Agricultural Experiment Station,1911 Seed Biology Michael Black,K. J. Bradford,Jorge Vázquez-Ramos,2000 Substantial progress has been made in seed science during the past few years emphasizing the important role seed biology plays in advancing plant biotechnology agriculture and plant resource management and conservation This book describes the status of seed research and technology **Rice, Agriculture, and the Food Supply in Premodern Japan** Charlotte von Verschuer,Wendy Cobcroft,2016-02-22 The majority of studies on the agricultural history of Japan have focused on the public administration of land and production and rice the principal source of revenue has received the most attention However while this cereal has clearly played a decisive role in the public economy of the Japanese State it has not had a predominant place in agricultural production Far from confining its scope to a study of rice growing for tax purposes this volume looks at the subsistence economy in the plant kingdom as a whole This book examines the history of agriculture in premodern Japan from the 8th to the 17th century dealing with the history of agricultural techniques and food supply of rice wheat millet and other grains Drawing extensively on material from history literature archaeology ethnography and botany it analyses each of the farming operations from sowing to harvesting and the customs pertaining to consumption It also challenges the widespread theory that rice cultivation has been the basis of Japaneseness for two millennia and the foundation of Japanese civilization by focusing on the biodiversity and polycultural traditions of Japan Further it will play a role in the current dialogue on the future of sustainable agricultural production from the viewpoints of ecology biodiversity dietary culture and food security throughout the world as traditional techniques such as crop rotation are explored in connection with the safeguarding of the minerals in the soil Surveying agricultural

techniques across the centuries and highlighting the dietary diversity of Japan this book will appeal to students and scholars of Japanese history the history of science and technology medieval history cultural anthropology and agriculture Regular Bulletin ... Michigan State University. Agricultural Experiment Station,1907 **Publications of the Pennsylvania German Society** Pennsylvania-German Society,1926 Thirty Great Inventions of China Jueming Hua,Lisheng Feng,2020-12-14 The book presents thirty great Chinese inventions both ancient and modern which are original distinct have made outstanding contributions and had extensive influence in China and around the globe It also clarifies the misunderstandings and provides a clear definition and classification of the evaluation criteria for great inventions Each invention is presented with color pictures and comprehensive discussions The book not only offers readers the fascinating stories behind the greatest inventions of all time from China such as the compass paper and tea making planting but also allows them to be inspired by the great Chinese inventors inherent spirit of innovation and creativity Frontiers in the Study of Ancient Plant Remains ,2023-11-16 In the last two decades plant biology has developed rapidly ranging from molecular genetics cell biology and physiology to ecology and evolutionary issues both for economic species and species unrelated to humans These topics have received intensive attention however there is still a large gap in the study of plant biology in prehistoric times especially those closely related to humans The identification of plant species in archaeological sites plays an important role in exploring the paleoenvironment the origin and spread of agriculture and the relationship between humans and nature In this research topic we welcome progress in all aspects of ancient plant fossil research especially phytoliths starches pollen and carbonized seeds from the mechanisms of plant fossil formation to their phytosystematics and the associated paleoecology and paleoenvironment
