Future: All That Matters Ziauddin Sardar, 2013-10-25 In *Future All That Matters* Ziauddin Sardar shows that thinking and speculating about the future has always been a part of human history but exploring the futures in a systematic and scientific way is a recent phenomenon What is known variously as futures studies futurology or foresight only emerged as a discipline during the last few decades The study of the future however is not only about predicting or forecasting the future which is always a perilous exercise It is also about appreciating the potentials and possibilities as well as risks and threats lurking over the horizon It can enable us both to avoid the dangers as well as shape a viable and desirable future This book explores the exciting field of futures studies and shows how knowledge of the future is acquired and put into practice We examine various methods for studying the future with the emphasis not so much on predicting specific events but on delineating alternative paths to the future We look at some celebrated readings of the future as well as case studies where exploration of the future has been used to shape policy and planning in businesses and communities international organisations and regional institutions and interest and lobby groups Finally the book suggests why and how in an increasingly complex uncertain and diverse world the study of the future can help people recover their agency and help them to create the world in which they wish to live This accessible and readable book will appeal both to students and general readers giving a fascinating introduction to thinking about the future and what matters most about it

Foundations of Futures Studies Wendell Bell, 2017-07-05 Futures studies is a new field of inquiry involving systematic and explicit thinking about alternative futures It aims to demystify the future make

possibilities for the future more known to us and increase human control over the future This book summarizes and expands contributions of futurists to the envisioning power and well being of humanity Bell brings together futurist intellectual tools describing and explaining not only the methods but also the nature concepts theories and exemplars of the field Foundations of Futures Studies fulfills Bell s five main purposes for writing this two volume effort 1 to show that futures studies like other fields from anthropology to zoology exists as an identifiable sphere of intellectual activity 2 to create a teaching instrument that can be used as a basic text for core courses in futures studies 3 to futurize the thinking of specialists in other disciplines 4 to contribute to the further development and improvement of futures studies and 5 to provide tools to empower both ordinary people and leaders to act in ways that create better futures for themselves and their societies Bell maintains that despite its sometimes doomsday rhetorical style and widespread use by special interests futures studies offers hope for the future of humanity and concrete ways of realizing that hope in the real world of our everyday lives It will appeal to all

The Future Jennifer M. Gidley, 2017-03-13 From the beginning of time humans have been driven by both a fear of the unknown and a curiosity to know We have always yearned to know what lies ahead whether threat or safety scarcity or abundance Throughout human history our forebears tried to create certainty in the unknown by seeking to influence outcomes with sacrifices to gods preparing for the unexpected with advice from oracles and by reading the stars through astrology As scientific methods improve and computer technology develops we become ever more confident of our capacity to predict and quantify the future by accumulating and interpreting patterns form the past yet the truth is there is still no certainty to be had In this Very Short Introduction Jennifer Gidley considers some of our most burning questions What is the future Is the future a time yet to come Or is it a utopian place Does the future have a history Is there only one future or are

there many possible futures She asks if the future can ever be truly predicted or if we create our own futures both hoped for and feared by our thoughts feelings and actions and concludes by analysing how we can learn to study the future ABOUT THE SERIES The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area These pocket sized books are the perfect way to get ahead in a new subject quickly Our expert authors combine facts analysis perspective new ideas and enthusiasm to make interesting and challenging topics highly readable *The Palgrave International Handbook of Action Research* Lonnie L. Dunmire, 2023 The Great Nation of Futurity examines the rhetoric of American exceptionalism the idea that the United States is an exemplary nation with a unique divinely sanctioned role within Cold War foreign policy discourse Taking a discourse analytic approach Patricia L. Dunmire focuses specifically on how images and visions of the future within exceptionalist rhetoric are used to promote and endorse the nation's foreign policy during the Cold War *Edutopias*, 2006-01-01 Education has always been part of the search for the ideal society and therefore an important part of the utopian tradition in Western culture politics and literature Education has often served to define the ideal society or to provide the principal means of creating it This unique collection of essays by well known scholars from around the world examines the role of edutopias in the utopian tradition examining its sources and sites as a means for understanding the aims and purposes of education for realizing its societal value and for criticizing its present economic technological and organizational modes These essays will stimulate new thinking in ways that impinge on both theoretical and practical questions as well as offering the reader a series of reminders of the ethical and political dimensions of education and its place in helping to build good and just societies The collection is aimed at an audience of teachers and graduate students although it will also be of interest to administrators policy makers and the general public interested in utopian thinking and its relation to education *Foresight in Action* Marjolein van Asselt, Susan van 't Klooster, Philip van Notten, Livia A. Smits, 2012-06-25 Assessing the future is vital

in informing public policy decisions One of the most widespread approaches is the development of scenarios which are alternative hypothetical futures Research has indicated however that the reality of how professionals go about employing scenarios is often starkly at odds with the theory a finding that has important ramifications for how the resulting images of the future should be interpreted It also shows the need for rewriting and updating theory This book based on an intensive five year study of how experts actually go about assessing the future provides a groundbreaking examination of foresighting in action Obtained via ethnographic techniques the results lay bare for the first time the real processes by which scenarios are made It is also the first book to examine foresighting for public policy which is so often overlooked in favour of business practice From handling of discontinuity to historical determinism the analysis reveals and explains why foresight is difficult and what the major pitfalls are Each chapter ends with a toolkit of recommendations for practice The book aims to help readers to reflect on their own practices of public oriented foresight and thus to foster a deeper understanding of the key principles and challenges Ultimately this will lead to better informed decision making

Discourses of War and Peace Adam Hodges, 2013-06-18 Given the prevalence of war around the world it is vital to understand the way discourse contributes to the promotion and positioning of war as a natural or inevitable response to international problems In addition it is equally necessary to examine the way discourse impacts projects of peace which seek to displace discourses of war with alternative visions of the world This volume examines specific contexts around the world in which discourse operates in the service of war or to build alternative visions of peace Contributors who have backgrounds in linguistics anthropology rhetoric and communication studies draw upon discourse analytic and ethnographic methods to examine the discourse used by politicians and social actors in societies across the globe including the United States Canada the United Kingdom Morocco Ireland the Palestinian territories and Japan The book is divided into four sections that foreground the political effects of discourse on issues of war and peace including the way discourse is harnessed to justify war part I negotiate military deployment part II respond to armed conflict part III and promote peace part IV

Space, Time and Evaluation in Ideological Discourse Laura Filardo-Llamas, Christopher Hart, Bertie Kaal, 2017-10-02 Bringing together a body of related research which has recently developed in Critical Discourse Analysis this book is the first to address the role of perspective in socio political discourse Specifically the contributions to this volume seek to explore from a cognitive standpoint the way in which perspective functions in three dimensions space time and evaluation to enact ideology and persuasion A range of discourse genres are analysed including political discourse media discourse and songs used as political tools Starting from the contention that discourse processing relies on the same mechanisms that support our understanding and experience of space the book finds a recurrent theme in the way in which perspectival concepts like distance and focus prompted by linguistic signs feature in our discursively constructed knowledge of social and political realities By highlighting the complex nature of perspective taking in ideological discourse the volume sets the agenda for further research in this area The book will appeal

to linguists discourse analysts media scholars and political scientists and all who are interested in the relationship between language and cognition in the socio political domain This book was originally published as a special issue of Critical Discourse Studies

Projecting the Future Through Political Discourse Patricia L. Dunmire, 2011 This monograph examines the rhetorical nature and function of representations of the future in political discourse focusing on political actors use of hegemonic images of future reality to achieve their political goals It argues that a key ideological dimension of political rhetoric lies in politicians use of projections of the future to legitimate policies and actions This argument is grounded in systemic functional and critical discourse analyses of the Bush Doctrine the U S policy response to the September 11 terrorist attacks which sanctioned a preemptive military posture By focusing on the discursive construction of the future this project addresses a lacunae in critical discourse studies and calls attention to the crucial role that the discourse and practice of futurology has played in post Cold War politics and society It will be of value to scholars interested in the discourses of politics the war on terror U S national security and futurology

Wisdom, Consciousness, and the Future Thomas Lombardo, 2011-06-17 *Wisdom Consciousness and the Future* Collected Essays Thomas Lombardo Ph D Center for Future Consciousness *Wisdom Consciousness and the Future* is a profound deeply important and timely book that concerned people and change agents everywhere will want to read Cophthorne Macdonald The Wisdom Page As a college professor and teacher of psychology philosophy and the future Tom Lombardos mind has been drawn toward such questions as How will the human mind evolve in the future In fact how should the human mind evolve and improve itself What might be the standards and ideals that guide this evolution And what role does ethical development or evolution play in this process The twenty previously published articles collected together in *Wisdom Consciousness and the Future* chronicle the development of Dr Lombardos ideas on these related questions and topics and together constitute a theoretical perspective on the nature of the human mind on how to best educate and evolve the human mind in the future and how to integrate into this vision the central importance of both future consciousness as a key dimension of human consciousness and ethical character virtues True to its title three key themes emerge in this collection wisdom consciousness and the future and all three concepts tie into the authors main contribution to the field of futures studies future consciousness Numerous essays for example *Evolving Future Consciousness through the Pursuit of Virtue* and *The Evolution and Psychology of Future Consciousness* address the nature of future consciousness a term Dr Lombardo defines as the complex set of mental capacities all humans possess for imagining conceptualizing and approaching the future Aside from describing the psychological make up of future consciousness which includes emotional motivational cognitive and personal dimensions the author also explains in numerous essays such as *Developing Constructive and Creative Attitudes about the Future* how to proactively enhance ones future consciousness Other essays deal directly with consciousness and the human mind in the broadest sense as in *The Future Evolution of the Ecology of Mind* and connect this general area of inquiry with the futurist question of how

consciousness and mind might evolve in the future Dr Lombardo proposes that the progressive emergence of cosmic consciousness is the central evolutionary trajectory of the human mind Hence this book contains essays on both consciousness of the future and consciousness in the future While the discussion of consciousness and the future fascinates in its own right Dr Lombardo is a holistic and deep thinker who searches for connections among myriad philosophical topics A number of essays address the question of ethics and virtue and how such concepts connect with both future consciousness and the evolution of consciousness in the future He then expands on this theme to explore how virtue applies to the goals of higher education in essays such as Ethical Character Development and Personal and Academic Excellence In thinking through the concept of virtue and how it applies to consciousness education and the future Dr Lombardo emphasizes the one key virtue that provides the center of gravity around which all other character virtues revolve Indeed if any one concept unites the majority of essays in this collection it is wisdom In The Wisdom of Future Consciousness the author argues that wisdom is the highest expression of future consciousness and systematically describes the numerous connections between wisdom and heightened future consciousness Further according to the author wisdom is the key ideal that we should model and teach within education now and in the future This argument

Decision-Making in the Absence of Certainty , Transatlantic Radicalism Frank Jacob, Mario Keßler, 2021-04-01 The Atlantic Ocean not only connected North and South America with Europe through trade but also provided the means for an exchange of knowledge and ideas including political radicalism Socialists and anarchists would use this radical ocean to escape state prosecution in their home countries and establish radical milieus abroad However this was often a rather unorganized development and therefore the connections that existed were quite diverse The movement of individuals led to the establishment of organizational ties and the import and exchange of political publications between Europe and the Americas The main aim of this book is to show how the transatlantic networks of political radicalism evolved with regard to socialist and anarchist milieus and in particular to look at the actors within the relevant processes topics that have so far been neglected in the major histories of transnational political radicalism of the late nineteenth and early twentieth centuries Individual case studies are examined within a wider context to show how networks were actually created how they functioned and their impact on the broader history of the

radical Atlantic **Forecasting China's Future** Roger Irvine, 2015-06-26 China's future development is likely to have a huge impact on twenty first century global outcomes. It is therefore surprising that thus far so little attention has been given to comparing and evaluating expert forecasts of China's future in the post Mao era. This book presents an illuminating and comprehensive summary record of contrasting and competing expert forecasts and judgements about the major issues confronting China within four principal domains: political, economic, environmental and international. After considering the principal forecasting methods available to experts, the author comments critically on the degree of success achieved in using those methods and emphasises the confusion created by the polarisation of opinion and by the failure of many experts to accept the high degree of uncertainty that characterises most of the key issues. The book recommends a new approach based on the study of a hierarchy of critical uncertainties and on continuing analysis of opposing expert opinions about these uncertainties. It emphasises the potential for both positive and negative outcomes for these critical uncertainties and the importance of maximising the potential for positive outcomes through improved analytical and policy frameworks. Providing insights for specialists and non specialists into the most critical issues that will determine China's future direction, this book will be of particular interest to students and scholars of political, economic, environmental and international relations issues in China and Asia as well as to readers in business and government.
