Rural Development in Central America Rueda Ruben, 2000 The contributions address the performance of agrarian commodity markets the structure of rural land and financial markets and the dynamics of rural labor markets *OECD Territorial Reviews: The Mesoamerican Region 2006 Southeastern Mexico and Central America* OECD, 2006-03-08 Examines how the Mesoamerican region can realise its economic potential through regional policies that exploit its many comparative advantages and better governance at mesoregional national and local levels [Towards Sustainable Development in Central America and the Caribbean](#) A. Danielson, A. Dijkstra, 2001-08-21 Since the economic decline in the early 1980s most countries in Central America and the Caribbean have returned to positive growth rates The recovery often coincided with or followed extensive neoliberal reforms The contributors to this book address the crucial question of whether these growth rates are sustainable Several aspects of sustainability are assessed in particular macroeconomic social and ecological aspects The book includes both comparative analyses focusing on one of these aspects of sustainability and country case studies The conclusion is that these countries have not yet arrived at a sustainable growth path due to for example high levels of foreign and domestic debt worrisome trade gaps a lack of social integration and irresponsible exploitation of natural resources In sum the analysis points to serious weaknesses in the current neoliberal model the implications of which go far beyond this particular region *Latin America Transformed* Robert N Gwynne, Kay Cristobal, 2014-04-23 Restructured to offer a more thematic approach Designed to be more student friendly with new features including chapter summaries a glossary of Spanish phrases and acronyms All the chapters have been substantially revised and a new chapter on livelihoods and place as well as a concluding chapter have been added All the chapters have been substantially revised and a new chapter on livelihoods and place as well as a concluding chapter have been added **Andre Gunder Frank and Global Development** Patrick Manning, Barry K. Market-Led Agrarian Reform Saturnino Borrás Jr.,Cristóbal Kay,Edward Lahiff,2013-09-13 Three fourths of the world's poor are rural poor Most of the rural poor remain dependent on land based livelihoods for their incomes and reproduction despite significant livelihood diversification in recent years Land issue remains critical to any development discourse today Market led agrarian reform MLAR has gained prominence since the early 1990s as an alternative to state led land reforms This neoliberal policy is based on the inversion of what its proponents see as the features of earlier approaches and calls for redistribution via privatized decentralized transactions between willing sellers and willing buyers Its proponents especially those associated with the World Bank have claimed success where the policy has been implemented but such claims have been contested by independent scholars as well as by peasant movements who are struggling to gain access to land This book presents three thematic papers and six country studies The thematic papers

address issues of formalisation of property rights gendered land rights and neoliberal enclosure These studies demonstrate the pervasive influence of neoliberal ideas on property rights and rural development debates well beyond the core question of land redistribution The country cases bring together experiences from Brazil Guatemala El Salvador Philippines South Africa and Egypt Common findings include the success of landowners in minimising the impact of reform and a lack of post transfer support translating into marginal impact on poverty The limitations of the market led approach and the implications of the studies presented here for the future of agrarian reform are considered in the editors introduction This book was a special issue of *The Third World Quarterly* Agroecological Innovations Norman Uphoff, 2013-06-17 The world's food supply needs to rise significantly yet both arable and water supplies per capita are decreasing Not only are modern agricultural methods beyond the reach of those suffering the greatest food insecurity but they are also ecologically damaging relying upon fossil energy and chemical inputs This volume offers a collection of innovative and diverse approaches to agricultural development Documented in 12 case studies these approaches are reliant upon greater knowledge skill and labour input rather than larger capital expenditure They are shown to increase yield substantially sometimes doubling or tripling output This volume presents the concepts and operational means for reorienting agricultural efforts towards these more environmentally friendly and socially desirable approaches in the developed as well as developing world *Rural Development in Latin America* Alain De Janvry, 1989 *G.K. Hall Bibliographic Guide to Latin American Studies* Benson Latin American Collection, 1999

British Bulletin of Publications on Latin America, the Caribbean, Portugal, and Spain, 2000 Decentralized Development in Latin America Paul Lindert, Otto Verkoren, 2010-03-02 Much of the scholarly and professional literature on development focuses either on the macro level of national policies and politics or on the micro level of development projects and household or community socio economic dynamics By contrast this collection pitches itself at the meso level with a comparative exploration of the ways in which local institutions municipalities local governments city authorities civil society networks and others have demanded and taken on a greater role in planning and managing development in the Latin American region The book's rich empirical studies reveal that local institutions have engaged upwards with central authorities to shape their policy and resource environments and in turn been pressured from below by local actors contesting the ways in which the structures and processes of local governance are framed The examples covered in this volume range from global cities such as Mexico and Santiago to remote rural areas of the Bolivian and Brazilian Amazon As a result the book provides a deep understanding of the diversity and complexity of local governance and local development in Latin America while avoiding the stereotyped claims about the impact of globalisation or the potential benefits of decentralisation as frequently stated in less empirically grounded analysis **Environmental Governance in Latin America** Fabio De Castro, Barbara Hogenboom, Michiel Baud, 2016-03-24 This book is open access under a CC BY license The multiple purposes of nature livelihood for communities revenues for states commodities for companies and biodiversity for conservationists

have turned environmental governance in Latin America into a highly contested arena In such a resource rich region unequal power relations conflicting priorities and trade offs among multiple goals have led to a myriad of contrasting initiatives that are reshaping social relations and rural territories This edited collection addresses these tensions by unpacking environmental governance as a complex process of formulating and contesting values procedures and practices shaping the access control and use of natural resources Contributors from various fields address the challenges limitations and possibilities for a more sustainable equal and fair development In this book environmental governance is seen as an overarching concept defining the dynamic and multi layered repertoire of society nature interactions where images of nature and discourses on the use of natural resources are mediated by contextual processes at multiple scales **Rural**
