

# TRACING THE ORIGIN OF RUDOLF STEINER'S PEDAGOGY OF IMAGINATION

## Introduction

Rudolf Steiner believed that imaginative teaching is a way of creating synthesis and wholeness of human experience.<sup>1</sup> Similarly to John Dewey's with his notion of aesthetic experience,<sup>2</sup> Steiner saw the imagination as a point of departure from the observable and objective to the ineffable and subjective, telling us about 'love', 'truth' and that life can be beautiful, a place where the existence of another world can be perceived and where at the same time we are able to make better sense of the material world. Whether or not 'another world' exists is always a matter for individual exploration, which in many ways does not require that education takes a particular stand. Education, however, can encourage non-dogmatic exploration, and the imagination, according to Steiner, is the primary vehicle for such exploration to occur.

To fully understand Steiner's notion of 'imagination' in teaching and learning, however, we would need to place it within the historical context of Steiner's life. The importance Steiner placed on imaginative teaching, and the extent to which this principle permeated his entire pedagogical approach, was intimately connected to an elaborate study of the human being and the universe that he developed in the course, and context, of his own life. The imagination was to Steiner the ultimate means of solving the fundamental problem of tension between ideologies he experienced at first hand. With its potential for allowing synthesis, it was an answer to the polarised debate about spiritualism and materialism that Steiner and many of his European contemporaries engaged in.

How Steiner brought to bear the role of the imagination in reconciling ideological polarities on its function in an educational setting cannot be fully understood without examining the outlook on life from whence it sprang - nor without touching upon historical developments in Western education and the extraordinary life and background of Rudolf Steiner himself. This paper uses historical, biographical and autobiographical commentary to develop an interpretation of the origin of Steiner's notion of imaginative teaching.
