REAL - Yearbook of Research in English and American Literature, Volume 38 Laura Bieger, Johannes Völz, 2024-04-29
Celebrating the 80th birthday of Winfried Fluck this volume of REAL gathers leading US American and European literary scholars from English and American Studies to engage some of his classic essays covering topics that range from the aesthetics of early American literature to the history of our digital present and from the Americanization of literary studies to the search for American democratic culture Each of the volume s twelve dialogues consists of a republished essay by Fluck and a response by one his interlocutors written specifically for this occasion Contributors include field defining scholars long time companions and colleagues whose intellectual trajectory has been impacted by Fluck s incisive metacriticism and his reception oriented approach to literary and cultural history The twelve dialogues reassess debates that have shaped literary studies in the late twentieth century and they inquire into the paradigmatic shifts that are currently reorganizing the field

REAL - Yearbook of Research in English and American Literature Sarah Fekadu, Hanna Straß-Senol, Tobias Döring, 2017-06-12 *Meteorologies of Modernity* explores the ways in which literature reflects and participates in discourses on weather and climate historically as well as at our contemporary moment Literature contains a huge meteorological archive built throughout the centuries The essays collected in this volume therefore ask to what extent literature can bring the vastness and complexity of climate change into view how literature offers ways to think through the challenges of the Anthropocene both culturally historically and aesthetically and last but not least how it helps us to conceptualize a radically new understanding of what it means to be human The thirteen contributions from literary and cultural studies address weather and climate discourses from a variety of conceptual angles and cover a broad range of historical and geographical contexts Topics include representations of tropical climates in Shakespeare the close yet tense relationship between literature and the rising discipline of meteorology in the nineteenth century allegories of climate change in postcolonial literature and climate catastrophes in the contemporary clifi novel By employing a historicizing and comparative approach the volume addresses the need for studying representations of climate and climate change in an interdisciplinary transnational and transhistorical framework overcoming traditional disciplinary boundaries and creating new collectives of theory and criticism that are essential when debating the Anthropocene *Fictions of Western American Domesticity*
Amanda J. Zink, 2018-06 This work provides a compelling explanation of something that has bedeviled a number of feminist scholars Why did popular authors like Edna Ferber continue to write conventional fiction while living lives that were far from conventional Amanda J Zink argues that white writers like Ferber and Willa Cather avoided the subject of their own domestic labor by writing about the performance of domestic labor by others showing that American print culture both in novels and through advertisements moved away from portraying women as angels in the house and instead sought to persuade other women to be angels in their houses Zink further explores lesser known works such as Mexican American cookbooks and

essays in Indian boarding school magazines to show how women writers dialoging domesticity exemplify the cross cultural encounters between colonial domesticity and sovereign domesticity By situating these interpretations of literature within their historical contexts Zink shows how these writers championed and challenged the ideology of domesticity

The Task of Utopia Erin McKenna, 2001 At their best both American pragmatism and utopianism are about hope Both encourage people to think about the future as a guide to understanding the past and forming the present Just as pragmatism has often been misunderstood as valueless instrumentalism utopianism has been limited to dreams of a static perfect world In this book Erin McKenna argues that utopian vision informed by pragmatism results in a process model of utopia that can help form the future based on critical intelligence Using John Dewey's works with feminist theory and literature McKenna develops this pragmatist feminist model of utopia

Metaphors Shaping Culture and Theory Herbert Grabes, 2009

Watching Slavery Joe Lockard, 2008 How did witnesses of slavery relate their experiences and what effect did their reports have This book examines travel accounts fictions poetry and legal texts to analyze direct and indirect encounters with slavery in the antebellum United States It discusses the rhetorical politics of British and American and black and white observations of slavery The discussion raises critical questions about the role of witness and its link with political action both in antebellum and contemporary America

Speech Acts in Literature Joseph Hillis Miller, 2001 This book demonstrates the presence of literature within speech act theory and the utility of speech act theory in reading literary works Though the founding text of speech act theory J L Austin's *How to Do Things with Words* repeatedly expels literature from the domain of felicitous speech acts literature is an indispensable presence within Austin's book It contains many literary references but also uses as essential tools literary devices of its own imaginary stories that serve as examples and imaginary dialogues that forestall potential objections *How to Do Things with Words* is not the triumphant establishment of a fully elaborated theory of speech acts but the story of a failure to do that the story of what Austin calls a bogging down After an introductory chapter that explores Austin's book in detail the two following chapters show how Jacques Derrida and Paul

de Man in different ways challenge Austin's speech act theory generally and his expulsion of literature specifically. Derrida shows that literature cannot be expelled from speech acts rather than what he calls iterability means that any speech act may be literature. De Man asserts that speech act theory involves a radical dissociation between the cognitive and positing dimensions of language what Austin calls language's constative and performative aspects. Both Derrida and de Man elaborate new speech act theories that form the basis of new notions of responsible and effective politico ethical decision and action. The fourth chapter explores the role of strong emotion in effective speech acts through a discussion of passages in Derrida, Wittgenstein and Austin. The final chapter demonstrates through close readings of three passages in Proust the way speech act theory can be employed in an illuminating way in the accurate reading of literary works.

International Books in Print, 1997 Aporias of Translation Elias Schwieler, 2022-06-06 This book proposes a new way for scholars in for example Education, Literary Studies and Philosophy to approach texts and other phenomena through the concept and practice of translation. Its interdisciplinary perspective makes the book of value for graduate students and scholars in the Humanities and Social Sciences. The unique take on translation as related to the notion of aporia is applied to a number of seminal and classical texts within literature, poetry and philosophy which gives the reader new understandings of the workings of language and what happens within and between languages as well as within and between disciplines when some form of interpretation or analysis is at work. Importantly the book develops the notion of aporias of translation as a way to learn and develop our understanding of texts and phenomena and thus functions as a pedagogical process which helps us come to terms with the boundaries of language and academic disciplines.

America Embattled Richard Crockatt, 2012-10-12 What causes Anti Americanism and where are its historical roots? What is the impact of 9/11 on America's sense of itself and its role in the world? Is America paradoxically a victim of its own political and economic power? This book seeks to understand the terrible attacks of September 11th within a broader historical, political and ideological context. Rather than drawing on simple clash of civilisation oppositions the author argues that it is important to have an awareness of the complex historical processes which influence America's sense of itself and its changing view of the world. How the world especially the Muslim world views America. The changing nature of international politics and the global system since the end of the cold war. Drawing on a wide range of contemporary and historical sources, Richard Crockatt has written a balanced, subtle and highly readable book which provides genuine insight into American foreign policy, anti Americanism and Islamic fundamentalism. It will be important reading for all those seeking to understand the background to the war on terror.
