Of Gods And Men:

Law, Reason, and the Cosmic City Katja Maria Vogt, 2008-01-08 The notions of the cosmic city and the common law are central to early Stoic political thought As Vogt shows together they make up one complex theory A city is a place governed by the law Yet on the law pervading the cosmos can be considered a true law and thus the cosmos is the only real city A city is also a dwelling place in the case of the cosmos the dwelling place of all human beings Further a city demarcates who belongs together as fellow citizens The thought that we should view all other human beings as belonging to us constitutes the core of Stoic cosmopolitanism All human beings are citizens of the cosmic city in the sense of living in the world But the demanding task of acquiring wisdom allows a person to become a citizen in the strict sense someone who lives according to the law as the gods do The sage is the only citizen relative friend and free person via these notions the Stoics explore the political dimensions of the Stoic idea of wisdom Vogt argues against two widespread interpretations of the common law that it consists of rules and that lawful action is what right reason prescribes While she rejects the rules interpretation she argues that the prescriptive reason interpretation correctly captures key ideas of the Stoics theory but misses the substantive side of their conception of the law The sage fully understands what is valuable for human beings and this makes her actions lawful The Stoics emphasize the revisionary nature of their theory whatever course of action perfect deliberation commands even if it be cutting off one s limb and eating it we should act on its command and not be held back by conventional judgments

Homeric world Irene J. F. de Jong, 1999 Nirvana Steven Collins, 2010-03-25 An introduction to the Buddhist concept of nirvana, offering its own interpretations of key texts and translations for non-specialist readers. *Temporalities, Texts,*

Ideologies Bobby Xinyue, 2024-01-11 *Temporalities: Texts & Ideologies* provides a new analysis of the significance of time in Classical and early modern literature, demonstrating that literary temporality continually intervenes in questions of ontology, hierarchy, and politics. Examining a diverse range of texts from Homeric epic to eighteenth-century poems on the Last Judgement, this collection of essays contends that temporality in literature sits at the heart of how authors from antiquity through to the early modern period understood and negotiated the structures that shaped their lives and may shape lives to come. Approaching the topic through four themes, the essays in this volume highlight the ways in which time is construed as relational, contestable, and politically inflected. The authors show that variations in temporalities enable texts to critique the interactions or tensions between tradition and change, agency and determinism, social system and individual experience. The result is a refreshing approach to literary figurations of time that responds to the recent temporal turn in the humanities, engages with current critical trends such as ontological analysis and ecological criticism, and opens up an exciting new direction for future research on the connection between time, text, and context. Deification in Classical Greek Philosophy

and the Bible James Bernard Murphy, 2024-06-27 The goal of human life according to Plato, Aristotle, and the Bible is to become as much like God as possible. This book, written in vivid and lucid English, illuminates Greek philosophy by showing how it grows out of ancient Greek religion and how it compares to biblical religion. **Oxford Readings in Lucretius**

Monica R. Gale, 2007-09-07 This book gathers together some of the most important and influential scholarly articles of the last sixty to seventy years, three of which are translated into English here for the first time, on the Roman poet Lucretius. Lucretius' philosophical epic, the *De Rerum Natura* or *On the Nature of the Universe* (c. 55 BC), seeks to convince its reader of the validity of the rationalist theories of the Hellenistic thinker Epicurus. The articles collected in this volume explore Lucretius' poetic and argumentative technique from a variety of perspectives and also consider the poem in relation to its philosophical and literary milieu and to the values and ideology of contemporary Roman society. All quotations in Latin or Greek are translated. **Nicene and Post-Nicene Fathers** Philip Schaff, 2007-05-01 The Council of Nicaea in 325 AD

marked the beginning of a new era in Christianity For the first time doctrines were organized into a single creed The Nicene and Post Nicene Fathers did most of their writing during and after this important event in Church history Unlike the previous era of Christian writing the Nicene and Post Nicene era is dominated by a few very important and prolific writers In Volume II of the 14 volume collected writings of the Nicenes and Post Nicenes first published between 1886 and 1889 readers will discover one of Augustines masterworks City of God In this groundbreaking work Augustine proposes a philosophy that sees history as having a purpose and direction Coming at a time when Roman civilization was failing this work argued that Romans could find comfort in Christianity because all of history was merely a struggle between the City of God believers and the City of Man nonbelievers Should Romans put their faith in the City of God even their declining civilization should cause them no grief Even though it was written at a very particular time in history City of God appeals to all Christians seeking inspiration to continue their religious practice
