**G. Cornelis Van Kooten**

## **Rural Land Degradation:**

Rural Land Degradation Donald MacDonald, Morven Archer, 1993 The third in the Aspects of Applied Geography series this book looks in detail at the causes and effect of land degradation and ways of managing and conserving the land Up to date case studies in desertification in the Sahel and land degradation in North America provide a basis for a thorough examination of the concepts and issues involved Other features include short and extended response exam type questions and concepts and summaries are highlighted Donald MacDonald is the author of Farming and the Countryside Social Geography Morven Archer is the author of Development and Health **Rural Land Degradation in Australia** A. J.

Conacher, Jeanette Conacher, 1995 Rural Land Degradation in Australia examines the degradation of Australia's ecosystems the problems associated with the increasing use of synthetic chemicals and the direct and underlying causes of land degradation It also looks at broader social and economic implications and places the nature of the overall problem in its global context The final chapter evaluates some solutions to the range of problems identified Students of geography agriculture environmental science and rural planning along with anyone interested in an objective appraisal of land degradation will find this an engaging accessible and informative book **Environmental Protection Through Rural**

**Land Laws** Mitike Worku, 2020-02-18 Thesis M A from the year 2018 in the subject Politics Environmental Policy University of Gondar course law language English abstract Using qualitative method this study tries to find out whether the ANRS rural land laws normative and institutional frameworks and their enforcement mechanisms are adequate or not in protecting environmental degradation in rural areas of South Wollo Zone Ethiopia Legal provisions of the ANRS rural land laws which deal with unlimited land use right limited land distribution land right registration and certification obligations to conserve and protect the land expropriation for environmental purpose incentive and the existence of legal remedy will encourage the zone's rural environmental protection However this does not mean that such laws are comprehensive rather such laws fails to comprise all possible obligations of land users lacks clarity and provided in general terms with weak remedies There is also no cooperation mechanism or forum among stockholders in the areas of rural land administration and environmental protection Much attention is given to land administration issues than environmental protection Environmental degradation related to rural land in Ethiopia in general and in ANRS in particular is reflected in the form of land degradation loss and degradation of water resources deforestation as well as decline and or loss of biodiversity Ethiopia has designed a number of environmental laws But such laws suffer from various defects which affect their ability to promote environmental protection So efforts to use laws to protect the rural environment should look beyond just environmental statutes Therefore seeking a solutions and studying rural land administration laws will be helpful to defy land degradation in rural areas The rural land and environmental protection institution also lack financial material and manpower capacities which hold back to carry out its duties Due to these reasons the rural land administration and environmental protection institutional setup of the Zone

remains inadequate to properly protect the rural environment In relation to rural land environmental protection the ANRS rural land laws are practically not enforced in the zone due to the legal gap and unclear less insufficient and political will to enforce the rural land laws So the rural land environment of the South Wollo Zone remains in peril so long as there is no effective and enforced rural land law government commitment and well designed empowered and coordinated institutions

*Rural Land Degradation in Australia*, 1996      *Multifunctional Rural Land Management* Floor Brouwer, C. Martijn van der Heide, 2012-05-16 The increasing demand for rural land and its natural resources is creating competition and conflicts Many interested parties including farmers nature conservationists rural residents and tourists compete for the same space Especially in densely populated areas agriculture recreation urban and suburban growth and infrastructure development exert a constant pressure on rural areas Because land is a finite resource spatial policies which are formulated and implemented to increase the area allocated to one use imply a decrease in land available for other uses As a result at many locations multi purpose land use is becoming increasingly important This notion of multi purpose land use is reflected in the term multifunctionality This volume provides insights into viable strategies of sustainable management practices allowing multiple functions sustained by agriculture and natural resources in rural areas It shows how the rural economy and policies can balance and cope with these competing demands and includes numerous case studies from Europe North America and developing countries      **Rural and Regional Futures** Anthony Hogan, Michelle Young, 2014-09-19 Agriculture mining and related rural industries have been central to the development of Australia s economy This book details the role that the Australian Government has played in the making of rural and regional Australia particularly since World War II The book reviews these policies and evaluates them with regards the commitments undertaken by the Government to contribute towards vibrant rural communities Policy areas addressed include agriculture water education welfare and population natural resource management resource extraction Indigenous and affairs localism rural research and regional innovation Youth Affairs and the devolution of regional governance Overall two distinct policy strategies can be observed one wherein the government saw its role as part of the entrepreneurial state and a sector wherein government has increasingly taken itself out of industry development leaving this role to the market Having considered these strategies and their impacts the book concludes that policy over the past 40 years has not in fact contributed to a more vibrant prosperous rural and regional Australia *Rural and Regional Futures* concludes with several chapters looking to the future One chapter explores what the role of the state can be within a social market economy while the final chapter gives consideration to the initial steps rural communities will need to take to begin the process of revitalisation While these materials present as a case study of developments in Australia the policy shift from the Government as entrepreneur to a focus on markets is an international one and as such the insights offered by this book will have wide appeal      *Demands On Rural Lands* Chris Cocklin, 2019-04-09 Planning for the use of rural lands in the developed countries of the world has become an increasingly contentious process as

resources become more limited and conflicting needs grow stronger The critical questions are Which is more important agriculture livestock production recreation industry or urban housing and Who decides priorities and responsibilities for use The capacity of the land to meet all of the demands placed upon it without serious environmental disruption has become a major concern for all Recognizing the exigencies of the situation the contributors define and evaluate the theoretical and methodological frameworks within which rural land use problems can be analyzed In the discussions focus on the identification and characterization of resources and competing users of rural lands stressing that a careful articulation of the problem is essential to effective planning is aimed at developing appropriate information bases useful in planning for the problems related to the management of these rural lands The discussion of policy options for rural resource use in builds upon the material in the previous two sections to provide a framework for an analysis of rural resource use

**Rural Land-Use Planning in Developed Nations (Routledge Revivals)** Paul Cloke, 2013-10-18 This edited collection first published in 1989 provides a detailed analysis of rural land use policies on a country specific basis Case studies include analyses of planning and legislation in Britain The Netherlands Japan the U S A and Australia Alongside a comprehensive overview of the concept and application of rural land use from Paul Cloke environment issues resource management and the role of central governments are topics under discussion throughout At an international level this title will of particular interest to students of rural geography and environmental planning

**El Salvador, Rural Development Study**, 1998 Although El Salvador has recorded impressive overall economic growth in the 1990s during this period agricultural growth has lagged considerably below the rest of the economy which raises concerns about the long run capacity of the sector to raise incomes and employment in rural areas and contribute to overall growth The main objectives of this sector review are twofold to develop a strategy to revitalize the agricultural sector and realize its full potential for efficient and sustainable growth by enhancing competitiveness and to present the main findings of the analysis of rural poverty and develop its implications for the design of a strategy for poverty alleviation

**Rural Land Change and the Capacity for Ecosystem Conservation and Sustainable Production in North America** Alisa W. Coffin, Mark A. Drummond, David R. Huggins, Fardausi Akhter, 2022-04-26

**Social Welfare in India and China** Jianguo Gao, Rajendra Baikady, Lakshmana Govindappa, Sheng-Li Cheng, 2020-09-01 Focusing on social work and social service delivery this book examines the social policies and programmes designed to address different societal issues and concerns across India and China It focuses on gaining understanding of design and delivery of social welfare policies related to special interest groups highlighting important contemporary challenges such as child labour child abuse exploitation of women problems related to disabled people mental health issue illiteracy and unemployment Offering a comparative perspective the book considers the impact of political administration in both countries to critically assess key issues related to social welfare in two different political economic social and cultural contexts

**Research Directions, Challenges and Achievements of Modern Geography** Jerzy Bański, Michael

Meadows, 2023-12-01 This book identifies and discusses research directions challenges and achievements in contemporary geography It also documents the most current theoretical and methodological considerations undertaken by scientists representing various sub disciplines of geography with particular reference to human geography It was assumed that the thematic structure of the currently active International Geographical Union IGU problem commissions corresponds to the most relevant and current research directions in geography Reflecting this assumption the book consists of 14 chapters contributed by geographers representing 14 problem commissions of the IGU which allows us to examine geography from different perspectives and to provide the reader with a complete overview of contemporary research issues in human geography The first part discusses contemporary research problems and issues related to scientific methodology and achievements of selected geographical sub disciplines including urban geography agricultural geography transport geography and political geography among others The second part focuses on the interdisciplinarity of geography and the topics of global dimension undertaken by geographers such as global change GIS and geospatial technology marginalization and environmental change This part also discusses the internal relations between geographical specializations and their links with other related sciences including geology sociology and economics The third part discusses the holistic approaches of geography applied to particular regions territories or conditions Africa coastal systems geomorphology and local development

The Rural Richard Munton, 2017-05-15 The rural has long been regarded as an important site of geographical inquiry even if our understanding of it has not always been treated as conceptually different from the urban That said rural research has pursued a number of distinct empirical agendas ranging from the operation and impacts of agribusiness to local resistance to global food supply chains to differing representations of the rural In doing so rural geographers have critically examined the relevance and significance of ideas drawn from numerous traditions including political economy ecological modernization and cultural theory amending them as appropriate in their search to understand the nature and trajectory of rural areas Up until the 1980s attention remained largely focused upon agriculture as the primary land use but increasingly new forms of rural consumption housing recreation nature conservation have taken centre stage as the primacy of local agricultures has been undermined by reduced state protection and new rural populations which have migrated out from the city More recently research has been dominated by the cultural turn with particular emphases upon society nature relations interpretations of landscape marginalised others and analyses of the relations between representation and practice In the

last decade a more holistic view of the rural bringing together different aspects of the two previous themes has emerged through more politically oriented studies of rural governance concerned with the functioning of interest groups participation protest and the allocation and management of resources The volume is thus structured into three sections concerned with agriculture and food the rural and rural governance The great majority of the selected papers combine both empirical material often highly informative case studies and important conceptual arguments about change in the rural condition that can be linked to ideas being employed elsewhere in Geography and the Social Sciences more generally These critical reflections have been drawn very largely from research conducted in advanced economies which at least provide some commonality of experience allowing the transfer of ideas between what otherwise might be seen as very differing geographical contexts

**Managing Rural Environments** Andy Owen, 1999 This resource file offers extension and support tasks for Edexcel B geography Extended research ideas help with fieldwork and investigation and sample questions and mark schemes provide practice for exams There are planning tools for teachers and additional case study materials and map outlines

**Quality Housing Environment for Rural Low-income Families**, 1980 **Quality Housing Environment for Rural Low-income Families: Papers**, 1980 *Land Resource Economics and Sustainable Development* G. Cornelis Van

Kooten, 2011-11-01 This text seeks to provide an introduction to issues of land use and the economic tools that are used to resolve land use conflicts In particular tools of economic analysis are used to address allocation of land among alternative uses in such a way that the welfare of society is enhanced Thus the focus is on what is best for society and not what is best for an individual a particular group of individuals or a particular constituency What this text seeks to provide is a balanced and just approach to decision making concerning allocation of land from the Introduction Land Resource Economics and Sustainable Development has already been tested in a slightly different format on over 400 students in a number of upper level undergraduate and lower level graduate courses It presents a pragmatic approach to the issues of land use and sustainable development and breaks away from the narrow focus of most economics texts on resources as it takes into account current political and ecological concerns while at the same time providing readers with the essential economic tools for a rational discussion of land use conflicts Land Resource Economics and Sustainable Development addresses a wide range of issues not covered in other economics texts These include soil erosion wetlands preservation global climatic change urban rural conflict urban land use range management forest management and public land management The broad scope

and practical perspective make Land Resource Economics and Sustainable Development useful to students interdisciplinary researchers and professional economists and managers working in the fields of economic development the environment agriculture and forestry Both U S and Canadian data are used throughout the text to illustrate the issues discussed in the book
