighting has them all. There is even the story of a pilot using flexwings to teach geese how to migrate and of a marriage proposal at 500 feet. The challenges explored by the renowned New Aviation expert Brian Milton include Rich Pfeiffer's legal charges of assault with a deadly weapon for flying a hang glider over California's Rose Bowl, American College Football competition, or Judy Leden's balloon drop from 40,000 feet over Jordan with Israel on one side and Saudi Arabia on the other, despite her eyes being frozen shut. Along with this latter story, the author also discusses how women overcame prejudice and scorn to take on the men in the deathly arid wastes of Owens Valley and the ways in which eagles and vultures, and sometimes crows, reacted violently to humans flying in their air and at their speed. The author describes the return to competitions in which the original British innovators lost their dominant status and how new champions emerged. A chapter is also devoted entirely to the tragedies that have befallen some pilots. This includes a chilling account of the Great Italian Killer Storm of 1989 when six top pilots lost their lives in just one day. As well as relating the dramatic stories about those that died, the author explains why, despite the risks, the New Aviators keep flying. The final story is about the Beau Ideal, the great Swiss pilot Didier Favre Vagabond of the skies, who traveled 111,111 kilometres from Monaco to Slovenia. Brian Milton also explains how the ultimate ambition of the best flyers is to learn how to migrate using only the power of the wind and the sun. The author concludes this book by exploring what the future might hold for the various forms of New Aviation and those who enjoy the thrills that they create.
