projects Establish common language and approach in your organization The structured discipline will help to find operational and compliance improvement potentials You can literally see what is going on in your organization and only what you can see can be improved What is this book about The main promise of the book is that you will be able to implement a BPM EA program in your organization and cover all aspects that are needed to be successful and bring the people with you on this exciting journey It covers all aspects from strategy through governance design and tool selection configuration to import and creation of content in an easy to follow approach In addition to this it also shows how a real world application of this approach could look like Who is this book for This book is for the brave people who understand that organizations are complex systems and that changes in one place will have an impact on many people ask anyone who has ever implemented an ERP system Typically every stone will be upturned in a transformation program It is for those people who realized that they have to implement an architecture capability in their organizations They have to be able to describe analyze plan support the implementation of changes and measure their impact to be able to manage the enterprise in a responsible and sustainable way It is also for the people who have tried that before and failed Maybe because they only focused on the implementation of a tool the make it and they come approach or they forgot that people typically do not want to change It is also for the curious people who are not 100% convinced that this architecture thing is not too big of a bite for your organization They would like to learn what it takes before they make the decision if they are ready for it But wait this is not all This book also comes with a code for the accompanying website which includes additional tools all graphics as a downloadable PDF a worksheet that will help you to select your architecture tool and a tracker in Notion when it comes to importing your existing content into your tool
