Consequences And Challenges Of New Agricultural Technologies Gigi M Berardi,Charles C Geisler,2019-07-11

Although formal social impact assessment of changing technologies in U S agriculture is still in its infancy scholars have been documenting the effects of new technology throughout the twentieth century In this collection Professors Berardi and Geisler bring together historically relevant research and a carefully chosen cross section of contemporary work Their review of the literature is followed by an evaluation of the effects of mechanization on labor and production written in 1904 which provides a backdrop for papers from the 1940s and 1950s examining the mechanization of agriculture in the South in the Midwest and in rural areas in general Subsequent chapters offer present day insights on such topics as the socioeconomic consequences of automated vegetable and tobacco harvesting center pivot irrigation and organic and no till cultivation The authors also look at compensation and adjustment programs for displaced labor the relationship between technology and agribusiness growth and the effectiveness of university programs that prepare students to perform social impact assessments in agriculture The edited proceedings of a spirited roundtable discussion on new directions for the study of the social impacts of farm technology and the political economy of agriculture provide the thought provoking conclusion to this overview of the field Hearings, Reports and Prints of the Senate Committee on Agriculture and Forestry United States.
