

About Rule Of Thumb Method

- One of the most common technique to do the valuation of small business.
- These rules or formulas are statistically derived from the scale of many businesses of each type.
 - E.g. some people says small weekly newspaper are worth 100% of the years gross income. But, there can be a organisation which compile statistics on 100 small weekly newspapers that were sold over a two year period. They will then average all selling prices and calculate that the average paper sold for 100% of one year's gross income.
- This is how thumb rules are created.
- To apply the rule of thumb to a business that varies significantly from the average is not appropriate.
