Europe Undivided Milada Anna Vachudova, 2005-02-17 Europe Undivided analyzes how an enlarging EU has facilitated a convergence toward liberal democracy among credible future members of the EU in Central and Eastern Europe It reveals how variations in domestic competition put democratizing states on different political trajectories after 1989 and how the EU's leverage eventually influenced domestic politics in liberal and particularly illiberal democracies In doing so Europe Undivided illuminates the changing dynamics of the relationship between the EU and candidate states from 1989 to 2004 and challenges policymakers to manage and improve EU leverage to support democracy ethnic tolerance and economic reform in other candidates and proto candidates such as the Western Balkan states Turkey and Ukraine Albeit not by design the most powerful and successful tool of EU foreign policy has turned out to be EU enlargement and this book helps us understand why and how it works

Capitalist Diversity on Europe's Periphery

Dorothee Bohle, Béla Greskovits, 2012-07-27 With the collapse of the Council for Mutual Economic Assistance in 1991 the Eastern European nations of the former socialist bloc had to figure out their newly capitalist future Capitalism they found was not a single set of political economic relations Rather they each had to decide what sort of capitalist nation to become In Capitalist Diversity on Europe's Periphery Dorothee Bohle and Béla Greskovits trace the form that capitalism took in each country the assets and liabilities left behind by socialism the transformational strategies embraced by political and technocratic elites and the influence of transnational actors and institutions They also evaluate the impact of three regional shocks the recession of the early 1990s the rolling global financial crisis that started in July 1997 and the political shocks that attended EU enlargement in 2004 Bohle and Greskovits show that the postsocialist states have established three basic variants of capitalist political economy neoliberal embedded neoliberal and neocorporatist The Baltic states followed a neoliberal prescription low controls on capital open markets reduced provisions for social welfare The larger states of central and eastern Europe Poland Hungary and the Czech and Slovak republics have used foreign investment to stimulate export industries but retained social welfare regimes and substantial government power to enforce industrial policy Slovenia has proved to be an outlier successfully mixing competitive industries and neocorporatist social inclusion Bohle and Greskovits also describe the political contention over such arrangements in Romania Bulgaria and Croatia A highly original and theoretically sophisticated typology of capitalism in postsocialist Europe this book is unique in the breadth and depth of its conceptually coherent and empirically rich comparative analysis Mapping Versatile Boundaries Regis

Darques, 2016-09-10 This book demonstrates the pivotal role played by state confines in the geography of Balkan countries through powerful GIS and remote sensing analyses It provides unique mapping perspectives on the Balkan region with over 140 illustrations The book is dedicated to applied historical and economic geographers as well as political scientists Because of its high fragmentation the Balkan area has not been studied on a systematic transnational basis The persistence of frozen and or open conflicts has also turned the border issue into an absolute taboo subject for the scientific community and civil society This results in an apparent chaos that most Western observers fail to understand *Materializing Europe A.*

Badenoch, A. Fickers, 2010-10-27 This book explores the relationships between European integration and material infrastructures Taking transnational infrastructures as the focal point of study the book focuses on the various forms of mediation between the material institutional and discursive levels of European integration and fragmentation in a truly transnational perspective The Routledge Atlas of the Second World War Martin Gilbert, 2014-03-05 In The Routledge Atlas of the Second World War Martin Gilbert graphically charts the war's political military economic and social history through 247 maps Each map has been specially drawn for this atlas many of them covering topics that have not previously been mapped The atlas covers all the major events from the German invasion of Poland in September 1939 to the defeat of Japan in August 1945 including the Blitz the Fall of France Pearl Harbor the naval Battles of the Atlantic the Indian Ocean

Regional Integration Walter Mattli,1999-05-20 In the late 1980s regional integration emerged as one of the most important developments in world politics It is not a new phenomenon however and this 1999 book presents an analysis of integration across time and across regions Walter Mattli examines projects in nineteenth and twentieth century Europe but also in Latin America North America and Asia since the 1950s Using the tools of political economy he considers why some integration schemes have succeeded while many others have failed what forces drive the process of integration and under what circumstances outside countries seek to join Unlike traditional political science approaches the book stresses the importance of market forces in determining the outcome of integration but unlike purely economic analyses it also highlights the impact of institutional factors The book will provide students of political science economics and European studies with a framework for the study of international cooperation
