Elliptic Curves Henry McKean, Victor Moll, Victor H. Moll, 1999-08-13 The subject of elliptic curves is one of the jewels of nineteenth century mathematics originated by Abel Gauss Jacobi and Legendre This 1997 book presents an introductory account of the subject in the style of the original discoverers with references to and comments about more recent and modern developments It combines three of the fundamental themes of mathematics complex function theory geometry and arithmetic After an informal preparatory chapter the book follows an historical path beginning with the work of Abel and Gauss on elliptic integrals and elliptic functions This is followed by chapters on theta functions modular groups and modular functions the quintic the imaginary quadratic field and on elliptic curves Requiring only a first acquaintance with complex function theory this book is an ideal introduction to the subject for graduate students and researchers in mathematics and physics with many exercises with hints scattered throughout the text *Bulletin of the American Mathematical Society* American Mathematical Society, 1909

MILLER, 2012-12-06 P W Bridgman and the Special Theory of Relativity P W Bridgman wrote A S ph i cati *History of European Drama and Theatre* Erika Fischer-Lichte, 2002 This major study reconstructs the vast history of European drama from Greek tragedy through to twentieth century theatre focusing on the subject of identity Throughout history drama has performed and represented political religious national ethnic class related gendered and individual concepts of identity Erika Fischer-Lichte's topics include ancient Greek theatre Shakespeare and Elizabethan theatre by Corneille Racine Molière the Italian commedia dell'arte and its transformations into eighteenth century drama the German Enlightenment Lessing Schiller Goethe and Lenz romanticism by Kleist Byron Shelley Hugo de Vigny Musset Büchner and Novalis the turn of the century Ibsen Strindberg Chekhov Stanislavski the twentieth century Craig Meyerhold Artaud O'Neill Pirandello Brecht Beckett Miller Anyone interested in theatre throughout history and today will find this an invaluable source of information Class Struggle Domenico Losurdo, 2016-10-06 Available for the first time in English this book examines and reinterprets class struggle within Marx and Engels' thought As Losurdo argues class struggle is often misunderstood as exclusively the struggle of the poor against the rich of the humble against the powerful It is an interpretation that is dear to populism one that supposes a binary logic that closes its eyes to complexity and inclines towards the celebration of poverty as a place of moral excellence This book however shows the theory of class struggle is a general theory of social conflict Each time the most adverse social conflicts are intertwined in different ways A historical situation always emerges with specific and unique characteristics that necessitate serious examination free of schematic and biased analysis Only if it breaks away from populism can Marxism develop the ability to interpret and change the world Probability Theory L. E. Maistrov, 2014-07-03 *Probability Theory A Historical Sketch* covers the probability theory mainly axiomatization problems The book discusses the

prehistory of the probability theory the first stage in the development of probability theory and the development of probability theory to the middle of the 19th century The text also describes the probability theory in the second half of the 19th century and the axiomatic foundations of the probability theory Historians and mathematicians will find the book invaluable The Cambridge History of Eighteenth-century Philosophy Knud Haakonssen, 2006 This two volume set presents a comprehensive and up to date history of eighteenth century philosophy The subject is treated systematically by topic not by individual thinker school or movement thus enabling a much more historically nuanced picture of the period to be painted **13 Lectures on Fermat's Last Theorem** Paulo Ribenboim, 2012-12-06 Lecture I The Early History of Fermat's Last Theorem 1 The Problem 2 Early Attempts 3 Kummer's Monumental Theorem 4 Regular Primes 5 Kummer's Work on Irregular Prime Exponents 6 Other Relevant Results 7 The Golden Medal and the Wolfskehl Prize Lecture II Recent Results 1 Stating the Results 2 Explanations Lecture III B K Before Kummer 1 The Pythagorean Equation 2 The Biquadratic Equation 3 The Cubic Equation 4 The Quintic Equation 5 Fermat's Equation of Degree Seven Lecture IV The Naïve Approach 1 The Relations of Barlow and Abel 2 Sophie Germain 3 Co *Alfred Schutz's Sociological Aspect of Literature* Lester Embree, 2013-03-14 The maintext in the present volume has been constructed out of passages found scattered about in thirty five years of Alfred Schutz's writings and it has been constructed by following a page of notes for a lecture that he gave in 1955 under the title Sociological Aspect of Literature The result can be considered the substance of Schutz's contribution to the theory of literature More detail about how this construction has been performed is offered in the Editor's Introduction The complementary essays are by scholars from Germany Japan and the United States from several generations and from the disciplines of anthropology philosophy and sociology These researchers were invited to reflect in their own perspectives on the main text and in relation to matters referred to within and beyond it Draft versions of most of these complementary essays were presented for critical discussion in a research symposium held at the Graduate Faculty of Political and Social Science of the New School for Social Research on April 28-29 1995 under the sponsorship of The Center for Advanced Research in Phenomenology Inc Florida Atlantic University The Department of Philosophy of The Graduate Faculty of the New School Richard 1 Bernstein Chair and Evelyn and George Schutz the philosopher's children Revised versions of these presentations and also several essays subsequently recruited are offered to begin yet another stage in the history of scholarship on Schutz and the phenomenological research inspired by him Northwestern University Press is thanked for permission to quote extensively from Alfred Schutz *The Phenomenology of the Social World* trans **Liberalism** Domenico Losurdo, 2014-02-04 In this definitive historical investigation Italian author and philosopher Domenico Losurdo argues that from the outset liberalism as a philosophical position and ideology has been bound up with the most illiberal of policies slavery colonialism genocide racism and snobbery Narrating an intellectual history running from the eighteenth through to the twentieth centuries Losurdo examines the thought of preeminent liberal writers such as Locke Burke Tocqueville Constant Bentham

and Sieys revealing the inner contradictions of an intellectual position that has exercised a formative influence on today's politics Among the dominant strains of liberalism he discerns the counter currents of more radical positions lost in the constitution of the modern world order *The Empire of Stereotypes* R. Casillo,2006-05-13 This book places Germaine de Staël's influential novel *Corrine or Italy 1807* in relation to preceding and subsequent stereotypes of Italy as seen in the works of Northern European and American travel writers since the Renaissance *Marx's Literary Style* Ludovico Silva,2023-01-24 In *Marx's Literary Style* the Venezuelan poet and philosopher Ludovico Silva argues that much of the confusion around Marx's work results from a failure to understand his literary mode of expression Through meticulous readings of key passages in Marx's oeuvre Silva isolates the key elements of his style his search for an architectonic unity at the level of the text his capacity to express himself dialectically at the level of the sentence and above all his great gift for metaphor Silva's unique sensitivity to Marx's literary choices allows him to illuminate a number of terms that have been persistently and fatefully misunderstood by many of Marx's most influential readers including alienation reflection and base and superstructure At the heart of Silva's book is his contention that we cannot hope to understand Marx if we treat him as a scientist a philosopher or a literary writer when he was in fact all three at once Originally published in 1971 this is a key work by one of the most important Latin American Marxists of the twentieth century This edition which marks the first appearance of one of Silva's works in English features an introduction by Alberto Toscano **Philosophic Pride** Christopher Brooke,2012-04-08 *Philosophic Pride* is the first full scale look at the essential place of Stoicism in the foundations of modern political thought Spanning the period from Justus Lipsius's *Politics* in 1589 to Jean Jacques Rousseau's *Emile* in 1762 and concentrating on arguments originating from England France and the Netherlands the book considers how political writers of the period engaged with the ideas of the Roman and Greek Stoics that they found in works by Cicero Seneca Epictetus and Marcus Aurelius Christopher Brooke examines key texts in their historical context paying special attention to the history of classical scholarship and the historiography of philosophy Brooke delves into the persisting tension between Stoicism and the tradition of Augustinian anti Stoic criticism which held Stoicism to be a philosophy for the proud who denied their fallen condition Concentrating on arguments in moral psychology surrounding the foundations of human sociability and self love *Philosophic Pride* details how the engagement with Roman Stoicism shaped early modern political philosophy and offers significant new interpretations of Lipsius and Rousseau together with fresh perspectives on the political thought of Hugo Grotius and Thomas Hobbes *Philosophic Pride* shows how the legacy of the Stoics played a vital role in European intellectual life in the early modern era *Science in the Age of Sensibility* Jessica Riskin,2010-11-15 Empiricism today implies the dispassionate scrutiny of facts But Jessica Riskin finds that in the French Enlightenment empiricism was intimately bound up with sensibility In what she calls a sentimental empiricism natural knowledge was taken to rest on a blend of experience and emotion Riskin argues that sentimental empiricism brought together ideas and

institutions practices and politics She shows for instance how the study of blindness led by ideas about the mental and moral role of vision and by cataract surgeries shaped the first school for the blind how Benjamin Franklin s electrical physics ascribing desires to nature engaged French economic reformers and how the question of the role of language in science and social life linked disputes over Antoine Lavoisier s new chemical names to the founding of France s modern system of civic education Recasting the Age of Reason by stressing its conjunction with the Age of Sensibility Riskin offers an entirely new perspective on the development of modern science and the history of the Enlightenment

The Wealth of Nations Adam Smith,1982-03-25 It is not from the benevolence of the butcher the brewer or the baker that we expect our dinner but from their regard to their own interest With this landmark treatise on political economy Adam Smith paved the way for modern capitalism arguing that a truly free market fired by competition yet guided as if by an invisible hand to ensure justice and equality was the engine of a fair and productive society Books I III of the Wealth of Nationsexamine the division of labour as the key to economic growth by ensuring the interdependence of individuals within society They also cover the origins of money the importance of wages profit rent and stocks Smith s work laid the foundations of economic theory in general and classical economics in particular but the real sophistication of his analysis derives from the fact that it also encompasses a combination of ethics philosophy and history to create a vast panorama of society This edition contains an analytical introduction offering an in depth discussion of Smith as an economist and social scientist as well as a preface further reading and explanatory notes The Wealth of Nations Books IV V are also published in Penguin Classics

The Bloomsbury Companion to Marx Andrew Pendakis,Imre Szeman,Jeff Diamanti,2018-12-27 There are very few figures in history that have exerted as much and as varied an influence as Karl Marx His work represents an unrivalled intervention into fields as various as philosophy journalism economics history politics and cultural criticism His name is invoked across the political spectrum in connection to revolution and insurrection social justice and economic transformation The Bloomsbury Companion to Marx is the definitive reference guide to Marx s life and work Written by an international team of leading Marx scholars the book offers comprehensive coverage of Marx s life and contexts sources influences and encounters key writings major themes and topics and reception and influence The defining feature of this Companion is its attention to the new directions in Marxism that animate the theoretical scientific and political sides of Marx s thought Gender and the growing importance of Marxist feminism is treated as equally important to clarifying Marx today as traditional and diverse categories of critique such as class capital and mode of production Similarly this Companion showcases the methodological and political importance of Marxism to environmentalist politics Finally the volume examines in detail non European Marxisms demonstrating the centrality of Marxist thought to political movements both within and beyond the global north This book is the ideal research resource for anyone working on Marx and his ideas today and as an entry point if you are approaching Marx s thought for the first time

Analytic Methods in Arithmetic Geometry Alina Bucur,David Zureick-Brown,2019-11-22

In the last decade or so analytic methods have had great success in answering questions in arithmetic geometry and number theory The School provided a unique opportunity to introduce graduate students to analytic methods in arithmetic geometry The book contains four articles Alina C Cojocaru s article introduces sieving techniques to study the group structure of points of the reduction of an elliptic curve modulo a rational prime via its division fields Harald A Helfgott s article provides an introduction to the study of growth in groups of Lie type with SL_2 F_q and some of its subgroups as the key examples The article by tienne Fouvry Emmanuel Kowalski Philippe Michel and Will Sawin describes how a systematic use of the deep methods from adic cohomology pioneered by Grothendieck and Deligne and further developed by Katz and Laumon help make progress on various classical questions from analytic number theory The last article by Andrew V Sutherland introduces Sato Tate groups and explores their relationship with Galois representations motivic L functions and Mumford Tate groups
