Matthew Adkins, 2013-11-29 This book challenges common historical misperceptions of both the history of the sciences in early modern France and the history of the French Enlightenment By reexamining the moral political and social ideas of those who defended the ascendancy of the sciences this book demonstrates the evolution of political views

**Human Nature, Cultural Diversity, and the French Enlightenment** Henry Vyverberg, 1989-08-17 In this work Henry Vyverberg traces the evolution and consequences of a crucial idea in French Enlightenment thought the idea of human nature Human nature was commonly seen as a broadly universal unchanging entity though perhaps modifiable by geographical social and historical factors Enlightenment empiricism suggested a degree of cultural diversity that has often been underestimated in studies of the age Evidence here is drawn from Diderot s celebrated Encyclopedia and from a vast

range of writing by such Enlightenment notables as Voltaire Rousseau and d Holbach Vyverberg explains not only the age's undoubted fascination with uniformity in human nature but also its acknowledgment of significant limitations on that uniformity He shows that although the Enlightenment's historical sense was often blinkered by its notions of a uniform human nature there were also cracks in this concept that developed during the Enlightenment itself *Science in the Archives* Lorraine Daston, 2022-12-22 Archives bring to mind rooms filled with old papers and dusty artifacts But for scientists the detritus of the past can be a treasure trove of material vital to present and future research fossils collected by geologists data banks assembled by geneticists weather diaries trawled by climate scientists libraries visited by historians These are the vital collections assembled and maintained over decades centuries and even millennia which define the sciences of the archives With *Science in the Archives* Lorraine Daston and her co authors offer the first study of the important role that these archives play in the natural and human sciences Reaching across disciplines and centuries contributors cover episodes in the history of astronomy geology genetics philology climatology medicine and more as well as fundamental practices such as collecting retrieval and data mining Chapters cover topics ranging from doxology in Greco Roman Antiquity to NSA surveillance techniques of the twenty first century Thoroughly exploring the practices politics economics and potential of the sciences of the archives this volume reveals the essential historical dimension of the sciences while also adding a much needed long term perspective to contemporary debates over the uses of Big Data in science

Marx and Friedrich Engels He also discusses Hegel's ideas in relation to the pertinent writings of other major figures of modern political philosophy such as Jean Jacques Rousseau John Locke Edmund Burke John Stuart Mill Jeremy Bentham Karl Popper Norberto Bobbio and Friedrich Hayek Classical Learning in Britain, France, and the Dutch Republic, 1690-1750 Floris Verhaart, 2020-06-10 For much of western history the achievements of classical antiquity were seen as unsurpassable and works by Latin and Greek authors were viewed as treasure troves of information still useful for contemporary society By the late seventeenth century however the progress of scientific discoveries and the new paradigms of rationalism and empiricism meant the authority of the ancients was called into question Those working on the classical past and its literature debated new ways of defending their relevance for society The different approaches to classical literature defended in these debates explain how the writings of ancient Greece and Rome could become a vital part of eighteenth century culture and political thinking Floris Verhaart analyses these eighteenth century debates about the value of classics arguing that the Enlightenment though often seen as an age of reason and modernity in fact continuously sought inspiration from preceding traditions and ages such as Renaissance humanism and classical antiquity The volume offers an interesting parallel with the modern day in which the relationship between experts and the general public has become the topic of debate and many academics especially in the humanities face pressure to explain how their work benefits society at large *Geometry and Monadology* Vincenzo de Risi, 2007-08-08 This book reconstructs from both historical and theoretical points of view Leibniz's geometrical studies focusing in particular on the research Leibniz carried out in his final years The work's main purpose is to offer a better understanding of the philosophy of space and in general of the mature Leibnizean metaphysics This is the first ever comprehensive historical reconstruction of Leibniz's geometry **Hypatia** Edward J. Watts, 2017-02-01 A philosopher mathematician and martyr Hypatia is one of antiquity's best known female intellectuals During the sixteen centuries following her murder by a mob of Christians Hypatia has been remembered in books poems plays paintings and films as a victim of religious intolerance whose death symbolized the end of the Classical world But Hypatia was a person before she was a symbol Her great skill in mathematics and philosophy redefined the intellectual life of her home city of Alexandria Her talent as a teacher enabled her to assemble a circle of dedicated male students Her devotion to public service made her a force for peace and good government in a city that struggled to maintain trust and cooperation between pagans and Christians Despite these successes Hypatia fought countless small battles to live the public and intellectual life that she wanted This book rediscovers the life Hypatia led the unique challenges she faced as a woman who succeeded spectacularly in a man's world and the tragic story of the events that led to her tragic murder **Encyclopedia of British Humorists** Steven H.
