Seeds Of Virtue And Knowledge:

Seeds of Virtue and Knowledge Maryanne Cline Horowitz, 1998 In this wide ranging and thought provoking study Maryanne Cline Horowitz explores the image and idea of the human mind as a garden under the proper educational cultivation the mind may nourish seeds of virtue and knowledge into the full flowering of human wisdom This copiously illustrated investigation begins by examining the intellectual world of the Stoics who originated the phrases seeds of virtue and seeds of knowledge Tracing the interrelated history of the Stoic cluster of epistemological images for natural law within humanity reason common notions sparks and seeds Horowitz presents the distinctive versions within the competing movements of Hellenistic Judaism and early Christianity Augustinian and Thomist theologies Christian mysticism and Kabbalah and Erasmian Catholicism and the Lutheran Reformation She demonstrates how the Ciceronian and Senecan analogies between horticulture and culture basic to Italian Renaissance humanists artists and neo Platonists influence the emergence of emblems and essays among participants in the Northern Renaissance neo Stoic movement The Stoic metaphor is still visible today in ecumenical movements that use vegetative language to encourage the growth of shared values and to promote civic virtues organizations disseminate information on nipping bad habits in the bud and on turning a new leaf The author's evidence of illustrated pages from medieval Renaissance and Enlightenment texts will stimulate contemporary readers to evaluate her discovery of the premodern scientific paradigm that the mind develops like a plant An Analysis of Pierre Charron's De la Sagesse Maryanne Cline, 1968 **Logos and Law in the Letter of James** M.A.

Jackson-McCabe, 2014-04-09 This study examines the association of implanted logos and the perfect law of freedom in the Letter of James It argues that James understands the Torah to be a written expression of the divine law the Stoics correlated with human reason After showing how past interpretation of James's logos has been guided by a problematic essentialist approach to Christian origins the Stoic theory of law is reconstructed with special attention to Cicero's concept of implanted reason Adaptations of the Stoic theory in ancient Jewish and Christian literature are examined and the Letter of James is analyzed in detail The work makes original contributions to the study of James and of Stoicism It also highlights the importance of broad reconstructions of Christian origins for the interpretation of the early Christian literature

Cultivated Power Elizabeth Hyde, 2005-03-07 Cultivated Power explores the collection cultivation and display of flowers in early modern France at the historical moment when flowering plants many of which were becoming known in Europe for the first time piqued the curiosity of European gardeners and botanists merchants and ministers dukes and kings Elizabeth Hyde reveals how flowers became uniquely capable of revealing the curiosity reason and taste of those elite men who engaged in their cultivation The cultural and increasingly political value of such qualities was not lost on royal panegyrists who seized upon the new meanings of flowers in celebrating the glory of Louis XIV Using previously unexplored archival sources Hyde recovers the extent of floral plantations in the gardens of Versailles and the sophisticated system of nurseries

created to fulfill the demands of the king's gardeners. She further examines how the successful cultivation of those flowers made it possible for Louis XIV to demonstrate that his reign was a golden era surpassing even that of antiquity. *Cultivated Power* expands our knowledge of flowers in European history beyond the Dutch tulip mania and restores our understanding of the importance of flowers in the French classical garden. The book also develops a fuller perspective on the roles of gender, rank, and material goods in the age of the baroque. Using flowers to analyze the movement of culture in early modern society, *Cultivated Power* ultimately highlights the influence of curious florists on the taste of the king and the extension of the cultural into the realm of the political. Cherry, 2009-05-27 Western philosophy has long nurtured the hope to resolve moral controversies through reason thereby to secure moral direction and human meaning without the need for a defining encounter with God or the transcendent. The expectation is for a moral rationality that is universal and able adequately to frame and guide the moral life. Moral and cultural unity was sought through philosophical reflection on human nature and the basic goods of a properly nurtured and virtuous life that is through appeal to what has come to be called the natural law. The natural law addresses permissible moral choice through objective understandings of human nature and human goods. Persons are obligated to act in ways that are compatible with creating and integrating the basic human goods into their lives and the lives of others. Such goods provide the basis for practical reasoning about virtuous choices and immediate reasons for action. The goal is the making of rational choices in the pursuit of a virtuous flourishing human life. Natural law theorists have argued extensively against human cloning, abortion, and same gender marriage. Yet whose assumptions regarding human nature should guide our understanding of the basic goods that mark the full flourishing human life? Moreover, why should nature, even human nature, be thought of as a moral boundary beyond which one must not trespass? Persons may wish actively to direct human evolution utilizing the tools of both imagination and biotechnology. Perhaps nature is simply a challenge to be addressed, overcome, and set aside. This volume is a critical exploration of natural law theory. *Self-Transcendence and Virtue* Jennifer A.

Frey, Candace Vogler, 2018-11-06 Recent research in the humanities and social sciences suggests that individuals who understand themselves as belonging to something greater than the self—a family, community, or religious or spiritual group—often feel happier, have a deeper sense of purpose or meaning in their lives, and have overall better life outcomes than those who do not. Some positive and personality psychologists have labeled this location of the self within a broader perspective self-transcendence. This book presents and integrates new interdisciplinary research into virtue, happiness, and the meaning of life by re-orienting these discussions around the concept of self-transcendence. The essays are organized around three broad themes connected to self-transcendence. First, they investigate how self-transcendence helps us to understand aspects of the moral life as it is studied within psychology, including the development of wisdom, the practice of moral praise, and psychological well-being. Second, they explore how self-transcendence is linked to virtue in different religious and spiritual

traditions including Judaism Islam Christianity Buddhism and Confucianism Finally they ask how self transcendence can help us theorize about Aristotelean and Thomist conceptions of virtue like hope and piety and how this helps us to re conceptualize happiness and meaning in life **Aquinas and the Infused Moral Virtues** Angela McKay

Knobel,2021-10-15 This study locates Aquinas s theory of infused and acquired virtue in his foundational understanding of nature and grace Aquinas holds that all the virtues are bestowed on humans by God along with the gift of sanctifying grace Since he also holds with Aristotle that we can create virtuous dispositions in ourselves through our own repeated good acts a question arises How are we to understand the relationship between the virtues God infuses at the moment of grace and virtues that are gradually acquired over time In this important book Angela McKay Knobel provides a detailed examination of Aquinas s theory of infused moral virtue with special attention to the question of how the infused and acquired moral virtues are related Part 1 examines Aquinas s own explicit remarks about the infused and acquired virtues and considers whether and to what extent a coherent theory of the relationship between the infused and acquired virtues can be found in Aquinas Knobel argues that while Aquinas says almost nothing about how the infused and acquired virtues are related he clearly does believe that the structure of the infused virtues mirrors that of the acquired in important ways Part 2 uses that structure to evaluate existing interpretations of Aquinas and argues that no existing account adequately captures Aquinas s most fundamental commitments Knobel ultimately argues that the correct account lies somewhere between the two most commonly advocated theories Written primarily for students and scholars of moral philosophy and theology the book will also appeal to readers interested in understanding Aquinas s theory of virtue Mundus Emblematicus K. S. Q. Visser,2003 The thirteen articles in this volume deal with the Neo Latin emblem book after the birth of the genre with Andrea Alciato s *Emblematum libellus* 1531 While the interest in emblematics has grown considerably during the last decades the seminal Neo Latin production has received relatively little attention In *Mundus Emblematicus* an international team of experts in the field makes this part of the emblem tradition accessible to a broad scholarly audience The articles cover a variety of emblem books published at the time ranging from influential humanist collections for instance those by Achille Bocchi Hadrianus Junius or Joachim Camerarius to alchemist Michael Maier or religious emblems such as the books of the Calvinist Theodore de Beze or the Jesuit Herman Hugo In each paper subjects dealt with include the historical context of the work and its makers the relation between word and image the structure of the collection as a whole and the emblematic game intertextuality in word and image Moreover several articles explore the interaction between the emblem and connected literary phenomena like the commonplace book the fable or the use of commentaries All papers are in English and all examples from Latin texts are translated Together these articles show the variety within the Neo Latin emblem production thus challenging traditional approaches of the emblem As such *Mundus Emblematicus* contributes towards a more comprehensive view of the forms and functions of the genre as a whole **Knowledge Flows in a Global Age** John

Krige,2022-09-05 Viewing knowledge as travelling between sites rather than flowing like currents through them or diffusing out from them the contributors to this collection stress the human intention which shapes and drives how knowledge is processed mobilized and repurposed to serve differing and uneven interests constraints and environments The chapters consider both what knowledge travels and how it travels across borders of varying permeability They home in on a vast range of platforms and objects of knowledge from tangible commodities like hybrid wheat seeds penicillin Robusta coffee naval weaponry and high performance computers to the more conceptual apparatuses of telecommunications statistics and food sovereignty Moreover this volume decenters the Global North in its focus tracking how knowledge travels in all directions across the borders of Mexico India Portugal Guinea Bissau the Soviet Union China Angola and Palestine and the West Bank as well as the US and the UK The variety of kinds of knowledge that are addressed in the chapters brings forth an extraordinary array of state and non state actors and institutions committed to performing the work needed to move knowledge across national borders
