Run Rhino Run:

Run, Rhino, Run Esmond Bradley Martin, Chryssee Martin, 1982 **Run Rhino Run**, 2017 *Killing for Profit* Julian Rademeyer, 2012-11-08 A terrifying true story of greed corruption depravity and ruthless criminal enterprise On the black markets of Southeast Asia rhino horn is worth more than gold cocaine and heroin This is the chilling story of a more than two year long investigation into a dangerous criminal underworld where merciless syndicates will stop at nothing to attain their prize It is a tale of greed folly and corruption and of an increasingly desperate battle to save the rhino which has survived for more than 50 million years from extinction *Killing for Profit* is a meticulous devastating and revelatory account of one of the world's most secretive trades It exposes poachers gangsters con men mercenaries killers gunrunners diplomats government officials and other key players behind the slaughter And it follows the bloody trail from the front lines of the rhino wars in South Africa Zimbabwe and Mozambique to the medicine markets of Vietnam and the lair of a wildlife trafficking kingpin on the banks of the Mekong River in Laos *My Life on the Run* Bart Yasso, Kathleen Parrish, 2009-05-12 With *My Life on the Run* Bart Yasso an icon of one of the most enduringly popular recreational sports in the United States offers a touching and humorous memoir about the rewards and challenges of running Recounting his adventures in locales like Antarctica Africa and Chitwan National Park in Nepal where he was chased by an angry rhino Yasso recommends the best marathons on foreign terrain and tells runners what they need to know to navigate the logistics of running in an unfamiliar country He also offers practical guidance for beginning intermediate and advanced runners such as 5 K half marathon and marathon training schedules as well as advice on how to become a runner for life ever ready to draw joy from the sport and embrace the adventure that each race may offer **Poached** Rachel Love Nuwer, 2025-04-08 An intrepid investigation of the criminal world of wildlife trafficking the poachers the traders and the customers and of those fighting against it Journalist Rachel Nuwer plunges the reader into the underground of global wildlife trafficking a topic she has been investigating for nearly a decade Our insatiable demand for animals for jewelry pets medicine meat trophies and fur is driving a worldwide poaching epidemic threatening the continued existence of countless species Illegal wildlife trade now ranks among the largest contraband industries in the world yet compared to drug arms or human trafficking the wildlife crisis has received scant attention and support leaving it up to passionate individuals fighting on the ground to try to ensure that elephants tigers rhinos and more are still around for future generations As *Reefer Madness* Schlosser took us into the drug market or Susan Orlean descended into the swampy obsessions of *The Orchid Thief* Nuwer an award winning science journalist with a background in ecology takes readers on a narrative journey to the front lines of the trade to killing fields in Africa traditional medicine black markets in China and wild meat restaurants in Vietnam Through exhaustive first hand reporting that took her to ten countries Nuwer explores the forces currently driving demand for animals and their parts the toll that demand is extracting on species across the planet and the conservationists rangers and activists who believe it is not too late to stop the

impending extinctions More than a depressing list of statistics Poached is the story of the people who believe this is a battle that can be won that our animals are not beyond salvation After They're Gone Peter Marren,2022-05-05 Wise challenging and offering some unexpected laughter in the dark this is a rational and insightful account of the sixth great extinction event Peter Marren is a brilliant writer and a national treasure PATRICK BARKHAM Thoughtful fascinating and very timely STEPHEN MOSS Important and thought provoking CAROLINE LUCAS GREEN PARTY MP Essential reading Marren makes a page turner out of Armageddon SIMON BARNES In his characteristic style Peter Marren has humanised the story of wildlife losses with humour and wit but also with his enormous knowledge and deep love for the living world MARK COCKER We are in the midst of an extinction event the sixth mass extinction on earth and one entirely caused by mankind All species become extinct sooner or later but we have accelerated that natural process several hundredfold and now it is happening right in front of our eyes Extinction has a terrifying finality to it And many species have already been lost to us forever there is little we can do about that What we can do however is reflect remember and ultimately acknowledge the unvarnished truth We must see the natural world as it is and not as we might want it to be Our trajectory is one that has benefited one species alone humankind For all other beings from mammals to fish from birds to insects and coral from plants to lichens and fungi the future for better or worse is in our hands **Somewhere East of Eden** Michael McKeown,2017-11-07 From the author of Half Way Down an African Moon comes an evocative account of random journeys undertaken in Africa over the last thirty years Written at a time when the natural world everywhere is being heedlessly plundered and exploited as never before these recollections impassioned comic ironic and critical by turn are a reminder that in everything but multi national corporate cupidity the damage may well be irreparable Whether drifting in a fishing boat among lurking pods of unpredictable hippos down the Zambezi tracing the demise of the hapless Dodo in Mauritius trekking for lowland gorillas in the rainforests of south east Nigeria in the company of a wryly erudite local parks ranger or pondering the Stone Age mind set of wealthy trophy hunters the author s exhilaration for wildlife and nature glows through the prism of a gradually darkening lens The current state of our natural world may look bleak but giving up on it as he reminds us is not an option **Mega Mammals in Ancient India** Shibani Bose,2020-01-02 Since antiquity big mammals have inspired fear as well as fantasy among humans Not only do megafauna pervade the domains of religion art literature and folklore it is also now widely acknowledged that they can serve as important if not always adequate indices of environmental quality In this book Shibani Bose looks into eras bygone in order to chronicle the journeys of three mega mammals the rhinoceros elephant and tiger across millennia in early north India Carefully sifting through archaeological evidence and literary records in Sanskrit Pali Prakrit and classical Western accounts Bose documents the presence of these big mammals in diverse cultural contexts from hunter gatherer societies to the first urban civilization of India and beyond This work aims to reconstruct human interactions with these mega species through time while trying to understand the larger ecology of ancient India This book is especially well timed as the

conservation of our megafaunal heritage is a major concern for biologists ecologists and conservationists It underlines the need to historicize human interactions with these mega mammals with the contention that awareness regarding their past is critical for their future **Official Gazette of the United States Patent and Trademark Office** ,1991

Megaherbivores R. Norman Owen-Smith,1988 An account of the limitations and advantages conferred by large body size Vanishing Animals Andy Warhol,Kurt Benirschke,2012-12-06 Especially for this book Andy Warhol has created prints silkscreen over collage of some of the most endangered animals in the world Here they are joined with a stimulating text by Dr Kurt Benirschke affording the reader an opportunity to discover the lives and habits of these animals and what the outlook is for their survival Extinction the tragic and permanent loss of entire species of animals should be a concern for everyone This concern and a strong desire to take action toward preventing the loss of more animals has brought about an unusual collaboration between art and science The result is this beautiful volume in which artist and scientist have joined efforts to inform and inspire others to take action It is hoped that these fascinating and striking portrayals will stimulate readers to join their own energies and talents to this important fight against the loss of more species This book brings some of the less well known endangered animals to the reader s attention These animals deserve just as much attention as the giant panda or the mountain gorilla about which so much has already been said Naturally the animals presented here are very personal choices having been selected from a virtually endless supply of animals whose last hour is rapidly approaching *Charlemagne's Tablecloth* Nichola Fletcher,2025-09-23 Feasts banquets and grand dinners have always played a vital role in our lives They oil the wheels of diplomacy smooth the paths of the ambitious and spread joy at family celebrations They lift the spirits involve all our senses and at times transport us to other fantastical worlds Some feasts have given rise to hilarious misunderstandings at others competitive elements take over Some are purely for pleasure some connect uncomfortably with death but all are interesting Nichola Fletcher has written a captivating history of feasts and entertaining throughout the ages that includes the dramatic failures along with the dazzling successes From a humble meal of potatoes provided by an angel to the extravagance of the high medieval and Renaissance tables groaning with red deer and wild boar to the exquisite refinement of the Japanese tea ceremony Charlemagne s Tablecloth covers them all In her gustatory exploration of history s great feasting tables Fletcher also answers more than a few riddles such as Why did Charlemagne use an asbestos tablecloth at his feasts and Where did the current craze for the elegant Japanese Kaiseki meal begin Fletcher answers these questions and many more while inviting readers to a feasting table that extends all the way from Charlemagne s castle to her own millennium feast in Scotland This is an eclectic collection of food and feasts from the flamboyant to the eccentric the delicious to the disgusting and sometimes just the touchingly ordinary For anyone who has ever sat down at a banquet dining table and wondered Why Nichola Fletcher provides the delicious answer in a book that is a feast all its own *Conservation and Sustainable Use* E. J. Milner-Gulland,J. Marcus Rowcliffe,2007-11-15 The relentless exploitation and unsustainable use of

wildlife whether for food medicine or other uses is a key concern for conservationists worldwide Indeed wildlife conservation and sustainable use have recently become centrepieces in conservation and development research Assessment interpretation and ultimate action in a scientific study of exploited species must consider numerous factors from the biology habitat requirements and population dynamics of the species in question to the relationships that people have with their environment and the species within it Any long term management plan must ensure that people and wildlife can coexist otherwise it is doomed to failure Conservation and Sustainable Use provides a practical and integrated approach to carrying out research on the conservation of exploited species It is relevant to both tropical and temperate biomes and is applicable to all exploited species including mammals fish and plants It describes both the practical field and theoretical modelling techniques for obtaining and interpreting information integrating biological social economic and institutional analyses It also demonstrates how to translate information into effective action through appropriate interventions from legislation to changing people s attitudes This is the first time that all these issues have been covered together in a single practically orientated volume This book will be essential reading for graduate level students and researchers in conservation biology human ecology sociology and resource economics It will also provide an important reference for anyone who is interested in carrying out a scientifically based conservation programme for an exploited species including field biologists wildlife managers and practitioners in the fields of conservation and international development

Nature Crime Rosaleen Duffy,2010-08-31 The perilous state of endangered species such as tigers and rhinos and the worldwide illegal trade in ivory diamonds bushmeat and many other rare and valuable commodities are familiar issues in the West The heroes in these narratives are those who work to create protected areas for wildlife the villains the shadowy poachers and smugglers who destroy endangered animals and their habitats for the sake of profit In this groundbreaking book Rosaleen Duffy argues that the story is much more complex than this She analyses the workings of the black market wildlife industry pointing out that illegal trading is often the direct result of Western consumer desires from coltan for mobile phones to caviar for the global elite She looks at how tourists contribute often unwittingly to the destruction of natural environments Most strikingly she argues that the imperatives of Western style conservation often result in serious injustice to local people who are at risk of losing not only heir land but sometimes even their lives The result of many years of first hand research this book is essential reading for anyone who wants to understand the complex realities of nature conservation Jacket

Strange and Wonderful Karen Polinger Foster,2020-05-04 Ever since the creation of the world s first botanical and zoological gardens five thousand years ago people have collected displayed and depicted plants and animals from lands beyond their everyday experience Some did so to demonstrate power over distant territories others to enhance prestige by possessing something no one had seen before Exotica also satisfied intellectual curiosity furthered scientific research and educated and entertained In addition exotica especially their state sponsored representation were often instruments of political persuasion and in turn exerted

considerable influence over expansionist policies More than an account of gardens and menageries from antiquity to the present *Strange and Wonderful* explores the imagery of exotic flora and fauna in Western art seeking answers to certain fundamental and universal questions How do artists schooled in traditional modes of rendering the familiar deal with the new and strange Why are rare species deliberately introduced into images otherwise devoid of the unusual What is the pictorialized relationship between exotic reality and artistic imagination Karen Polinger Foster takes readers on a journey across millennia and around the globe telling fascinating stories and meeting along the way such characters as Hatshepsut's baboons Charlemagne's elephant Durer's rhinoceros and Victoria's hippopotamus What emerges is a sense of just how strong and far reaching the pull of the unknown and exotic has been across time and space Ultimately images of the wonderful reveal as much about the indigenous as they do about the strange enabling us to glimpse more vividly the power of imagination to mold the unknown to its purposes This dazzling and richly illustrated volume offers a thoughtful much needed inquiry into a very human phenomenon

Soul of the Tiger Jeffrey A. McNeely, Paul Spencer Sochaczewski, 1995-04-01 Anecdotes facts and observations on the role animals play in the daily life of Southeast Asian villages

Wildlife and People Gary G. Gray, 1995 *Wildlife and People* focuses on the human aspect of the animal habitat human triad providing an introduction to virtually every discipline from anthropology and history to socioeconomics included in the human dimensions of wildlife ecology Gary Gray maintains that the most fruitful approach to wildlife ecology grants coequality to wild animal population biology the ecology and management of wildlife habitats and the disciplines that consider wildlife in relation to human culture He concentrates on socioeconomic aspects of habitat animal human interactions in a broad time space species perspective examining topics ranging from aboriginal human wildlife relationships to consumptive uses of wildlife and wildlife law policy and administration

An Arid Eden Garth Owen-Smith, 2011-02-02 Two remarkable tales woven together the story of the Kaokoveld an arid eden in the remote north west of Namibia so nearly lost but regained to become one of Africa's iconic wildlife tourism destinations and also the story of a young man's search for an African way to do conservation in Africa Garth Owen Smith first visited the Kaokoveld in 1967 It was a life changing experience His unconventional ideas challenged both the conservation establishment and the former South African regime Despite this community based conservation was pioneered in the Kaokoveld and today Namibia is a world leader in this field But the early years when the foundation for this ground breaking approach to conservation was laid are largely forgotten and untold *An Arid Eden A Personal Account of Conservation in the Kaokoveld* brings those years alive through the eyes of Owen Smith spanning four and a half decades of extraordinary dedication passion and achievement The author and his partner Dr Margaret Jacobsohn have won some of the world's most prestigious conservation awards for their work in Namibia which has always challenged conventional wisdom The NGO they founded continues to break conservation agricultural and rural development paradigms
