Chong-Gossard, Frederik Juliaan Vervaeke, 2010 Graeco Roman literary works historiography and even the reporting of rumours were couched as if they came in response to an insatiable desire by ordinary citizens to know everything about the lives of their leaders and to hold them to account at some level for their abuse of constitutional powers for personal ends Ancient writers were equally fascinated with how these same individuals used deceit as a powerful tool to disguise private and public reality The chapters in this collection examine the themes of despotism and deceit from both historical and literary perspectives over a range of historical periods including classical Athens the Hellenistic kingdoms late republican and early imperial Rome late antiquity and Byzantium

*Materiality and Organizing* Paul M. Leonardi, Bonnie A. Nardi, Jannis Kallinikos, 2012-11-22 Ask a person on the street whether new technologies bring about important social change and you are likely to hear a resounding yes But the answer is less definitive amongst academics who study technology and social practice Scholarly writing has been heavily influenced by the ideology of technological determinism the belief that some types or technologically driven social changes are inevitable and cannot be stopped Rather than argue for or against notions of determinism the authors in this book ask how the materiality the arrangement of physical digital or rhetorical materials into particular forms that endure across differences in place and time of technologies ranging from computer simulation tools and social media to ranking devices and rumours is actually implicated in the process of formal and informal organizing The book builds a new theoretical framework to consider the important socio technical changes confronting people's everyday

experiences in and outside of work Leading scholars in the field contribute original chapters examining the complex interactions between technology and the social between artefact and humans The discussion spans multiple disciplines including management information systems informatics communication sociology and the history of technology and opens up a new area of research regarding the relationship between materiality and organizing Invisible Users Jenna Burrell, 2012-05-04 An account of how young people in Ghana's capital city adopt and adapt digital technology in the margins of the global economy The urban youth frequenting the Internet cafés of Accra Ghana who are decidedly not members of their country's elite use the Internet largely as a way to orchestrate encounters across distance and amass foreign ties activities once limited to the wealthy university educated classes The Internet accessed on second hand computers castoffs from the United States and Europe has become for these youths a means of enacting a more cosmopolitan self In *Invisible Users* Jenna Burrell offers a richly observed account of how these Internet enthusiasts have adopted and adapted to their own priorities a technological system that was not designed with them in mind Burrell describes the material space of the urban Internet café and the virtual space of push and pull between young Ghanaians and the foreigners they encounter online the region's famous 419 scam strategies and the rumors of big gains that fuel them the influential role of churches and theories about how the supernatural operates through the network and development rhetoric about digital technologies and the future viability of African Internet cafés in the region Burrell integrating concepts from science and technology studies and African studies with empirical findings from her own field work in Ghana captures the interpretive flexibility of technology by users in the margins but also highlights how their invisibility puts limits on their full inclusion into a global network society *The Greatest Spy* John Harte, 2025-09-16 Discover the life and daring exploits of the real life model for the world's most famous spy James Bond Sidney Reilly When a twenty year old Ukrainian arrived in London as a candidate for the position of secret agent in Britain's Secret Intelligence Bureau the chiefs of what would one day become MI5 were wise to hire him as he would become Britain's greatest spy a man known by several names His ingenuity and his mastery of the trade and his audacity and coolness when in danger were highly praised To penetrate the Irish Republican Army IRA he was given the code name of Sidney Reilly He was tasked with kidnapping Lenin and Trotsky during the Russian Revolution and visited the major battlefronts across Soviet Russia during the civil war sending back proposals to defeat the Reds He stole Germany's naval plans from Krupp and the harbor plans in Mongolia for Britain's allies and he posed as a German officer to engage in discussions with the Kaiser and his chiefs of staff about their U boat tactics against the Allies He also helped to obtain oil from Persia to modernize Britain's Naval Fleet when Churchill was First Lord of the Admiralty In 1953 novelist Ian Fleming used Reilly's secret Admiralty Intelligence file to write his novels about a fictional secret agent he called James Bond 007 But Reilly's true exploits were even more thrilling and fantastic than those of the fictional James Bond Reilly was Britain's best spy but was he also a Soviet double agent Author John Harte retells Reilly's story as it really was in fast moving prose with an

eye for telling detail and provides a twist He tells us what really happened to Reilly after he vanished in Soviet Russia in 1925 and was assumed to have been murdered by Stalin's secret police Find out what really happened to the man who inspired the creation of the world's most famous spy in *The Greatest Spy* But Bond's adventures were fantasies whereas Reilly's were real
