Genre And The Invention Of The Writer Anis Bawarshi,2003-12-01 In a focused and compelling discussion Anis Bawarshi looks to genre theory for what it can contribute to a refined understanding of invention In describing what he calls the genre function he explores what is at stake for the

study and teaching of writing to imagine invention as a way that writers locate themselves via genres within various positions and activities He argues in fact that invention is a process in which writers are acted upon by genres as much as they act themselves Such an approach naturally requires the composition scholar to re place invention from the writer to the sites of action the genres in which the writer participates This move calls for a thoroughly rhetorical view of invention roughly in the tradition of Richard Young Janice Lauer and those who have followed them Instead of mastering notions of good writing Bawarshi feels that students gain more from learning how to adapt socially and rhetorically as they move from one genred site of action to the next
