Guillaume Apollinaire, Dorothea Eimert, 2023-12-28 Les Demoiselles d'Avignon five young women that changed modern art forever. Faces seen simultaneously from the front and in profile, angular bodies whose once voluptuous feminine forms disappear behind asymmetric lines. With this work, Picasso revolutionised the entire history of painting. Cubism was thus born in 1907. Transforming natural forms into cylinders and cubes, painters like Juan Gris and Robert Delaunay, led by Braque and Picasso, imposed a new vision upon the world that was in total opposition to the principles of the Impressionists. Largely diffused in Europe, Cubism developed rapidly in successive phases that brought art history to all the richness of the 20th century, from the futurism of Boccioni to the abstraction of Kandinsky, from the suprematism of Malevich to the constructivism of Tatlin. Linking the core text of Guillaume Apollinaire with the studies of Dr Dorothea Eimert, this work offers a new interpretation of modernity's crucial moment and permits the reader to rediscover through their biographies the principal representatives of the movement. **Art, Music, and Mysticism at the Fin de Siècle** Corrinne Chong, Michelle Foot, 2024-07-29

This edited volume explores the dialogue between art and music with that of mystical currents at the turn of the twentieth century. The volume draws on the most current research from both art historians and musicologists to present an interdisciplinary approach to the study of mysticism's historical importance. The chapters in this edited volume gauge the scope of different interpretations of mysticism and illuminate how an exchange between the sister arts unveils an underlying stream of metaphysical, supernatural, and spiritual ideas over the course of the century. Case studies include Charles Tournemire, Joseph P. Ladan, Erik Satie, Hilma af Klint, Jean Sibelius, František Kupka, and Wassily Kandinsky. The contributors' unique theoretical perspectives and disciplinary methodologies offer expert insight on both the rewards and inevitable aesthetic complications that arise when one art form meets another. The book will be of interest to scholars working in art history, musicology, visual culture, and mysticism. **Lighting Design in Shared Public Spaces** Shanti

Sumartojo, 2022-05-12 This book advocates an approach to lighting design that focuses on how people experience illumination. Lighting Design in Shared Public Spaces contextualises light, dark, and lighting design within the settings, sensations, ideas, and imaginaries that form our understandings of ourselves and the world around us. The chapters in this collection bring a new perspective to lighting design, arguing for an approach that addresses how lighting is experienced, understood, and valued by people. Across a range of new case studies from Australia, Germany, Denmark, and the United Kingdom, the authors account for lighting design's crucial role in shaping our dynamic and messy experiential worlds. With many turning to innovative ethnographic methodologies, they powerfully demonstrate how feelings of comfort, safety, security,

vulnerability care and well being can configure in and through how people experience and manipulate light and dark By focusing on how lighting is improvised arranged avoided and composed in relation to the people and things it acts upon the book advances understandings of lighting design by showing how improved experiences of the built environment can result from more sensitive and context specific illumination The book is intended for social scientists who are interested in the lit or sensory world as well as designers architects urban planners and others concerned with how the experience of light dark and lighting might be both better understood and implemented in our shared public spaces *Drawing the Light from Within*
