Off Beat:

Off Beat Jan Hein Hoogstad, Birgitte Stougaard Pedersen, 2013-08-01 *Off Beat* Pluralizing Rhythm draws attention to rhythm as a tool for analyzing various cultural objects in fields as diverse as music culture nature and economy rhythm can be seen as a phenomenon that both connects and divides It suggests a certain measure with which people practices and cultures may comply Yet for this very reason rhythm can also function as a field of exclusion contestation and debate In that respect rhythm possesses an underestimated meaning creating potential Whereas its connecting force is often accentuated in the aesthetic political and commercial usage of the term the divisive aspect of rhythm is at least as important This volume wants to rid rhythm of its harmless nearly esoteric reputation as a cosmic unifier by understanding it in the light of the contemporary medial turn In the present collection of essays we have encouraged approaches that combine political aesthetic musical and theoretical dimensions of rhythm Jan Hein Hoogstad is Assistant Professor in Comparative Literature and Cultural Analysis at the University of Amsterdam the Netherlands Birgitte Stougaard Pedersen is Associate Professor in the Section for Aesthetics and Culture Department of Aesthetics and Communication Aarhus University Denmark

Computational Phonogram Archiving Rolf Bader, 2019-01-25
The future of music archiving and search engines lies in deep learning and big data. Music information retrieval algorithms automatically analyze musical features like timbre, melody, rhythm, or musical form, and artificial intelligence then sorts and relates these features. At the first International Symposium on Computational Ethnomusicological Archiving held on November 9 to 11, 2017, at the Institute of Systematic Musicology in Hamburg, Germany, a new Computational Phonogram Archiving standard was discussed as an interdisciplinary approach. Ethnomusicologists, music and computer scientists, systematic musicologists, as well as music archivists, composers, and musicians, presented tools, methods, and platforms and shared fieldwork and archiving experiences in the fields of musical acoustics, informatics, music theory, as well as on music storage, reproduction, and metadata. The Computational Phonogram Archiving standard is also in high demand in the music market as a search engine for music consumers. This book offers a comprehensive overview of the field, written by leading researchers around the globe.
