legal and illegal is a major concern to government departments and clinicians throughout the world. Recently much new research has been conducted regarding global levels and patterns of drug related harm on common risk factors with other social problems e.g. mental health crime and on the effectiveness of wide range of intervention strategies. There is a need to summarise and synthesise this new knowledge for use in a range of disciplines. Preventing Harmful Substance Use offers the most comprehensive and up to date advice available on the prevention of drug and alcohol abuse. Contributors provide authoritative science based reviews of knowledge on their areas of expertise and make clear recommendations for the future of prevention policy and practice. A final section draws the work together and offers a framework for an integrated science of prevention.

Addiction in the Lives of Registered Nurses and Their Wake-Up Jolt to Recovery Carol

Stanford, 2018-10-15 In this age of increasing headlines about drug addiction and prescription drug abuse this book is a timely revelation of how the nursing profession is also impacted by substance abuse. It allows nurses who are the most trusted profession in society who have been hidden within their profession and living with substance use disorders to openly voice their personal experiences with addiction. Seven nurses detail their journey through family dynamics early use as nursing students and later career nurses as they traveled deeper and deeper into their addiction. They discuss their shame humiliation and dejection under the throes of the compelling forces of drugs and alcohol. They also describe how their family other nurses the healthcare system and society assisted them in perpetuating their deception and denial about their disease. They explain how they lied stole and cheated those around them to maintain their addiction. Each explains in detail the confrontations and the jolt and wake up call it took for them to awaken become sober and truly enter recovery. They are all candid and forthright in order to help others that are impacted by this horrific and complex disease. They each share how recovery is possible when appropriate attitudes and tools are put in place to support nurses suffering from the devastation of addiction. Their stories bring attention to the importance of intervention treatment and recovery communities within the nursing profession. Recovery is emphasized as a gift by each of these nurses. The nurses and the researcher provide suggestions and recommendations to assist the healthcare community in addressing addiction in nursing. This book reveals how recovery for nurses is a major public health benefit.
