Of Caves And Caving A Way And A Life:

Caving in Ontario; Exploring Buried Karst Michael Gordon, 2012 8 5 X 11 full color packed with sidebars and pictures of remote seldom seen locations Caving in Ontario is about cave exploration how caves are found and the until now somewhat unheralded story of some of the most extreme cave explorations ever undertaken This is a book that anyone who is interested in rock geology geography karst and the beauty of the natural world will treasure and use both as a reference and an easy reading entertainment Caving in Ontario documents the unusual sub culture of a group of people who are focused on a sometimes extreme activity that blurs the line between science sport and exploration exploration in a landscape that is untouched by human passage Exploring the Natural Underground Kevin Bingham, 2023-06-07 This book explores the enigmatic world of the natural underground viewing it as a site of leisure and a primary sphere of anthropotechnics It

reshapes the old language of caving into new ideas that broaden the possibilities of the sociology of caving After outlining a novel methodological approach that can be used to understand new leisure trends and cultures in present modernity Exploring the Natural Underground offers a comprehensive investigation of the societal context in which caving takes place Thereafter it goes on to argue that the natural underground can be used as a means of escaping some of the unavoidable influences of consumer capitalism in the way that it stimulates imaginations senses and emotions differently Marking a turning point in the way that the natural underground is understood and the degree to which sensory dimensions of leisure are valued this book will appeal to anybody interested in caving as well as scholars and students of leisure studies the sociology of leisure the ethnography of leisure and human geography **Of Caves and Caving** John E. Gillett, 2002-05-08

What is caving Caving is fun Caving is in the darkness Caving is illuminating Caving is dangerous Caving is a minority sport for idiots This book comes tantalizingly close to explaining the reasons why apparently sane rational individuals are driven by some mysterious force to take seemingly senseless risks in the exploration of caves and underground caving systems The author s exciting journey takes us through a series of adventures beginning at a time when potholers were regarded as rather eccentric a belief reinforced by the popular press hungry for news of every mishap or accident The journey continues as an eloquently written whistle stop tour spanning four decades and several continents giving an insight into what makes cavers tick There is something here for everyone from the experienced hard man to non caver alike with tales to suit all tastes of exploits from the humorous to terrifying with interesting anecdotes that will maintain the reader s interest throughout Each step of the journey keeps one wondering what lies around the next corner **Journeys of a Lifetime,**

Beyond Mammoth Cave James D. Borden, Roger W. Brucker, 2000-11-20. The big cave sucked us in, write Borden and Brucker, and so begins their account told in alternating first person chapters of the roles they played in extending Kentucky's Mammoth Cave from 144 miles in 1972 to over 300 miles in 1983. Generously illustrated with drawings and maps, their tale is both a history of spelunking and an underground adventure for the non claustrophobic, complete with competitive rivalries and physical peril. A sequel to *The longest cave* by Brucker and Richard Watson, 1973. Annotation copyrighted by Book News, Inc., Portland, OR.

Trapped! Robert K. Murray, Roger W. Brucker, 2013-04-06. When Floyd Collins became trapped in a cave in southern Kentucky in early 1925, the sensationalism and hysteria of the rescue attempt generated America's first true media spectacle, making Collins's story one of the seminal events of the century. The crowds that gathered outside Sand Cave turned the rescue site into a carnival. Collins's situation was front page news throughout the country; hourly bulletins interrupted radio programs, and Congress recessed to hear the latest word. *Trapped!* is both a tense adventure and a brilliant historical recreation of the past. This new edition includes a new epilogue revealing information about the Floyd Collins story that has come to light since the book was first published.

Encyclopedia of Caves William B. White, David C. Culver, Tanja Pipan, 2019-05-10. *Encyclopedia of Caves*, Third Edition, provides detailed background information to anyone with a serious interest in caves. This includes students, both undergraduate and graduate, in the earth, biological, and environmental sciences, and consultants, environmental scientists, land managers, and government agency staff whose work requires them to know something about caves and the biota that inhabit them. Caves touch on many scientific interests in geology, climate science, biology, hydrology, archaeology, and paleontology, as well as more popular interests in sport caving and cave exploration. Case studies and descriptions of specific caves selected for their special features and public interest are also included. This book will appeal to these audiences by providing in-depth essays written by expert authors chosen for their expertise in their assigned subject. Features 14 new chapters and 13 completely rewritten chapters. Contains beautifully illustrated content with more than 500 color images of cave life and features. Provides extensive bibliographies that allow readers to access their subject of interest in greater depth.
