The Octopus and the Orangutan Eugene Linden, 2002 In *The Octopus and the Orangutan* Eugene Linden takes readers on another unforgettable journey into the minds and hearts of animals *The Parrot's Lament* his acclaimed previous book featured extraordinary true stories of animal consciousness and intelligence Linden's latest book goes beyond our everyday encounters with animals at home and in the zoo in a wide ranging collection of real life anecdotes that offer further compelling evidence of their higher mental capabilities and their awareness of the needs and feelings of others *The Octopus and the Orangutan* reveals extraordinary new details about animals introduced in *The Parrot's Lament* and then finds intelligent behavior in surprising new places ranging from the octopus's garden to the crow's nest Amazing feats of stealth deception and larceny accompany unexpected acts of kindness and friendship Animals show they are cagey bargainers and tough negotiators both with their human keepers and with one another The animals themselves are our guides in this fresh look at the question of animal intelligence From the beloved pets we think we know to the remarkable survival skills of creatures in the wild Eugene Linden once again shares his wonder and joy at the infinite variety of animal behavior that continues to inform amaze and touch us all **Wild Man from Borneo** Robert Cribb, Helen Gilbert, Helen Tiffin, 2014-01-31 *Wild Man from Borneo* offers the first comprehensive history of the human orangutan encounter Arguably the most humanlike of all the great apes particularly in intelligence and behavior the orangutan has been cherished used and abused ever since it was first brought to the attention of Europeans in the seventeenth century The red ape has engaged the interest

of scientists philosophers artists and the public at large in a bewildering array of guises that have by no means been exclusively zoological or ecological One reason for such a long term engagement with a being found only on the islands of Borneo and Sumatra is that like its fellow great apes the orangutan stands on that most uncomfortable dividing line between human and animal existing for us on what has been called the dangerous edge of the garden of nature Beginning with the scientific discovery of the red ape more than three hundred years ago this work goes on to examine the ways in which its human attributes have been both recognized and denied in science philosophy travel literature popular science literature theatre museums and film The authors offer a provocative analysis of the origin of the name orangutan trace how the ape has been recruited to arguments on topics as diverse as slavery and rape and outline the history of attempts to save the animal from extinction Today while human populations increase exponentially that of the orangutan is in dangerous decline The remaining wild men of Borneo are under increasing threat from mining interests logging human population expansion and the widespread destruction of forests The authors hope that this history will by adding to our knowledge of this fascinating being assist in some small way in their preservation

[The Kyrenia Ship Final Excavation Report, Volume I](#) Susan Womer Katzev, Helena Wylde Swiny, 2022-12-01 The Kyrenia Ship a Greek merchantman built around 315 BC which sank off the north coast of Cyprus was excavated between 1968 and 1972 under the direction of Michael L Katzev of the University of Pennsylvania and Oberlin College The importance of this ship lies in the exceptionally well preserved hull that provided new insights into ancient shipbuilding as well as the cargo it carried The hold was stacked with transport amphoras of various types made on Rhodes with a few examples from Samos Kos Knidos and Cyprus supplemented by a consignment of millstones iron billets and almonds The cabin pottery from Rhodes also suggests this was the vessel's home port a conclusion supported by most of the scientific ceramic analyses Its trade route included Rhodes Cyprus and the Levant with perhaps Egypt as a final destination This volume provides a detailed history of the excavation followed by definitive studies of the amphora cargo and the pottery associated with shipboard life Some of the amphora stamps suggest that the ship sank between 294 and 291 BC dates corroborated by the cabin wares The repetition of four drinking cups kantharoi oil containers gutti wine measures olpai as well as bowls and saucers suggests that the ship was sailed by a crew of four Seven bronze coins were recovered five minted in the name of Alexander the Great and one well known type of Ptolemy I produced only on Cyprus

abuse as a predictor of abuse against humans has been documented extensively Experts have explored alternatives to identify the early signs and stop the cycle This book offers an up to date compendium that covers the historical legal research and applied issues related to animal abuse and cruelty Intelligence in Nature Jeremy Narby,2006-03-02 Continuing the journey begun in his acclaimed book *The Cosmic Serpent* the noted anthropologist ventures firsthand into both traditional cultures and the most up todate discoveries of contemporary science to determine nature s secret ways of knowing Anthropologist Jeremy Narby has altered how we understand the Shamanic cultures and traditions that have undergone a worldwide revival in recent years Now in one of his most extraordinary journeys Narby travels the globe from the Amazon Basin to the Far East to probe what traditional healers and pioneering researchers understand about the intelligence present in all forms of life *Intelligence in Nature* presents overwhelming illustrative evidence that independent intelligence is not unique to humanity alone Indeed bacteria plants animals and other forms of nonhuman life display an uncanny penchant for self deterministic decisions patterns and actions Narby presents the first in depth anthropological study of this concept in the West He not only uncovers a mysterious thread of intelligent behavior within the natural world but also probes the question of what humanity can learn from nature s economy and knowingness in its own search for a saner and more sustainable way of life *Untamed Leadership* Brent A. Carter,2011 Instincts shape who we are as leaders They encapsulate the social variety we exhibit to others from the servant to the tyrant Though they are integrated into our every thought and deed we are relatively unaware of what they are or how they impact us Perhaps the frenzied lives we lead are to blame or maybe we spend too much time developing the veneer of leadership rather than excavating its core substance No matter the cause each day we are presented opportunities to make differences in the lives we touch As we awaken to the reality that who we are on the inside has a direct role in what we project on the outside we will have begun the process of apprehending *Untamed Leadership* **T: The Story of Testosterone, the Hormone that Dominates and Divides Us** Carole Hooven,2021-07-13 Through riveting personal stories and the latest research Harvard evolutionary biologist Carole Hooven shows how testosterone drives the behavior of the sexes apart and how understanding the science behind this hormone is empowering for all Since antiquity from the eunuchs in the royal courts of ancient China to the booming market for elixirs of youth in nineteenth century Europe humans have understood that typically masculine behavior depends on testicles the main source of testosterone in males Which sex has the highest rates of physical violence hunger for status and desire for a high number of sex partners Just follow the testosterone Although we humans can study and reflect on our own behavior we are also animals the products of millions of years of evolution Fascinating research on creatures from chimpanzees to spiny lizards shows how high testosterone helps males out reproduce their competitors And men are no exception While most people agree that sex differences in human behavior exist they disagree about the reasons But the science is clear testosterone is a potent force in human society driving the bodies and behavior of the sexes apart But as Hooven shows in *T* it does so in

concert with genes and culture to produce a vast variety of male and female behavior And crucially the fact that many sex differences are grounded in biology provides no support for restrictive gender norms or patriarchal values In understanding testosterone we better understand ourselves and one another and how we might build a fairer safer society **Billions of Missing Links** Simmons, Geoffrey, **The Nature Conservancy Magazine** ,2003 **A Catalogue of Body Patterning in Cephalopoda** Luciana Borrelli,Francesca Gherardi,Graziano Fiorito,2006 Nature Conservancy ,2003 *Public Library Catalog* Juliette Yaakov,2004 More than 8 000 books in the main volume More than 2 400 new titles in annual paperbound supplements More than 2 000 analytic entries for items in collections and anthologies *Public Library Core Collection* John Greenfieldt,Patrice Bartell,2008 Wilson s Public Library Core Collection Nonfiction 13th Edition 2008 recommends reference and nonfiction books for the general adult audience It is a guide to over 9 000 books over 6 500 titles are new to this edition plus review sources and other professional aids for librarians and media specialists Acquisitions librarians reference librarians and cataloguers can all use this reliable guide to building and maintaining a well rounded collection of the most highly recommended reference and nonfiction books for adults All titles are selected by librarians editors advisors and nominators all of them experts in public library services The collection is a valuable tool for collection development and maintenance reader s advisory weeding your collection and curriculum support Richly enhanced records provide a wealth of useful information All entries include complete bibliographic data as well as price subject headings annotations grade level Dewey classification cover art and quotations from reviews Many entries also list awards best book lists and starred reviews Save Time Efficiently organised and includes Starred titles Save Money Allocate your resources to the best materials available Stay Relevant Discover the best in important contemporary categories Complete Coverage Includes recommendations on periodicals and electronic resources too Four Year Subscription This Core Collection was originally sold as a four year subscription The core edition published in 2008 delivers a library bound volume with an extensive selective list of recommended books From 2009 to 2011 Wilson published extensive paperback supplements to the 2008 edition A new cycle of materials will begin in 2012 However the 2008 to 2011 materials are currently available Buyers of them will receive all these materials immediately All four years are only 420 Uniquely Valuable There is nothing quite like Wilson Core Collections The accumulated expertise of our selectors and the unquestioned reputation of these collections is invaluable Wilson Core Collections are universally recognised as impartial and expert aids to collection development that assist and reinforce the judgement of librarians everywhere Selection to a Wilson Core Collection is strong support to any challenged purchase Contemporary Relevance This Core Collection includes broad updates in the areas of crafts terrorism and international security environment and global warming diseases and medicine and religion plus other contemporary topics that keep the library s collection as current as today s headlines Other Key Features Classified Catalogue A list arranged by Dewey Decimal Classification with complete cataloguing information for each book Author Title Subject and
