The Local Configuration of New Research Fields Martina Merz, Philippe Sormani, 2015-10-27 This new Yearbook addresses the question of how policy place and organization are made to matter for a new research field to emerge Bringing together leading historians sociologists and organizational researchers on science and technology the volume answers this question by offering in depth case studies and comparative perspectives on multiple research fields in their nascent stage including molecular biology and materials science nanotechnology and synthetic biology The Yearbook brings to bear the lessons of constructivist ethnography and the practice turn in Science and Technology Studies STS more broadly on the qualitative comparative and critical inquiry of new research fields In doing so it offers unprecedented insights into the complex interplay of national research policies regional clusters particular research institutions and novel research practices in and for any emerging field of techno science It systematically investigates national and regional differences including the variable mobilization of such differences and probes them for organizational topicality and policy relevance

Handbook of Research on STEM Education Carla C. Johnson, Margaret J. Mohr-Schroeder, Tamara J. Moore, Lyn D. English, 2020-04-27 The Handbook of Research on STEM Education represents a groundbreaking and comprehensive synthesis of research and presentation of policy within the realm of science technology engineering and mathematics STEM education What distinguishes this Handbook from others is the nature of integration of the disciplines that is the founding premise for the work all chapters in this book speak directly to the integration of STEM rather than discussion of research within the individual content areas The Handbook of Research on STEM Education explores the most pressing areas of STEM within an international context Divided into six sections the authors cover topics including the nature of STEM STEM learning STEM pedagogy curriculum and assessment critical issues in STEM STEM teacher education and STEM policy and reform The Handbook utilizes the lens of equity and access by focusing on STEM literacy early childhood STEM learners with disabilities informal STEM socio scientific issues race related factors gender equity cultural relevancy and parental involvement Additionally discussion of STEM education policy in a variety of countries is included as well as a focus on engaging business industry and teachers in

advocacy for STEM education The Handbook s 37 chapters provide a deep and meaningful landscape of the implementation of STEM over the past two decades As such the findings that are presented within provide the reader with clear directions for future research into effective practice and supports for integrated STEM which are grounded in the literature to date

Experiments in International Benchmarking of US Research Fields Institute of Medicine, National Academy of Engineering, National Academy of Sciences, Committee on Science, Engineering, and Public Policy, 2000-02-28 How can the federal government gauge the overall health of scientific research as a whole and in its parts and determine whether national funding adequately supports national research objectives It is feasible to monitor US performance with field by field peer assessments This might be done through the establishment of independent panels consisting of researchers who work in a field individuals who work in closely related fields and research users who follow the field closely Some of these individuals should be outstanding foreign scientists in the field being examined This technique of comparative international assessments is also known as international benchmarking Experiments in International Benchmarking of U S Research Fields evaluates the feasibility and utility of the benchmarking technique In order to do this the report internationally benchmarks three fields mathematics immunology and materials science and engineering then summarizes the results of these experiments

Congress. Joint Committee on Atomic Energy, United States. Congress. Joint Committee on Atomic Energy. Subcommittee on Research and Development, 1958 **Research Fields in Physics** Institute of Physics (Great Britain), 1994-10-27 The latest edition of an established reference work for the physics community presenting comprehensive details of research and development work in physics undertaken at universities in Britain and Ireland The entry for each institution department outlines the research programmes and lists the senior staff involved Comprehensively cross referenced by a subject index this directory facilitates channels of communication between research groups and is particularly useful to overseas physicists and to those working in industrial or government research laboratories It also serves as a useful guide to postgraduate postdoctoral and sabbatical opportunities **Mechanistic Explanations in**

Physics and Beyond Brigitte Falkenburg, Gregor Schiemann, 2019-08-28 This volume offers a broad philosophical discussion on mechanical explanations Coverage ranges from historical approaches and general questions to physics and higher level sciences The contributors also consider the topics of complexity emergence and reduction Mechanistic explanations detail how certain properties of a whole stem from the causal activities of its parts This kind of explanation is in particular employed in explanatory models of the behavior of complex systems Often used in biology and neuroscience mechanistic

explanation models have been often overlooked in the philosophy of physics The authors correct this surprising neglect They trace these models back to their origins in physics The papers present a comprehensive historical methodological and problem oriented investigation The contributors also investigate the conditions for using models of mechanistic explanations in physics The last papers make the bridge from physics to economics the theory of complex systems and computer science This book will appeal to graduate students and researchers with an interest in the philosophy of science scientific explanation complex systems models of explanation in physics higher level sciences and causal mechanisms in science *Energy Research Abstracts* ,1993 *Studies on Mario Bunge's Treatise* ,2025-02-10 **Biotechnology Directory Eastern Europe** Eva-Maria Lücke,Eleonore Poetzsch,2020-10-12 No detailed description available for Biotechnology Directory Eastern Europe **Monitoring, Early Warning and Mitigation of Natural and Engineered Slopes, volume III** Wen Nie,Haijun Qiu,Afshin Asadi,2024-08-20 Natural and engineered slopes are widely distributed worldwide including mountain slopes highway slopes mine slopes reservoir dams etc These slopes could become unstable due to natural factors or human activities causing catastrophic loss of life and infrastructure destruction Therefore these slopes require constant monitoring to provide early warning and enable mitigation Advanced monitoring equipment information technology and multidisciplinary interaction theories have created new opportunities and challenges in this discipline Recently advanced monitoring devices information technologies and multidisciplinary intersection theories have contributed to the monitoring early warning and mitigation of natural and engineered slopes However effective and efficient monitoring precise early warning low cost and low time consuming remediation and reliable risk assessment remain obstacles This Research Topic aims to present the most recent innovative advancements and state of the art natural and engineered slope monitoring early warning mitigation and risk assessment Making Science Stephen Cole,1992 The sociology of science is dominated today by relativists who boldly argue that the content of science is not influenced by evidence from the empirical world but is instead socially constructed in the laboratory Making Science is the first serious critique by a sociologist of the social constructivist position Stephen Cole begins by making a distinction between two kinds of knowledge the core which consists of those contributions that have passed the test of evaluation and are universally accepted as true and important and the research frontier which is composed of all work in progress that is still under evaluation Of the thousands of scientific contributions made each year only a handful end up in the core What distinguishes those that are successful Agreeing with the constructivists Cole argues that there exists no set of rules that enables scientists to certify the validity of frontier knowledge This knowledge is underdetermined by the evidence and therefore social factors such as professional characteristics and intellectual authority can and do play a crucial role in its evaluation But Cole parts company with the constructivists when he asserts that it is impossible to understand which frontier knowledge wins a place in the core without first considering the cognitive characteristics of the contributions He concludes that although the focus of scientific research the rate of advance and

indeed the everyday making of science are influenced by social variables and processes the content of the core of science is constrained by nature In Making Science Cole shows how social variables and cognitive variables interact in the evaluation of frontier knowledge

Solid State Theory Ulrich Rössler,2013-06-29 Solid State Theory An Introduction is a textbook for graduate students of physics and material sciences Whilst covering the traditional topics of older textbooks it also takes up new developments in theoretical concepts and materials that are connected with such breakthroughs as the quantum Hall effects the high T_c superconductors and the low dimensional systems realized in solids Thus besides providing the fundamental concepts to describe the physics of the electrons and ions comprising the solid including their interactions the book casts a bridge to the experimental facts and gives the reader an excellent insight into current research fields A compilation of problems makes the book especially valuable to both students and teachers

NASA Technical Memorandum ,1990 **Laboratory Science with Space Data** Daniel Beysens,Luigi Carotenuto,Jack J.W.A. van Loon,Martin Zell,2011-09-01 For decades experiments conducted on space stations like MIR and the ISS have been gathering data in many fields of research in the natural sciences medicine and engineering The EU sponsored Ulisse Internet Portal provides metadata from space experiments of all kinds

and links to the data Complementary to the portal this book will serve as handbook listing space experiments by type of infrastructure area of research in the life and physical sciences data type what their mission was what kind of data they have collected and how one can access this data through Ulisse for further research The book will provide an overview of the wealth of space experiment data that can be used for research and will inspire academics e g those looking for topics for their PhD thesis and research departments in companies for their continued development
