known physicians once asserted Walking is man s best medicine Over the last three centuries people have endorsed walking
for a variety of reasons health among them Before the 1700s people walked as an essential part of their lifestyle With the
coming of the transportation revolution and the advent of such conveyances as horse drawn coaches railways and
automobiles walking became something that was done increasingly out of choice rather than necessity England s fashionable
society engaged in afternoon promenades as a stylish fad While America s vast distances and sparse settlements made this
activity impractical Americans nevertheless took to walking in other ways including engaging in long distance walking
competitions complete with spectators and prize money Thus for most of the twentieth century the activity of walking was
much more than a means of transportation Beginning with the history of walking as a social activity the book discusses the
various issues which have affected walkers including increased automobile traffic the attention of the marketing industry and
pedestrian regulations The work examines the contemplative psychological and observational qualities of walking as well as
famous personalities including Leonardo da Vinci William Shakespeare John Keats and John James Audubon who endorsed
these intellectual qualifications During the 1970s fitness boom walking was reinvented yet again becoming an activity of
numbers and equations as participants fought to maximize health benefits The book concludes with a legal analysis of
pedestrianism as it relates to sharing space with the automobile **Gannon** Doug Bowman,1994 Texas is a vast lawless
