Mineralogy and Geochemistry of Ruby Frederick Lin Sutherland, Khin Zaw, 2020-12-07 Ruby red corundum is a gem mineral with mineral properties gem characteristics and chemistry that are reliant on critical trace element substitutions in its aluminum oxide crystal structure Ruby has attracted scientific and economic interest It has already been studied extensively regarding its widespread global distribution and the diversity of its geological associations as revealed by exploration and exploitation Researchers are becoming increasingly aware that geographic typing of ruby characteristics and its host assemblages may guide further exploration and provide checks on reputed sources of both rough and cut stones Genetic pointers based on fluid and solid mineral inclusions oxygen and other isotope values and pressure and temperature estimates have already yielded much genetic information Rare ruby in mantle xenoliths TP 1100°C 2 GPa epitaxial diamond in ruby and ruby in diamond have special interest Amid the present extensive documentation on this singular gem mineral new insights and co existing associations remain to be discovered Although ruby

largely appears in metamorphic and metasomatic source rocks newer studies suggest it may also arise from magmatic sources Age dating of a range of mineral inclusions in ruby now allows more precise modelling of ruby genesis Tectonic aspects of ruby genesis related to early collisional plate events on Earth are also a frontier for further understanding In addition ruby growth remains an important phase in metamorphic studies of events in some young collisional zones This Special Issue planned for Minerals aims to attract further studies on this multi origin gem mineral Investigations at the economic border of ruby and sapphire nomenclature and relevant treatments affecting ruby color will be considered

Eurasia at the Dawn of History Manuel Fernández-Götz,Dirk Krausse,2017-01-16 Our current world is characterized by life in cities the existence of social inequalities and increasing individualization When and how did these phenomena arise What was the social and economic background for the development of hierarchies and the first cities The authors of this volume analyze the processes of centralization cultural interaction and social differentiation that led to the development of the first urban centres and early state formations of ancient Eurasia from the Atlantic coasts to China The chronological framework spans a period from the Neolithic to the Late Iron Age with a special focus on the early first millennium BC By adopting an interdisciplinary approach structured around the concepts of identity and materiality this book addresses the appearance of a range of key phenomena that continue to shape our world
