Rural China:

Rural China Jie Fan, Thomas Heberer, Wolfgang Taubmann, 2015-05-15 This book reports the findings of two field studies conducted between 1993 and 2001 in seven townships and six provinces in China. The authors describe the process of rural urbanization and its related economic, social, and political changes by focusing mainly on the Zhen town, in addition to administrative offices and companies involved in the local economy and village committees. The authors show that the social changes resulting from China's economic reforms are occurring mainly from below and that this process is also resulting in a weakening of the economic and political dominance of the central government. Other changes discussed in this study include the development of new ownership structures and the increasing dominance of the private sector, a shift in the functions of administrative offices as the bureaucracy becomes increasingly business-oriented, the rise of a new local elite, a rebirth of traditional social structures, clans, local associations, and the emergence of new interest groups and institutions to represent their needs. *The Transformation of Rural China* Jonathan Unger, 2016-09-16

During the past quarter century, Jonathan Unger has interviewed farmers and rural officials from various parts of China in order to track the extraordinary changes that have swept the countryside from the Maoist era through the Deng era to the present day. A leading specialist on rural China, Professor Unger presents a vivid picture of life in rural areas during the Maoist revolution and then after the post-Mao disbandment of the collectives. This is a story of unexpected continuities amidst enormous change. Unger describes how rural administrations retain Mao-era characteristics despite the major shifts that have occurred in the economic and social hierarchies of villages as collectivization and class struggle gave way to the slogan "to get rich is glorious." A chapter explores the private entrepreneurship that has blossomed in the prosperous parts of the countryside. Another focuses on the tensions and exploitation that have arisen as vast numbers of migrant laborers from poor districts have poured into richer ones. Another, based on five months of travel by jeep into impoverished villages in the interior, describes the dilemmas of underdevelopment still faced by many tens of millions of farmers and the ways in which government policies have inadvertently hurt their livelihoods. *The Transformation of Rural China* Jonathan Unger, 2002

Here, Professor Unger presents a vivid picture of life in rural areas during the Maoist revolution and then after the post-Mao disbandment of the collectives. A story of unexpected continuities amidst great change, Unger describes how rural administrations retain Maoist characteristics.

The Underworld of Rural China Baifeng Chen, 2023-02-20 This book aims to provide the readers a better understanding of rural China through the particular perspective of the rural underworld. It proposes new concepts to describe social changes of rural China by comparing the contemporary rural society with the acquaintance society, the classic model for depicting the traditional Chinese society. The author's down-to-earth fieldwork has revealed that with a permeating gang influence, the society of rural China has actually changed in nature. Such change in social nature is summarized as the estrangement of acquaintances or moral ambiguity. As a result of the rural gangster's unlawful acts of lining their pockets

Organizing Rural China — Rural China Organizing Ane Bislev, Stig Thøgersen, 2012-04-05 During the early 1980s China embarked on what can be seen as one of the world's largest social experiments ever Decollectivization meant much more than the reorganization of agricultural production into family based farming It signaled significant changes to rural social relations when privatization marketization and increased geographical mobility started tearing apart the economic and social institutions that had structured collective village life under Mao The focus of this book is on how rural society has been reorganized in the 21st century The first chapters outline the basic organizational structure of rural China and can be used as an introduction to the topic in a classroom setting They show how the state and its social scientists draw up plans to overcome the perceived lack of rural social organization and discuss the often problem ridden implementation of their ideas The second section presents case studies of institutions that organize key aspects of rural life Boarding schools where rural children learn to accept organizational hierarchies lineage organizations carving out new roles for themselves dragonhead enterprises expected to organize agricultural production and support rural development and several others The book is of theoretical interest because of its focus on the re embedding or reintegration of individuals into new types of collectivities which are less predetermined by tradition and habit and more a matter of at least perceived individual choice Most chapters

are based on extensive fieldwork and contain vivid examples from daily life which will make the book attractive to anyone who wants to understand how Chinese villagers experience the extraordinary social changes they are going through
