Odoratus Sexualis:

Odoratus Sexualis Iwan Bloch, 1934 *Odoratus Sexualis* Iwan Bloch, 1976 **Odoratus Sexualis** Eugen Dühren (pseud. van Iwan Bloch.), 1934 Heinrich Kaan's "Psychopathia Sexualis" (1844) Heinrich Kaan, 2016-10-25 With Heinrich Kaan's book we have then what could be called the date of birth or in any case the date of the emergence of sexuality and sexual aberrations in the psychiatric field Michel Foucault *Abnormal Lectures* at the Collège de France 1974-1975 Heinrich Kaan's fascinating work part medical treatise part sexual taxonomy part activist statement and part anti-onanist tract takes us back to the origins of sexology He links the sexual instinct to the imagination for the first time creating what Foucault called a unified field of sexual abnormality Kaan's taxonomy consists of six sexual aberrations: masturbation, pederasty, lesbian love, necrophilia, bestiality, and the violation of statues Kaan not only inaugurated the field of sexology but played a significant role in the regimes of knowledge production and discipline about psychiatric and sexual subjects As Benjamin Kahan argues in his Introduction Kaan's text crucially enables us to see how homosexuality replaced masturbation as the central concern of Euro-American sexual regulation Kaan's work translated into English for the first time here opens a new window onto the history of sexuality and the history of sexology and reconfigures our understanding of Richard von Krafft-Ebing's book of the same name published some forty years later Odoratus Sexualis I. Bloch, 1992-03 Catalog of Copyright Entries. Third Series Library of Congress. presenting an extensive range of well known and unfamiliar texts in intriguing and imaginative new ways that make us re think literature's relation with the senses Concentrating on aesthetic and decadent authors *Scents and Sensibility* introduces a rich selection of poems essays and fiction exploring these texts with reference to both the little known cultural history of perfume use and the appreciation of natural fragrance in Victorian Britain It shows how scent and perfume are used to convey not merely moods and atmospheres but the nuances of the aesthete or decadent's carefully cultivated identity personality or sensibility A key theme is the emergence of the olfactif the cultivated individual with a refined sense of smell influentially represented by the poet and critic Algernon Charles Swinburne who is emulated by a host of canonical and less well known aesthetic and decadent successors such as Walter Pater Edmund Gosse John Addington Symonds Lafcadio Hearn Michael Field Oscar Wilde Arthur Symonds Mark Andr Raffalovich Theodore Wratislaw and A Mary F Robinson This book explores how scent and perfume pervade the work of these authors in many different ways signifying such diverse things as style atmosphere influence sexuality sensibility spirituality refinement individuality the expression of love and poetic creativity and the aura of personality dandyism modernity and memory A coda explores the contrasting twentieth century responses of Virginia Woolf and Compton Mackenzie to the scent of Victorian literature *Sex and Race, Volume 2* J. A. Rogers, 2014-09-15 In the *Sex and Race* series first published in the 1940s historian Joel Augustus Rogers questioned the concept of race the origins of racial differentiation and the root of the color problem Rogers surmised that a large percentage of ethnic differences are the result of sociological factors and in these volumes he gathered what he called the bran of history the uncollected unexamined history of black people in the hope that these neglected parts of history would become part of the mainstream body of Western history Drawing on a vast amount of research Rogers was attempting to point out the absurdity of racial divisions Indeed his belief in one race humanity precluded the idea of several different ethnic races The series marshals the data he had collected as evidence to prove his underlying humanistic thesis that people were one large family without racial boundaries Self trained and self published Rogers and his work were immensely popular and influential during his day even cited by Malcolm X The books are presented here in their original editions *Scent and Subversion* Barbara Herman, 2013-11-05 An intriguing look at vintage perfume's powerful past including reviews of more than 300 scents with stunning period advertisements throughout **People of the Body** Howard Eilberg-Schwartz, 2012-02-01 By shifting attention from the image of Jews as a textual community to the ways Jews understand and manage their bodies for example to their concerns with reproduction and sexuality menstruation and childbirth this volume contributes to a revisioning of what Jews and Judaism are and have been The project of re membering the Jewish body has both historical and constructive motivations As a constructive project this book describes renews and participates in the complex and ongoing modern discussion about the nature of Jewish bodies and the place of bodies in Judaism **Past Scents** Jonathan Reinartz, 2014-03-30 In this comprehensive and engaging volume medical historian Jonathan Reinartz offers a historiography

of smell from ancient to modern times Synthesizing existing scholarship in the field he shows how people have relied on their olfactory sense to understand and engage with both their immediate environments and wider corporal and spiritual worlds This broad survey demonstrates how each community or commodity possesses or has been thought to possess its own peculiar scent Through the meanings associated with smells osmologies develop what cultural anthropologists have termed the systems that utilize smells to classify people and objects in ways that define their relations to each other and their relative values within a particular culture European Christians for instance relied on their noses to differentiate Christians from heathens whites from people of color women from men virgins from harlots artisans from aristocracy and pollution from perfume This reliance on smell was not limited to the global North Around the world Reinartz shows people used scents to signify individual and group identity in a morally constructed universe where the good smelled pleasant and their opposites reeked With chapters including Heavenly Scents Fragrant Lucre and Odorous Others Reinartz's timely survey is a useful and entertaining look at the history of one of our most important but least understood senses

Essence and Alchemy Mandy Aftel, 2011-04-01 An artisan perfumer reveals a lost art and its mysterious sensual history For centuries people have taken what seems to be an instinctive pleasure in rubbing scents into their skin Perfume has helped them to pray to heal and to make love And as long as there has been perfume there have been perfumers or rather the priests shamans and apothecaries who were their predecessors Yet in many ways perfumery is a lost art its creative and sensual possibilities eclipsed by the synthetic ingredients of which contemporary perfumes are composed which have none of the subtlety and complexity of essences derived from natural substances nor their lush histories Essence and Alchemy resurrects the social and metaphysical legacy that is entwined with the evolution of perfumery from the dramas of the spice trade to the quests of the alchemists to whom today's perfumers owe a philosophical as well as a practical debt Mandy Aftel tracks scent through the boudoir and the bath and into the sanctums of worship offering insights on the relationship of scent to sex solitude and the soul Along the way she imparts instruction in the art of perfume compositions complete with recipes guiding the reader in a process of transformation of materials that continues to follow the alchemical dictum solve et coagula dissolve and combine and is itself aesthetically and spiritually transforming

Chemical Signals in Vertebrates Dietland Muller-Schwarze, 2012-12-06 From June 6 to 9 1976 about 140 participants physiologists chemists ecologists animal behaviorists and psychologists gathered in the Gideon Putnam Hotel at Saratoga Springs New York for a symposium entitled Chemical Signals in Vertebrates The focus of this symposium sponsored by the United States National Science Foundation was on chemical communication in higher animals most notably mammals This included the chemical nature production and reception of chemical signals and their modulating effects on behavior Almost all the world's laboratories working in this area were represented It was the first meeting of its kind and although the physiological aspects of taste and smell on the one hand and insect pheromones on the other have previously been treated in several fine symposia they have not before

been treated as a back drop to chemical communication in vertebrates The field of insect pheromones is well developed with hundreds of active compounds identified By contrast in vertebrates only six mammalian pheromones in as many species had been identified chemically by 1976 Perfumery Steve Van Toller, George H. Dodd, 2013-04-17 THE SENSE OF SMELL The nose is normally mistakenly assumed to be the organ of smell reception It is not The primary function of the nose is to regulate the temperature and humidity of inspired air thereby protecting the delicate linings of the lungs This is achieved by the breathed air passing through narrow passageways formed by three nasal turbinates in each nostril The turbinates are covered by spongy vascular cells which can expand or contract to open or close the nasal pathways The olfactory receptors innervated by the 1st cranial nerve are located at the top of the nose There are about 50 million smell receptors in the human olfactory epithelia the total size of which in humans is about that of a small postage stamp with half being at the top of the left and half at the top of the right nostril The receptive surfaces of olfactory cells are ciliated and extend into a covering layer of mucus There is a constant turnover of olfactory cells Their average active life has been estimated to be about 28 days
