Fighting the War of Ideas Like a Real War J. Michael Waller, 2007 This ground breaking monograph departs from the conventional view of public diplomacy and international communication in time of war and argues for deploying messages as weapons of attack against the terrorists and other extremists Proposing an immedia *Real War vs. Reel War* Suzanne Broderick, 2015-01-22 World War II has been the subject of hundreds if not thousands of films produced in the United States alone From training camp scenes in See Here Private Hargrove to images of brutal combat in Saving Private Ryan filmmakers have been tasked with replicating pivotal moments in the war But sometimes story lines and dramatic manipulations of audiences have led to less than faithful re creations of what men and women have endured during times of conflict In *Real War vs Reel War* Veterans Hollywood and World WarII Suzanne Broderick looks at how on screen portrayals hold up against wartime experiences of actual combatants soldiers sailors pilots code talkers and prisoners of war In addition two women real life Rosie the Riveters compare depictions of the homefront with their experiences during the war These members of the Greatest Generation share personal memories and offer commentary on the films that have sought to capture what it was really like Among the films discussed in this book are such classics as *Battleground Twelve O Clock High The Best Years of Our Lives Since You Went Away The Sands of Iwo Jima* and *The Great Escape* as well as more contemporary films such as *Swing Shift* and *Windtalkers* By providing a human look at the military the war effort and how such people and events were depicted on screen *Real War vs Reel War* makes a unique contribution to the conversation about Hollywood s role in shaping history This book will appeal to historians cultural critics and anyone interested in war cinema **The Real War** Richard Nixon, 2013-01-08 In this landmark 1980 bestseller Richard Nixon presents an effective analysis of strategic shortcomings and a prescription for renewed strength Nixon s tough minded views discussed in this book became a blueprint for Ronald Reagan s military buildup and strategic initiatives which ultimately paved the way for the end of the Cold War Highly relevant to contemporary times Nixon argues persuasively that America must assume a role of global leadership to make sure the war of annihilation never happens The economic material and technological capacities to prevail are not enough he cautions without the resolve of national will He utilizes the lessons of history from the Mongolian invasion of Russia to the revolution in Iran to instruct the future From his unique perspective as the former chief executive of the nation he tells us how we can use our political economic and military strengths to turn the tide "...the real war will never get in the books" Louis P. Regulation of Uncertainty in International Law Monika Ambrus, Rosemary Rayfuse, Wouter Werner, 2017-08-25

Increasingly international legal arrangements imagine future worlds or create space for experts to articulate how the future can be conceptualized and managed With the increased specialization of international law a series of functional regimes and sub regimes has emerged each with their own imageries vocabularies expert knowledge and rules to translate our hopes and fears for the future into action in the present At issue in the development of these regimes are not just competing predictions of the future based on what we know about what has happened in the past and what we know is happening in the present Rather these regimes seek to deal with futures about which we know very little or nothing at all futures that are inherently uncertain and even potentially catastrophic futures for which we need to find ways to identify conceptualise manage and regulate risks the existence of which we can possibly only speculate about This book explores how the future is imagined articulated and managed across the various fields of international law including the use of force maritime security international economic and environmental law and human rights It investigates how the future is construed in these various areas how the costs of risk risk regulation risk assessment and risk management are distributed in international law the effect of uncertain futures on the subjects of international law and the way in which international law operates when faced with catastrophic or existential risk *Global Communications, International Affairs and the Media Since 1945* Philip Taylor, 2002-11 An analysis of the nature role and impact of communications within the international arena since 1945 Taylor provides an accessible guide to this growing field for students of media communications studies and international history

The Use of Force in UN Peacekeeping Peter Nadin, 2018-02-06 This edited volume provides a detailed and nuanced analysis of UN peacekeeping and the use of force to inform a better understanding of the complex and interconnected issues at stake for the UN community. Peacekeeping is traditionally viewed as a largely passive military activity governed by the principles of impartiality, consent, and the minimum use of force. Today, most large UN Peacekeeping Operations are only authorized to use force in defence of their mandates and to protect civilians under imminent threat of physical violence. Recently, with the deployment of the Force Intervention Brigade in the DRC, the UN has gone beyond peacekeeping and into the realm of peace enforcement. These developments have brought to the fore questions regarding the use of force in the context of peacekeeping. The key questions addressed in this book examine not only the utility of force but also the dilemmas and constraints inherent to the purposive use of force at a strategic, operational, and tactical level. Should UN peacekeepers exercise military initiative? Is UN peacekeeping capable of undertaking offensive military operations? If so, then under what circumstances should peacekeepers use force? How should force be wielded? And against whom? With chapters written by experts in the field, this comprehensive volume will be of great use and interest to postgraduate students, academics, and experts in international security, the UN peacekeeping, and diplomacy.

Craig, Felix Gilbert, 2010-10-01 Authoritative and convincing New York Times Book Review The classic reference on the theory and practice of war The essays in this volume analyze war its strategic characteristics and its political and social functions over the past five centuries The diversity of its themes and the broad perspectives applied to them make the book a work of general history as much as a history of the theory and practice of war from the Renaissance to the present *Makers of Modern Strategy from Machiavelli to the Nuclear Age* takes the first part of its title from an earlier collection of essays that became a classic of historical scholarship Three essays are repinted from the earlier book while four others have been extensively revised The rest twenty two essays are new The subjects addressed range from major theorists and political and military leaders to impersonal forces Machiavelli Clausewitz and Marx and Engels are discussed as are Napoleon Churchill and Mao Other essays trace the interaction of theory and experience over generations the evolution of American strategy for instance or the emergence of revolutionary war in the modern world Still others analyze the strategy of particular conflicts the First and Second World Wars or the relationship between technology policy and war in the nuclear age Whatever its theme each essay places the specifics of military thought and action in their political social and economic environment Together the contributors have produced a book that reinterprets and illuminates war one of the most powerful forces in history and one that cannot be controlled in the future without an understanding of its past **The Pulse of Politics** James David Barber, 2017-09-29 Every four years journalists propel a presidential campaign into the national consciousness New candidates and issues become features of the political landscape while familiar rituals are reshaped by the unpredictability of personalities and events Underlying this apparent process of change however is a recurrent cycle of political themes and social attitudes a pulse of politics that locks the process of choosing a president into a predictable pattern In this bold and brilliant examination of modern presidential politics James David Barber reveals the dynamics of this cycle and shows how the pattern of drift and reaction may be broken in this most critical of political choices Barber probes beneath the surface of campaigns to detect a steady rhythm of major political motifs The theory he advances in colorful narrative chapters is that three dominant themes conflict conscience

conciliation recur in foreseeable twelve year cycles A combative campaign Truman vs Dewey in 1948 is followed four years later by a moral crusade Eisenhower vs Stevenson in 1952 which in turn is succeeded by a contest to unify the nation the Eisenhower Stevenson rematch in 1956 The pattern is then renewed the fierce combat between Kennedy and Nixon in 1960 was followed in 1964 by the contest of principle between Johnson and Goldwater In 1968 Richard Nixon defeated Hubert Humphrey by promising to bring the nation together Monitoring shifting national political moods is a new elite the journalists Barber makes the case that the party system increasingly clumsy and inflexible can no longer pick up the beat of politics Instead it is through newspapers magazines and television that the main themes of a campaign are sounded created and destroyed This new edition of *The Pulse of Politics* provides a timely guide to the themes of the 1992 presidential campaign and to future elections It will be of special interest to political scientists historians media analysts and journalists

The Ethics of Aesthetics in Japanese Cinema and Literature Nina Cornyetz, 2006-11-22 This is an innovative scholarly and original study of the ethics of modern Japanese aesthetics from the 1930s through the Second World War and into the post war period Nina Cornyetz embarks on new and unprecedented readings of some of the most significant literary and film texts of the Japanese canon for instance works by Kawabata Yasunari Mishima Yukio Abe K b and Shinoda Masahiro all renowned for their texts aesthetic and philosophic brilliance Cornyetz uniquely opens up the field in a fresh and controversial way by showing how these authors and filmmakers concepts of beauty and relation to others were in fact deeply impacted by political and social factors Probing questions are asked such as How did Japanese fascism and imperialism ideologically politically and aesthetically impact on these literary cinematic giants How did the emperor as the nodal point for Japanese national identity affect their ethics What were the repercussions of the virtual collapse of the Marxist movement in the 1960s What are the similarities and differences between pre war wartime and post war ideals of beauty and those of fascist aesthetics in general This ground breaking work is truly interdisciplinary and will appeal to students and scholars of Japanese literature film gender culture history and even psychoanalytic theory
