Michael Brian Murphy,2022-12-20 Do you REALLY like to play Sudoku puzzles Are you the type of puzzler who loves the 16 16 and 25 25 grids and also likes variety Sudokus but has little interest in boring standard 9 9s Well great news Here's a humongous 100 100 Sudoku with diagonals and here's the best part This one is in color No more bothering with those tiny black and white grids With this book you can go much much further than that and create a much larger grid size by cutting pages out and pasting or taping them together to form a 100 100 Sudoku And what's more each of the 100 individual 10 10 squares are subdivided into four 5 5 squares with different colors red yellow green and blue along with gray squares indicating the diagonals The gray squares along the long diagonals each contain the numbers 0 to 99 In addition each color set has its own 25 different numbers from 0 to 99 which will be consistent throughout the entire grid which you can deduce via crossing out numbers used on other color squares using the scratch pads provided As a result when you combine any four 5 5 squares with the four different colors whether those four 5 5 squares be in a 10 10 cage all aligned in a row in a column or even on a long diagonal as well as each set of four corners from the outermost corners of the grid to the centermost or just in random disparate places they will end up containing all of the numbers from 0 to 99 How cool is that *Nets, Puzzles, and Postmen* ,2009-01-29 What do road and railway systems electrical circuits mingling at parties mazes family trees and the internet all have in common All are networks either people or places or things that relate and connect to one another Only relatively recently have mathematicians begun to explore such networks and connections and their importance has taken everyone by surprise The mathematics of networks form the basis of many fascinating puzzles and problems from tic tac toe

and circular sudoku to the Chinese Postman Problem can he deliver all his letters without traversing the same street twice Peter Higgins shows how such puzzles as well as many real world phenomena are underpinned by the same deep mathematical structure Understanding mathematical networks can give us remarkable new insights into them all 77
