Food Culture in the Pacific Islands Roger Haden, 2009-08-10 The food culture of the Pacific Islands has been determined by isolation from the rest of the world. Original immigrants from Asia brought their foods, animals, and culinary skills with them; then for several thousand years they were largely uninfluenced by outsiders. The tropical climate of much of the region, unique island geology, and environmental factors also played a role in the evolution of islander cuisine, which is based on unique ingredients. The staples of breadfruit, yams, taro, coconut, sweet potato, and cassava are incorporated into a cuisine that uses cooking and preservation techniques unique to Polynesia, Micronesia, and Melanesia. Today food culture in the Pacific is largely one of extremes. Although traditional foods and cookery survive and are highly valued, Westernization has meant that the overall diet of islanders has been negatively transformed and that islands are net importers of unhealthful foods. Ironically, the tourism industry has re-engaged islander people in food production and boosted their sense of identity. Students, food mavens, and travellers will find this to be a stellar introduction to the current culture of the Pacific Islands, with discussion of Hawaii, Australia, and New Zealand included.

Chapter 1: Historical Overview offers a fascinating chronicle of the evolution of a food culture of extremes of isolation, climate, environment, and Western influences. Chapter 2: Major Foods and Ingredients introduces a host of traditional tropical manna, as well as imported products. The Cooking chapter discusses the truly unique cooking styles of the islands, such as steam baking in the ground in an umu oven. Chapter 4: Typical Meals largely explores the emphasis on the ubiquitous processed foods. A Regional Specialties chapter reveals both pan-regional dishes and the noted local dishes. Chapter 6: Eating Out discussion shows the new acceptance of the individualist recreational ritual of eating away from the community. The typical life cycle food rituals are covered in the Special Occasions chapter. A final chapter on Diet and Health highlights the increase in Western diseases arising from diet and lifestyle changes and discusses timely food security issues as well. Recipes are interspersed throughout, and a timeline, glossary, selected bibliography, and photos round out the coverage.

Anthropology and Nature Kirsten Hastrup, 2013-08-15 On the basis of empirical studies, this book explores nature as an integral part of the social worlds conventionally studied by anthropologists. The book may be read as a form of scholarly edgework resisting institutional divisions and conceptual routines in the interest of exploring new modalities of anthropological knowledge making. The present interest in the natural world is partly a response to large-scale natural disasters and global climate change and to a keen sense that nature matters to society at many levels, ranging from the microbiological and genetic framing of reproduction over co-species development to macro-ecological changes of weather and climate. Given that the human footprint is now conspicuous across the entire globe, in the oceans as well as in the atmosphere, it is difficult to claim that nature is what is given and permanent while people and societies are ephemeral and simply derivative features. This implies that society matters to nature and some natural scientists look towards the social sciences for an understanding of how people think and how societies work. The book

thus opens up a space for new forms of reflection on how natures and societies are generated

Encountering the Pacific in the Age of the Enlightenment John Gascoigne, 2014-03-20 The Pacific Ocean was the setting for the last great chapter in the convergence of humankind from across the globe Driven by Enlightenment ideals Europeans sought to extend control to all quarters of the earth through the spread of beliefs the promotion of trade and the acquisition of new knowledge This book surveys the consequent encounters between European expansionism and the peoples of the Pacific John Gascoigne weaves together the stories of British French Spanish Dutch and Russian voyages to destinations throughout the Pacific region In a lively and lucid style he brings to life the idealism adventures and frustrations of a colourful cast of historical figures Drawing upon a range of fields he explores the complexities of the relationships between European and Pacific peoples Richly illustrated with historical images and maps this seminal work provides new perspectives on the significance of European contact with the Pacific in the Enlightenment

Islandology Marc Shell, 2014-10-08 Islandology is a fast paced fact filled comparative essay in critical topography and cultural geography that cuts across different cultures and argues for a world of islands The book explores the logical consequences of geographic place for the development of philosophy and the study of limits Greece and for the establishment of North Sea democracy England and Iceland explains the location of military hot spots and great cities Hormuz and Manhattan and sheds new light on dozens of world historical productions whose motivating islandic aspect has not heretofore been recognized Shakespeare s Hamlet and Wagner s Ring of the Nibelung Written by Shell in view of the melting of the world s great ice islands Islandology shows not only new ways that we think about islands but also why and how we think by means of them

Trading Nature Jennifer Newell, 2010-06-30 When Captain Samuel Wallis became the first European to land at Tahiti in June 1767 he left not only a British flag on shore but also three guinea hens a pair of turkeys a pregnant cat and a garden planted with peas for the chiefess Purea Thereafter a succession of European captains missionaries and others planted seeds and introduced livestock from around the world In turn the islanders traded away great quantities of important island resources including valuable and spiritually significant plants and animals What did these exchanges mean What was their

impact The answers are often unexpected They also reveal the ways islanders retained control over their societies and landscapes in an era of increasing European intervention Trading Nature explores from both the European and Tahitian perspective the effects of ecological exchange on one island from the mid eighteenth century to the present day Through a series of dramatic episodes Trading Nature uncovers the potency of trading in nature In the interweavings of chiefly power ordinary islanders the ambitions of outsiders transplanted species and existing ecologies the book uncovers the cultural and ecological impacts of cross cultural exchange Evidence of these transactions has been found in a rich variety of voyage journals missionary diaries Tahitian accounts colonial records travelers tales and a range of visual and material sources The story progresses from the first trades on Tahiti s shores for provisions for British and French ships to the contrasting histories of cattle in Tahiti and Hawai i Two key exportations of species are analyzed the great breadfruit transplantation project that linked Britain to Tahiti and the Caribbean and the politically volatile trade in salt pork that ran between Tahiti and the Australian colonies in the nineteenth century In each case the author explores the long term impacts of the exchanges on modern Tahiti Trading Nature is a finely researched and entertaining work that will find a ready audience among those with an interest in the Pacific ecological history and the startling consequences of entangling people plants and animals on island shores

Solution Protocols to Festering Island Disputes Godfrey Baldacchino,2017-04-28 Since the coming into force of the United Nations Law of the Sea states have been targeting outlying islands to expand their exclusive economic zones simultaneously stirring up strident nationalism when such plans clash with those of neighbouring states No such actions have brought the world closer to the brink of war than the ongoing face off between China and Japan over the Diaoyu Senkaku islands an uninhabited archipelago in the East China Sea In this timely and original book Godfrey Baldacchino provides a detailed exploration of seven tried and tested solution protocols that have led to innovative win win solutions to island disputes over the last four centuries A closer look at the circumstances and processes that brought contending regional powers to an honourable even mutually advantageous settlement over islands provides a convincing and original argument as to why the conflict over the Diaoyu Senkaku islands need not conclude in a zero sum or winner takes all solution as is the likely outcome of both open conflict and international arbitration The book will be of interest to scholars and practitioners concerned with the festering Diaoyu Senkaku dispute as well as students scholars and policy specialists in geography geopolitics international relations conflict studies island studies Asian studies and history

Oceania under steam Frances Steel,2017-02-01 The age of steam was the age of Britain s global maritime dominance the age of enormous ocean liners and human mastery over the seas The world seemed to shrink as timetabled shipping mapped out faster more efficient and more reliable transoceanic networks But what did this transport revolution look like at the other end of the line at the edge of empire in the South Pacific Through the historical example of the largest and most

important regional maritime enterprise the Union Steam Ship Company of New Zealand Frances Steel eloquently charts the diverse and often conflicting interests itineraries and experiences of commercial and political elites common seamen and stewardesses and Islander dock workers and passengers Drawing on a variety of sources including shipping company archives imperial conference proceedings diaries newspapers and photographs this book will appeal to cultural historians and geographers of British imperialism scholars of transport and mobility studies and historians of New Zealand and the Pacific

When Women Ruled the Pacific Joy Schulz, 2023-08 Throughout the nineteenth century British and American imperialists advanced into the Pacific with catastrophic effects for Polynesian peoples and cultures In both Tahiti and Hawai i women rulers attempted to mitigate the effects of these encounters utilizing their power amid the destabilizing influence of the English and Americans However as the century progressed foreign diseases devastated the Tahitian and Hawaiian populations and powerful European militaries jockeyed for more formal imperial control over Polynesian waystations causing Tahiti to cede rule to France in 1847 and Hawai i to relinquish power to the United States in 1893 In *When Women Ruled the Pacific* Joy Schulz highlights four Polynesian women rulers who held enormous domestic and foreign power and expertly governed their people amid shifting loyalties outright betrayals and the ascendancy of imperial racism Like their European counterparts these Polynesian rulers fought arguments of lineage as well as battles for territorial control yet the freedom of Polynesian women in general and women rulers in particular was unlike anything Europeans and Americans had ever seen Consequently white chroniclers of contact had difficulty explaining their encounters initially praising yet ultimately condemning Polynesian gender systems resulting in the loss of women s autonomy The queens successes have been lost in the archives as imperial histories and missionary accounts chose to tell different stories In this first book to consider queenship and women s political sovereignty in the Pacific Schulz recenters the lives of the women rulers in the history of nineteenth century international relations
