Research Projects And Research Proposals A Guide For Scientists Seeking Funding:

Research Projects and Research Proposals Paul G. Chapin, 2004-07-19 Paul Chapin's guide to writing proposals for scientific research can be used by scientists in any discipline who submit papers to funding agencies to gain support for their research projects. A longtime program officer at the National Science Foundation, Chapin treats the proposal as one part of a larger process of planning a research project which makes it easier to write and more likely to be effective. The book differs from other guides by treating proposal writing in the larger context of project planning from an insider's perspective. Paul G. Chapin became the first director of the NSF Linguistics Program when it was established in October 1975. He continued as NSF's Program Director for Linguistics until 1999 with three interruptions: one year serving as Deputy Division Director for Behavioral and Neural Sciences, one year's detail as a staff associate to the head of the Office of Information Systems, and a year's sabbatical leave to study mathematics at George Washington University. From 1999 until his retirement in 2001, Chapin served as a senior program officer for cross disciplinary activities at the NSF. On the occasion of his retirement, the NSF presented him with the Director's Superior Accomplishment Award, and the Linguistic Society of America awarded him the first annual Victoria A. Fromkin Award for Distinguished Service to the Profession.

The Cambridge Guide to Research in Language Teaching and Learning eBook James Dean Brown, Christine Coombe, 2015-10-08 A comprehensive overview of research methods in second language teaching and learning from experts in the field. The Cambridge Guide to Research in Language Teaching and Learning covers 36 core areas of second language research, organised into four main sections: Primary Considerations, Getting Ready, Doing the Research, Research Contexts. Qualitative Communication Research Methods Thomas R. Lindlof, Bryan C. Taylor, 2011 While many volumes discuss qualitative methods only, *Qualitative Communication Research Methods* focuses on the history and diversity of their use within the communication discipline. This volume is written by for and about communication scholars. It introduces readers from any background to every step of the qualitative research process, from developing research topics and questions all the way through writing a final report. In addition to covering the scope of theories and methods currently used in qualitative communication research, this book also discusses important trends influencing the future of that research. Key features in this new edition include: A more clear and direct writing style suitable for use in both undergraduate and graduate courses. Numerous practical examples and exercises designed to reinforce student learning of concepts. A critical guide to the contexts of qualitative research. More than ever, qualitative researchers operate in institutional contexts that present new dilemmas. The book brings readers up to date on related ethical, political, and practical issues, including the influences of globalization on the design and conduct of research.

the appropriate use of recording technology in conducting fieldwork the unique challenges and opportunities related to studying multi media on line environments and ongoing innovation and controversy surrounding genres and formats of qualitative writing An integrated suite of chapters on data producing methods In addition to updated discussions of participant observation and qualitative interviewing this edition includes a new chapter on the study of material culture and documents Together these three chapters help readers to learn how fieldwork methods can successfully combine in a flexible integrated fashion Cutting edge technological developments The book informs and advises readers about the latest developments in technology for qualitative communication research This discussion focuses on how new media such as e mail texting cell phone video and blogging not only form topics of research but also the means of recording analyzing and textually representing data
