American John Horgan has a window on contemporary science unsurpassed in all the world Who else routinely interviews the likes of Lynn Margulis Roger Penrose Francis Crick Richard Dawkins Freeman Dyson Murray Gell Mann Stephen Jay Gould Stephen Hawking Thomas Kuhn Chris Langton Karl Popper Stephen Weinberg and E O Wilson with the freedom to probe their innermost thoughts In *The End Of Science* Horgan displays his genius for getting these larger than life figures to be simply human and scientists he writes are rarely so human so at their mercy of their fears and desires as when they are confronting the limits of knowledge This is the secret fear that Horgan pursues throughout this remarkable book Have the big questions all been answered Has all the knowledge worth pursuing become known Will there be a final theory of everything that signals the end Is the age of great discoverers behind us Is science today reduced to mere puzzle solving and adding details to existing theories Horgan extracts surprisingly candid answers to these and other delicate questions as he discusses God Star Trek superstrings quarks plectics consciousness Neural Darwinism Marx's view of progress Kuhn's view of revolutions cellular automata robots and the Omega Point with Fred Hoyle Noam Chomsky John Wheeler Clifford Geertz and dozens of other eminent scholars The resulting narrative will both infuriate and delight as it mindlessly Horgan's smart contrarian argument for endism with a witty thoughtful even profound overview of the entire scientific enterprise Scientists have always set themselves apart from other scholars in the belief that they do not construct the truth they discover it Their work is not interpretation but simple revelation of what exists in the empirical universe But science itself keeps imposing limits on its own power Special relativity prohibits the transmission of matter or information as speeds faster than that of light quantum mechanics dictates uncertainty and chaos theory confirms the impossibility of complete prediction Meanwhile the very idea of scientific rationality is under fire from Neo Luddites animal rights activists religious fundamentalists and New Agers alike As Horgan makes clear perhaps the greatest threat to science may come from losing its special place in the hierarchy of disciplines being reduced to something more akin to literary criticism as more and more theoreticians engage in the theory twiddling he calls ironic science Still while Horgan offers his critique grounded in the thinking of the world's leading researchers he offers homage too If science is ending he maintains it is only because it has done its work so well
