## Research On Adulthood And Aging The Human Science Approach Suny Series In Aging:

**Research on Adulthood and Aging** L. Eugene Thomas, 1989-01-01 By borrowing from a wide range of disciplines such as psychology sociology anthropology psychiatry and the humanities this book gives a more human personal voice to the many experiences of aging The result is a new sort of social science research one which often reads more like literature than social science Indeed the author uses a wide variety of techniques borrowed from the humanities from hermeneutics to oral histories in addition to the more traditional social science methods **National Library of Medicine Current Catalog**

American Eldercide Margaret Morganroth Gullette, 2024-10-18 A bracing spotlight on the avoidable causes of the COVID 19 Eldercide in the United States Twenty percent of the Americans who have died of COVID since 2020 have been older and disabled adults residing in nursing homes even though they make up fewer than one percent of the US population Something about this catastrophic loss of life in government monitored facilities has never added up Until now In American Eldercide activist and scholar Margaret Morganroth Gullette investigates this tragic public health crisis with a passionate voice and razor sharp attention to detail showing us that nothing about it was inevitable By unpacking the decisions that led to discrimination against nursing home residents revealing how governments doctors and media reinforced ageist or ableist biases and collecting the previously little heard voices of the residents who survived Gullette helps us understand the workings of what she persuasively calls an eldercide Gullette argues that it was our collective indifference fueled by the heightened ageism of the COVID 19 era that prematurely killed this vulnerable population Compounding that deadly indifference is our own panic about aging and a social bias in favor of youth based decisions about lifesaving care The compassion this country failed to muster for the residents of our nursing facilities motivated Gullette to pen an act of

remembrance issuing a call for pro aging changes in policy and culture that would improve long term care for everyone

**Meaning in**

**Mid-Life Transitions** Edmund A. Sherman,Professor Edmund Sherman,1987-01-01 This book contributes to an understanding of the nature of mid life transitions and crises by focusing on the unique personal meaning of the transitional experience for the individual There is an implicit structure to the way in which such a transition is experienced by the individual and this can be made explicit by the techniques and methods of the approach outlined and illustrated in the book The value of making this structure explicit is that it enables us to understand and assess the nature and dimensions of the transition whether or not it will reach crisis proportions and to assess possible intervention strategies Meaning in Mid Life Transitions should be of interest to human service practitioners as well as teachers and students of human development and behavior It evidences an integrative approach and structural framework including a series of in depth clinical and research studies *Northeast Anthropology* ,1995 **Postformal Education** Jennifer M. Gidley,2016-08-05 This book explains why the current education model which was developed in the 19th century to meet the needs of industrial expansion is obsolete It points to the need for a new approach to education designed to prepare young people for global uncertainty accelerating change and unprecedented complexity The book offers a new educational philosophy to awaken the creative big picture and long term thinking that will help equip students to face tomorrow s challenges Inside readers will find a dialogue between adult developmental psychology research on higher stages of reasoning and today s most evolved education research and practice This dialogue reveals surprising links between play and wisdom imagination and ecology holism and love The overwhelming issues of global climate crisis growing economic disparity and the youth mental health epidemic reveal how dramatically the current education model has failed students and educators This book raises a planet wide call to deeply question how we actually think and how we must educate It articulates a postformal education philosophy as a foundation for educational futures The book will appeal to educators educational philosophers pre service teacher educators educational and developmental psychologists and educational researchers including postgraduates with an interest in transformational educational theories designed for the complexity of the 21st century This is the most compelling book on education I have read for many years It has major implications for all who are in a position to influence developments in teacher education and educational policy Gidley is one of the very rare scholars who can write intelligently and accessibly about the past present and future in education I was challenged and ultimately convinced by her contention that what masquerades as education today must be seen for what it is an anachronistic relic of the industrial past Gidley s challenge is to co evolve a radically new education All who seek to play a part must read this book Brian J Caldwell PhD Educational Transformations former Dean of Education at the University of Melbourne and Deputy Chair Australian Curriculum Assessment and Reporting Authority ACARA [Lifespan Development](#) J.
