**Overview of rural poverty in Latin America and the Caribbean** Food and Agriculture Organization of the United Nations, 2019-09-12 Panorama of Rural Poverty in Latin America and the Caribbean 2018 published by the Food and Agriculture Organization of the United Nations FAO addresses the important challenges faced by the region in developing its rural territories to achieve the targets of the Sustainable Development Goals by 2030 particularly SDG 1 to end poverty in all its forms everywhere After many years of progress poverty and extreme rural poverty in the region have started to increase again This is worrying news for countries of the region and the international community because if they do not return to the path of rural poverty reduction millions of people will be excluded from the opportunity to contribute to the development of their families communities and countries The 33 Member States of the United Nations in the region have pledged their commitment to eradicating rural poverty by 2030 and despite the recent trend it is still possible to achieve this goal This report also highlights the persistence of significant gaps between rural and urban areas which is incompatible with sustainable and equitable development Of the 169 targets of the Sustainable Development Goals 132 require actions that must be carried out in rural territories

Rigolini,Leonardo Lucchetti,2016-07-26 One out of every five Latin Americans or around 130 million people have never  
known anything but poverty subsisting on less than US 4 a day throughout their lives These are the region s chronically poor  
who have remained so despite unprecedented inroads against poverty in Latin America and the Caribbean since the turn of  
the century Left Behind Chronic Poverty in Latin America and the Caribbean takes a closer look at the region s entrenched  
poor who and where they are and how existing policies need to change in order to effectively assist them The book shows  
significant variations of rates of chronic poverty both across and within countries Within a single country some regions show  
incidence rates up to eight times higher than the lowest Despite the higher rates of chronic poverty in rural areas chronic  
poverty is as much an urban as a rural issue In fact considering absolute numbers urban areas in many countries including  
Chile Brazil Mexico Colombia and the Dominican Republic have more chronic poor than rural areas Undoubtedly the region  
has come a long way during the decade in terms of poverty reduction guided by a mix of sustained growth and increased  
levels in amounts and quality of public spending and programs targeted directly or indirectly to the chronic poor While  
improving endowments and the context where the chronic poor live is a necessary condition going forward the decade s  
experience suggests that it may not be enough to reach the chronic poor The book posits that refinements to the existing  
policy toolkit as opposed to more programs may come a long way in helping the remaining poor These refinements include  
intensifying efforts to improve coordination between different social and economic programs which can boost the income  
generation process and deal with the intergenerational transmission of chronic poverty by investing in early childhood  
development Equally important though there is an urgent need to adapt programs to directly address the psychological toll of  
chronic poverty on people s mindset and aspirations which currently undermines the effectiveness of the existing policy  
efforts
