Massenspektrometrie 5a Eine Einführung:

Einführung in die Geochemie Harald Strauß, 2025-08-26 Dieses Lehrbuch für Studierende der Geowissenschaften im höheren Bachelor und Masterstudium in die Bedeutung der Geochemie für das Verständnis erdwissenschaftlicher Fragestellungen ein. Zahlreiche inhaltlich abgeschlossene Kapitel ermöglichen einen gezielten Zugang zu Themen aus dem Nieder- und Hochtemperaturbereich, bei denen geochemische und isotopische Daten maßgeblich zur Erkenntnisgewinnung beigetragen haben. Im Fokus stehen die Fragen, inwieweit ein geochemischer Fingerabdruck charakteristisch ist, um die Herkunft eines Stoffes zu rekonstruieren oder inwieweit Veränderungen in Konzentration und Isotopie diagnostisch für die Rekonstruktion von Stoffumsätzen sind. Dabei werden sowohl grundlegende Konzepte als auch angewandte geowissenschaftliche Fragestellungen behandelt, sodass der Text eine fundierte Basis für ein vertieftes Verständnis geochemischer Prozesse bietet. Progress in the Chemistry of Organic Natural Products 100 A. D. Kinghorn, H. Falk, J. Kobayashi, 2014-11-17 The volumes of this classic series now referred to simply as Zechmeister after its founder L. Zechmeister have appeared under the Springer Imprint ever since the series inauguration in 1938. It is therefore not really surprising to find out that the list of contributing authors who were awarded a Nobel Prize is quite long: Kurt Alder, Derek H. R. Barton, George Wells Beadle, Dorothy Crowfoot Hodgkin, Otto Diels, Hans von Euler Chelpin, Paul Karrer, Luis Federico Leloir, Linus Pauling, Vladimir Prelog, with Walter Norman Haworth and Adolf F. J. Butenandt serving as members of the editorial board. The volumes contain contributions on various topics related to the origin, distribution, chemistry, synthesis, biochemistry, function, or use of various classes of naturally occurring substances ranging from small molecules to biopolymers. Each contribution is written by a recognized authority in his field and provides a comprehensive and up-to-date review of the topic in question. Addressed to biologists, technologists, and chemists alike, the series can be used by the expert as a source of information and literature citations and by the non-expert as a means of orientation in a rapidly developing discipline.

Metrology: from Physics Fundamentals to Quality of Life P. Tavella, M. J. T. Milton, M. Inguscio, 2018-01-03 Metrology is a constantly evolving field and one which has developed in many ways in the last four decades. This book presents the proceedings of the Enrico Fermi Summer School on the topic of Metrology held in Varenna, Italy, from 26 June to 6 July 2017. This was the 6th Enrico Fermi summer school devoted to metrology, the first having been held in 1976. The 2017 program addressed two major new directions for metrology: the work done in preparation for a possible redefinition of four of the base units of the SI in 2018 and the impact of the application of metrology to issues addressing quality of life, such as global climate change and clinical and food analysis on science, citizens, and society. The lectures were grouped into three modules: metrology for quality of life, fundamentals of metrology, and physical metrology and fundamental constants. Topics covered included food supply and safety, biomarkers, monitoring climate and air quality, new SI units, measurement uncertainty, fundamental constants, electrical metrology, optical frequency standards, and photometry and light metrology. The book

provides an overview of the topics and changes relevant to metrology today and will be of interest to both academics and all those whose work involves any of the various aspects of this field *Spektroskopische Methoden in der organischen Chemie*
