Volume II centres on the analysis and management of risk in society in international business and multinationals and globally. The acceptability of risk to an individual depends on the context whether the larger society or in for example a corporate framework. Their work clarifies the structures and processes for managing risks in the private sector and the factors that produce or impede effective decisions. The authors demonstrate that corporate culture is crucial in determining risk management. They analyse the transfer of corporate risk management systems from industrial to developing countries and how globalization is spreading and creating new kinds of risk: the combination of traditional and modern hazards presented by climate change, technology transfer and economic growth. They describe the new priorities and capacities needed to deal with these enhanced vulnerabilities around the globe. The Project Share Collection, 1976-1979 Project Share, 1979

Disaster Management in India: Challenges and Strategies Dr. R. K. Dave, 2018-02-21 This book *Disaster Management in India: Challenges and Strategies* provides a practical and realistic understanding of the evolving status of disaster management in India. The book discusses technological systems for disaster management and their real life effectiveness based upon the author's own professional experience as well as available literature including studies, reviews and audits reports. A case study of the 2001 Bhuj Earthquake conducted by the author is at the nucleus of the book and provides a clear understanding on how interdependent sub systems, social organisational infrastructure can fail during severe incidents and the consequences thereof. Lack of resources, lack of coordination and poor communication are endemic to severely damaged disaster environments like the 2001 Bhuj earthquake and are very commonly seen across the world. What is more important for the future is that new methods are being evolved that overcome the potential risks posed by such initial conditions for improving organizational performance. Lessons from the 2001 Bhuj earthquake highlighted in this book are still relevant and provide directions for well designed future interventions. The book critically examines performance status of disaster management in the post DM Act 2005 period and identifies many relevant issues and challenges including development of effective institutions for disaster risk management. At the end the book proposes intervention strategies for strengthening and improving disaster management systems keeping in mind the latest developments and best practices suited to Indian conditions. Drawing on the author's decades of experience both in the domains of disaster management and technology the book provides tips on Emergency Operations Center design and development, Media integration into DM emergency Resources Management systems development and Crowd management.
